Egyptian economy has faced many challenges in the decade since the 2011 Arab Spring uprisings Not only was job creation anaemic from 2012 to 2018 but new jobs were also of low quality characterized by informality and vulnerability to economic shocks These challenges pushed many in Egypt especially the most vulnerable into a more precarious labor market situation Then in the midst of economic recovery brought on by tough reform measures adopted in 2016 and 2017 the country was hit by the widespread disruption of a global pandemic This book examines the plight of Egypt's most vulnerable groups by focusing on the intersection of gender and economic vulnerability in the labor market With this emphasis on vulnerability and a lens that is sensitive to gender differences and inequities the contributors to this volume use data from the most recent wave of a unique longitudinal survey to illuminate different aspects of Egyptians lives The aspects they explore include labor

supply behavior the ability to access good quality and well paying jobs the evolution of wages and wage inequality the school to work transition of youth the decline in public sector employment international and internal migration the situation of rural women access to social protection food security vulnerability to shocks and coping mechanisms health status and access to health care services These analyses are prescient in understanding the axes of vulnerability in Egyptian society that became all too salient during the COVID 19 pandemic
