,2000 *Leadership of Afterschool and Supplemental Education* Hazel M. Carter,2022-07-22 This book explores the design and implementation of effective supplementary education programs that best prepare students for post secondary life Drawing from research and best practice in the fields of supplementary and afterschool education youth development and school college community partnerships this book outlines a balanced approach to viewing supplementary education and community based programs which when designed alongside classroom learning can meet the needs of underserved youth This book challenges aspiring educational leaders to confront the traditional approach to curriculum as the sole purview of the classroom and instead positions supplementary education as a tool to improve schools and student success Chapters discuss designing implementing and sustaining supplementary education programs that positively impact the social emotional and academic development of secondary school students as well as effective strategies for developing stronger connections with the community This text is designed for use in graduate preparation programs in educational leadership and includes pedagogical features such as learning objectives reflective exercises portfolio building activities and alignment to educational leadership standards

Community Development Approaches to Improving Public Health Robert S Ogilvie,2013-09-13 As the rates of chronic diseases like diabetes asthma and obesity skyrocket research is showing that the built environment the way our cities and towns are developed contributes to the epidemic rates of these diseases It is unlikely that those who planned and developed these places envisioned these situations Public health community development planning and other fields influencing the built environment have operated in isolation for much of recent history with the result being places that public health advocates have labelled designed for disease The sad irony of this is that planning and public health arose together in response to the need to create health standards zoning and building codes to combat the infectious diseases that were prevalent in the industrializing cities of late nineteenth and early twentieth century America In recent years the dramatic rise in chronic disease rates in cities and towns has begun to bring public health and planning back together to promote development pattern and policies facilitating physical activity and neighbourly interactions as antidotes In this book a number of such community development efforts are highlighted bringing attention to the need to coordinate planning community development and health policy This book was originally published as a special issue of Community Development
