Empty Spaces:

Empty Spaces Jordan Abel, 2024-02-06 A hypnotic and mystifying exploration of land and legacy investigating what it means to be an intergenerational Indigenous survivor of Residential Schools A singular incantatory work The book feels as though forest itself is speaking sky itself river itself Nina MacLaughlin Boston Globe Jordan Abel's new work grows out of the groundbreaking visual expression in his recently published NISHGA a book that combined nonfiction with photography concrete poetry and literary inquiry Whereas NISHGA integrated descriptions of the landscape from James Fenimore Cooper's settler classic The Last of the Mohicans into visual pieces Empty Spaces reinscribes those words on the page itself and in doing so subjects them to bold rewritings Reimagining the nineteenth century text from the contemporary perspective of an urban Nisga a person whose relationship to land and traditional knowledge and spiritual traditions was severed by colonial violence Abel attempts to answer his research question of what it means to be Indigenous without access to familial territory Engaging the land through fiction and metaphor Abel creates an eerie looping and atmospheric rendering of place that evolves despite the violent and reckless histories of North America The result is a bold and profound new vision of history that decenters human perception and forgoes Westernized ways of seeing Rather than turning to characters and dialogue to explore truth Abel invites us to instead understand that the land knows everything that can and will happen even as the world lurches toward uncertainty

No More Empty Spaces D.J. Green, 2025-07-30 It's 1973 and Will Ross a divorced American geologist has signed on to work on a troubled dam in a remote rugged part of Turkey He decides to take his children with him but they think they're only going for their usual two week stint of shared custody not to live there Once in Turkey Will struggles for control of his family his work the landscape the dam is to be built on and ultimately himself Alongside these emotional conflicts he his children and everyone else involved in the dam face powerful external forces of erosion dissolution landslides and earthquakes Whether they let themselves see it or not natural hazards impact their lives every day And so do their intractable human natures Science can help them understand those forces and engineering can help control them but each character gradually comes to realize that the landscape they stand upon and the landscapes of their lives will shift and shake regardless of the choices they make The question then is how will they respond Timely and gripping No More Empty Spaces will make you think about how you relate to yourself your family and the Earth and its ever changing processes

Atheists and Empty Spaces Michael Thomas, 2022-08-31 The poems in Atheists and Empty Spaces explore the quintessential aspect of humanity the need of having something in which to believe Modern humanity attempts to fill the empty spaces in the psyche with emotional and psychological sustenance that was once provided by communal connections religion and the worship of deities or even nature These poems explore how in many ways people have all become atheists because they no longer know how to connect to natural and supernatural forces and they simply no longer believe in them Humanity is now lacking a connection to the impulses that once nurtured human desires However the poems

also suggest that art can provide a path back to those vital connections Some poems are simple explorations of personal pain that cannot be soothed Others are thorough considerations of how warped or misguided humanity's attempts really are at solving an elusive and unidentified misery Most of these poems take traditional forms of verse and song but some find their unique rhythms in contemporary free verse Others use examples from ancient cultures to comment on contemporary culture while some ideas spring from news headlines of today Each poem in this collection reflects on the ways that modern humans seek to fill their empty spaces whether atheist or not

The Empty Space Geetanjali Shree, 2023-05-29 A bomb explodes in a university cafe claiming the lives of nineteen students The Empty Space begins with the identification of those nineteen dead The mother who enters the cafe last to identify the nineteenth body brings home her dead eighteen year old son packed in a box as well as the sole survivor a three year old boy who by a strange quirk of fate is found lying in a small empty space alive and breathing The Empty Space chronicles the memories of the boy gone the story of the boy brought home and the cataclysmic crossing of life and death

Empty Spaces, Empty Places Constance Sorensen, Ron Lavin, 2001 Empty Spaces Empty Places revisits the manger cross and tomb through interviews with the innkeeper's wife the Centurion and Mary Magdalene By remembering the stories of Jesus birth death and resurrection believers see the lives He touched then and continues to touch today

Empty Space M. John Harrison, 2012-07-19 EMPTY SPACE is a space adventure We begin with the following dream An alien research tool the size of a brown dwarf star hangs in the middle of nowhere as a result of an attempt to place it equidistant from everything else in every possible universe Somewhere in the fractal labyrinth beneath its surface a woman lies on an allotropic carbon deck a white paste of nanomachines oozing from the corner of her mouth She is neither conscious nor unconscious dead nor alive There is something wrong with her cheekbones At first you think she is changing from one thing into another perhaps it's a cat perhaps it's something that only looks like one then you see that she is actually trying to be both things at once She is waiting for you she has been waiting for you for perhaps 10 000 years She comes from the past she comes from the future She is about to speak EMPTY SPACE is a sequel to LIGHT and NOVA SWING three strands presented in alternating chapters which will work their way separately back to this image of frozen transformation

The Physical Theory of Kalām Alnoor Dhanani, 2021-09-20 This book reconstructs the theories of matter and space of the mutakallimūn of the tenth and eleventh centuries A D It uses texts which have only recently become available The book presents material which challenges our previous understanding of kalām atomism In particular it analyzes the concept of atoms as a space occupying object without dimension yet having magnitude It examines the manner of the atom's occupation of space and discusses arguments for and against unoccupied spaces or the void A detailed examination of the paradoxical nature of such an atom follows The argument is made that a discrete rather than a continuous conception of space matter time motion and indeed geometry underlies kalām physical theory In this respect the kalām atom is similar to the Epicurean minimal part

Ontological Investigations Ingvar Johansson, 2013-05-02 This volume is devoted to problems

within analytic metaphysics It defends an ontology and theory of categories inspired by Aristotle but revised in such a way as to be compatible with modern science The ontology of both natural and social reality is addressed starting out from the view that universals exist but only in the spatiotemporal world immanent realism In attempting to bring Aristotle s ontology up to date the author relies very much on the thinking of Edmund Husserl conceiving the cement of the universe as Husserlian relations of existential dependence and regarding intentionality as a non reducible category in the ontology of mind The work is thoroughly realistic in spirit but large parts of it should nonetheless be of interest to conceptualists and nominalists too

Small Forgotten Places in the Hearth of Cities Antonio Lauria, Luigi Vessella, 2022-03-22 This book is the result of a research project designed and carried out at the Department of Architecture University of Florence This book discusses urban public spaces and more specifically run down inactive micro spaces that are barely used due to their location dimensions morphology or semantic characteristics In literature these spaces are often defined as residual urban spaces A large abandoned industrial area on the outskirts of a town or a small interstitial space in a historical centre can be residual With respect to such a broad subject matter the book seeks to radically limit the field concentrating on public residual spaces found in the oldest parts of cities The book reflects on this theme and introduces a method for reading and assessment of the residuality of public spaces in historical contexts Residuality Assessment Process which was tested in the historical centre of Florence It is the authors view that residual spaces above all if designed according to a system logic can go from being problems to potential activators of urban and social regeneration processes offering a useful contribution to improve city life

The Large Scale Structure of Space-Time S. W. Hawking, G. F. R. Ellis, 1975-02-27 Einstein s General Theory of Relativity leads to two remarkable predictions first that the ultimate destiny of many massive stars is to undergo gravitational collapse and to disappear from view leaving behind a black hole in space and secondly that there will exist singularities in space time itself These singularities are places where space time begins or ends and the presently known laws of physics break down They will occur inside black holes and in the past are what might be construed as the beginning of the universe To show how these predictions arise the authors discuss the General Theory of Relativity in the large Starting with a precise formulation of the theory and an account of the necessary background of differential geometry the significance of space time curvature is discussed and the global properties of a number of exact solutions of Einstein s field equations are examined The theory of the causal structure of a general space time is developed and is used to study black holes and to prove a number of theorems establishing the inevitability of singularities under certain conditions A discussion of the Cauchy problem for General Relativity is also included in this 1973 book

Out of Place Talmadge Wright, 1997-01-01 Discusses the impact of inner city redevelopment programs and policies on the homeless and shows the methods used civil protests squatting and legal advocacy by the homeless to organize a tactical resistance to restructuring efforts Presents case studies of two different types of homeless organized resistance groups in Chicago and San Jose

Terrain Vague PATRICK BARRON, Manuela Mariani, 2013-08-15 As planners and designers have turned their attentions to the blighted vacant areas of the city the concept of terrain vague has become increasingly important *Terrain Vague* seeks to explore the ambiguous spaces of the city the places that exist outside the cultural social and economic circuits of urban life From vacant lots and railroad tracks to more diverse interstitial spaces this collection of original essays and cases presents innovative ways of looking at marginal urban space with studies from the United States Europe and the Middle East from a diverse group of planners geographers and urban designers *Terrain Vague* is a cooperative effort to redefine these marginal spaces as a central concept for urban planning and design Presenting innovative ways of looking at marginal urban space and focusing on its positive uses and aspects the book will be of interest to all those wishing to understand our increasingly complex everyday surroundings from planners cultural theorists and academics to designers and architects *Pathologies of Modern Space* Kathryn Milun, 2013-10-18 *Pathologies of Modern Space* traces the rise of agoraphobia and ties its astonishing growth to the emergence of urban modernity In contrast to traditional medical conceptions of the disorder Kathryn Milun shows that this anxiety is closely related to the emergence of empty urban space homogenous space such as malls and parking lots stripped of memory and tactile features *Pathologies of Modern Space* is a compelling cultural analysis of the history of medical treatments for agoraphobia and what they can tell us about the normative expectations for the

public self in the modern city The Utopian Function of Art and Literature Ernst Bloch, 1989-03-06 Essays in aesthetics by the philosopher Ernst Bloch that belong to the tradition of cultural criticism represented by Georg Lukács, Theodor Adorno and Walter Benjamin. The aesthetic essays of the philosopher Ernst Bloch (1885-1977) belong to the rich tradition of cultural criticism represented by Georg Lukács, Theodor Adorno and Walter Benjamin. Bloch was a significant creative source for these thinkers and his impact is nowhere more evident than in writings on art. Bloch was fascinated with art as a reflection of both social realities and human dreams. Whether he is discussing architecture or detective novels, the theme that drives his work is always the same: the striving for something better for a homeland that is more socially aware, more humane, more just. The book opens with an illuminating discussion between Bloch and Adorno on the meaning of utopia, then follows twelve essays written between 1930 and 1973 on topics such as aesthetic theory, genres such as music, painting, theater, film, opera, poetry and the novel, and perhaps most important, popular culture in the form of fairy tales, detective stories and dime novels. The MIT Press has previously published Ernst Bloch's *Natural Law and Human Dignity* and his magnum opus *The Principle of Hope*. *The Utopian Function of Art and Literature* is included in the series *Studies in Contemporary German Social Thought* edited by Thomas McCarthy.

The Routledge Companion to the Sound of Space Emma-Kate Matthews, Jane Burry, Mark Burry, 2024-11-11 This companion explores a range of conceptual and practical relationships between sound and space across various disciplines, providing insights from technical, creative, cultural, political, philosophical, psychological and physiological perspectives. The content spans a wide range of spatial typologies from large reverberant buildings to modest and intimate ones from external public squares to domestic interiors and from naturally formed environments to highly engineered spaces. These compiled insights and observations explore the vast diversity of ways in which sonic and spatial realms interact. This publication therefore forms important bridges between the intricate and diverse topics of technology, philosophy, composition, performance and spatial design to contemplate the potential of sound and space as tools for creative expression and communication as well as for technical innovation. It is hoped that by sharing these insights, this book will inspire practitioners, scholars and enthusiasts to incorporate new perspectives and methodologies into their own work. Through a rich blend of theory, practice and critical reflection, this volume serves as a valuable resource for anyone interested in exploring the intricacy of relationships between space and sound, whether they are students, professionals or simply curious. Our companion provides a cross section through shared territories between sonic and spatial disciplines from architecture, engineering, sound design, music composition and performance, urban design, product design and much more.
