Drushel, Kathleen German, 2011-03-17 *The Ethics of Emerging Media* engages with enduring ethical questions while addressing critical questions concerning ethical boundaries at the forefront of new media development This collection provides a rare opportunity to ask how emerging media affect the ethical choices in our lives and the lives of people across the globe Centering on different new media forms from eBay to Wikipedia each chapter raises questions about how changing media formats affect current theoretical understanding of ethics By interrogating traditional ethical theory we can better understand the challenges to ethical decision making in an age of rapidly evolving media Each chapter focuses on a specific case within the broader conceptual fabric of ethical theory The case studies ground the discussion of ethics in practical applications while at the same time addressing moral dilemmas that have plagued us for generations The specific applications will undoubtedly continue to unfold but the ethical questions will endure The Digital Nexus Raphael

Foshay,2016-02-01 Over half a century ago in The Gutenberg Galaxy 1962 Marshall McLuhan noted that the overlap of traditional print and new electronic media like radio and television produced widespread upheaval in personal and public life Even without collision such co existence of technologies and awareness brings trauma and tension to every living person Our most ordinary and conventional attitudes seem suddenly twisted into gargoyles and grotesques Familiar institutions and associations seem at times menacing and malignant These multiple transformations which are the normal consequence of introducing new media into any society whatever need special study The trauma and tension in the daily lives of citizens as described here by McLuhan was only intensified by the arrival of digital media and the Web in the following decades The rapidly evolving digital realm held a powerful promise for creative and constructive good a promise so alluring that much of the inquiry into this new environment focused on its potential rather than its profound impact on every sphere of civic commercial and private life The totalizing scope of the combined effects of computerization and the worldwide network are the subject of the essays in The Digital Nexus a volume that responds to McLuhan s request for a special study of the tsunami like transformation of the communication landscape These critical excursions provide analysis of and insight into the way new media technologies change the workings of social engagement for personal expression social interaction and political engagement The contributors investigate the terms and conditions under which our digital society is unfolding and provide compelling arguments for the need to develop an accurate grasp of the architecture of the Web and the challenges that ubiquitous connectivity undoubtedly delivers to both public and private life Contributions by Ian Angus Maria Bakardjieva Daryl Campbell Sharone Daniel Andrew Feenberg Raphael Foshay Carolyn Guertin David J Gunkel Bob Hanke Leslie Lindballe Mark McCutcheon Roman Onufrijchuk Josipa G Petruni Peter J Smith Lorna Stefanick Karen Wall American Book Publishing Record ,2002

(Re)Inventing the Internet Andrew Feenberg,Norm Friesen,2012-03-24 Although it has been in existence for over three decades the Internet remains a contested technology Its governance and role in civic life education and entertainment are all still openly disputed and debated The issues include censorship and network control privacy and surveillance the political impact of activist blogging peer to peer file sharing the effects of video games on children and many others Media conglomerates governments and users all contribute to shaping the forms and functions of the Internet as the limits and potentialities of the technologies are tested and extended What is most surprising about the Internet is the proliferation of controversies and conflicts in which the creativity of ordinary users plays a central role The title Re Inventing the Internet refers to this extraordinary flowering of agency in a society that tends to reduce its members to passive spectators This collection presents a series of critical case studies that examine specific sites of change and contestation These cover a range of phenomena including computer gaming cultures online education surveillance and the mutual shaping of digital technologies and civic life
