Ecological Sanity George Claus, Karen Bolander, 1977 **Fugitive Politics** Carl Boggs, 2021-11-10 *Fugitive Politics* explores the intersection between politics and ecology between the requirements for radical change and the unprecedented challenges posed by the global crisis a dialectic has rarely been addressed in academia Across eight chapters Carl Boggs explores how systemic change may be achieved within the current system while detailing attempts at achieving change within nation states Boggs states that any notion of revolution seems fanciful in the current climate contending that controlling elites have concentrated their hold on corporate power along three self serving fronts technology Big Tech and the surveillance order militarism and the warfare state and intensification of globalized power Combined with this Boggs cites the fundamental absence of revolutionary counter forces arguing that after decades of subservice relevant allied to the rise of identity politics and social movements the Marxist theoretical legacy is now exhausted and will not provide an exit from the crisis Boggs concludes that the only possibility for fundamental change will come from an open style of politics in the Jacobin tradition operating within the overall structures of the current democratic state Written for both an academic and a general readership in the U S and beyond *Fugitive Politics* will be of vital importance to those studying political theory political philosophy political history Marxism and Marxist theory authoritarian politics ecology environmental politics and climate politics **Eco-Socialism** David Pepper, 2002-09-26 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **Maine's Place in the Environmental Imagination** Michael D. Burke, 2020-12-15 The essays in *Maine's Place in the Environmental Imagination* address from a variety of perspectives how Maine's unique identity among the states of the United States has been formed and what that identity is A place that is still imagined by others primarily through its environmental associations its nature and landscape rather than through its social arrangements and human history The collection attempts a foundational study not of a regional literature but of a state literature In doing so it makes the case that Maine was constructed imaginatively and environmentally through its literature and that this image is the one that endures even now The essays suggest how this identity was formed by discussing writings ranging from the recently recovered work of Joseph Nicolai a member of the Penobscot Nation in the late 19th century to the contemporary Maine author Carolyn Chute from Thoreau's canonical essay *Ktaadn* to the modernist E B White whose works have an under appreciated environmental project Contributors include scholars Nathaniel Lewis Annette Kolodny Linda Kornasky Daniel Malachuk Kent Ryden and Lynn Wake **The Road from Empire to Eco-Democracy** Gene Marshall, 2012-01-20 An examination of Social Awakening History Long Vision Holistic Social Understanding Strategies of Transformation As viewed by five United States Citizens in 2011 Lead author Gene Marshall with coauthors Ben Ball Marsha Buck Ken Kreutziger and Alan Richard Though vast changes are necessary we believe humanity can find a vision and plan of action that is both satisfying and realistic Our aim is to fertilize the fruitful imagination and courage it will require to walk this Road to

Faces of Environmental Racism Laura Westra,Bill Lawson,2001-06-26 Racial minorities in the United States are disproportionately exposed to toxic wastes and other environmental hazards and cleanup efforts in their communities are slower and less thorough than efforts elsewhere Internationally wealthy countries of the North increasingly ship hazardous wastes to poorer countries of the South resulting in such tragedies as the disaster at Bhopal Through case studies that highlight the type of information that is seldom reported in the news Faces of Environmental Racism exposes the type and magnitude of environmental racism both domestic and international The essays explore the justice of current environmental practices asking such questions as whether cost benefit analysis is an appropriate analytic technique and whether there are alternate routes to sustainable development in the South The second edition of this unique volume further explores the ongoing problem of environmental racism With a new introduction and preface and new chapters by such experts as Charles W Mills Robert Melchior Figueroa and Segun Gbadegesin the second edition of Faces of Environmental Racism carries on the work of the first **America in the Third World** Steven Metz,1994 **Middle East and Arabic Countries**

Environmental Law Handbook Volume 1 Strategic Information and Regulations IBP, Inc.,2015-08-03 2011 Updated Reprint Updated Annually Middle East and Arabic Countries Environmental Law Handbook **Narnia and the Fields of Arbol** Matthew Dickerson,David O'Hara,2008-12-19 An exploration of the Chronicles of Narnia and the Space Trilogy that enriches our understanding of how to care for our world Alan Jacobs author of Breaking Bread with the Dead In Narnia and the Fields of Arbol The Environmental Vision of C S Lewis authors Matthew Dickerson and David O Hara illuminate an important yet overlooked aspect of the author s visionary work They go beyond traditional theological discussions of Lewis s writing to investigate themes of sustainability stewardship of natural resources and humanity s relationship to wilderness The authors examine the environmental and ecological underpinnings of Lewis s work by exploring his best known works of fantasy including the seven books of the Chronicles of Narnia and the three novels collectively referred to as the Space Trilogy Taken together these works reveal Lewis s enduring environmental concerns and Dickerson and O Hara offer a new understanding of his pioneering style of fiction Narnia and the Fields of Arbol the first book length work on the subject finds the author s legacy to have as much in common with the agrarian environmentalism of Wendell Berry as it does with the

fantasy of J R R Tolkien In an era of increasing concern about deforestation climate change and other environmental issues Lewis s work remains as pertinent as ever The widespread adaption of his work in film lends credence to the author s staying power as an influential voice in both fantastical fiction and environmental literature With Narnia and the Fields of Arbol Dickerson and O Hara have written a timely work of scholarship that offers a fresh perspective on one of the most celebrated authors in literary history Both revelatory and a pleasure to read Robert Siegel award winning author of The Whalesong Trilogy Living with Nature Frank Fischer, Maarten A. Hajer, 1999 This text aims to place the question of the dynamics of environmental crisis in a socio cultural dimension of the existing economic and political institutions It argues for a need to find a balance between theoretical analysis of the debate and an appreciation of local circumstances and knowledge

Theatre Ecology Baz Kershaw, 2007-12-13 A study into the relationships between performance theatre and environmental ecology **Environmental Problem Solving** Alan Miller, 2013-12-01 Human influences create both environmental problems and barriers to effective policy aimed at addressing those problems In effect environmental managers manage people as much as they manage the environment Therefore they must gain an understanding of the psychological and sociopolitical dimensions of environmental problems that they are attempting to resolve In Environmental Problem Solving Alan Miller reappraises conventional analyses of environmental problems using lessons from the psychosocial disciplines He combines the disciplines of ecology political sociology and psychology to produce a more adaptive approach to problem solving that is specifically geared toward the environmental field Numerous case studies demonstrate the practical application of theory in a way that is useful to technical and scientific professionals as well as to policy makers and planners Alan Miller is Professor of Psychology at the University of New Brunswick The Modern Crisis Murray Bookchin, 2022-07-29 Murray Bookchin s frank assessment of the disaster we are heading toward at increasing speed is as much a work of ethics as it is of environmentalism The four essays that comprise it share the view that as he puts it our ideas and our practice must be imbued with a deep sense of ethical commitment Whether he is critiquing the market economy the state or the idea common to both capitalists and certain left materialists that human beings are motivated solely by greed and self interest Bookchin ever reminds us of the ineffable values of freedom self consciousness and social harmony Though first published in 1986 Bookchin s framework still applies The moral relativism of the 1980s the politics of lesser evils and risk vs benefit calculations has morphed into what we now refer to as both sidesism and the risk vs benefit calculations of yesterday are the 100 000 acre burn scars seen throughout the American west today Beyond moral relativism or moral absolutism is an ecologically based ethics one that sees our selfhood reason and freedom as stemming from nature s variety and resilience Bookchin s social ecology refuses to separate society from nature As such one can consider it a philosophy of participation we cannot develop ecocommunities that aren t participatory We can t save ourselves and the planet without an ethics of freedom This edition with a new introduction by Bookchin scholar Andy Price is a breath of fresh air for a left that

seems to have forgotten basic truths Controversies in Environmental Policy Sheldon Kamieniecki, Robert M.
