**The Ecology of Reproduction in Wild and Domestic Mammals** R.M. Sadler, 2012-12-06 49 about six months to well over a year If there is only one part of the year that is favourable such as spring and early summer in the temperate climates then each species must make an evolutionary choice so to speak as to which parts of the reproductive cycle conception gestation lactation or weaning must be protected and which can come in less favourable times of the year The rhesus and langur monkeys of northern India give birth during the time of year when temperatures are hottest and wells and tanks are often dry However gestation and the later months of lactation come during the monsoon season when food and water are abundant In contrast the east African baboons give birth at the beginning of the small rains and gestation and the late part of lactation occur during the six months dry season Whether any pattern of relationship will be found to hold true for other species of primates is still not clear It may be that a wide variety of patterns have evolved depending on the lengths of gestation and lactation and the particular ecological complex in which each species or even subspecies lives pages 503 504

**Reproductive Physiology of Marsupials** C. Hugh Tyndale-Biscoe, Marilyn Renfree, 1987-01-30 The results of this compilation of new research on the reproductive physiology of marsupials reveal much about their patterns of reproduction and evolution in comparison to monotremes and eutherians

**Ecology and Reproduction of the Tasmanian Bandicoots (Perameles Gunni and Isoodon Obesulus)** George E. Heinsohn, 1966 Ecology of small mammals D.M. Stoddart, 2012-12-06 From their largely descriptive beginnings about a

half century ago studies on the ecology of small mammals have mushroomed in number scope content and complexity Yet strangely or perhaps not so strangely if one considers the extent and complexity of ecological interactions the main problems for which the early workers sought answers still defy complete analysis and basic hypotheses remain untested if not even untestable The same holds true for so many branches of animal ecology that it seems to be the complexity of the concepts that frustrates efforts rather than the subject species Like all branches of science small mammal ecology has been subject to a series of fashionable approaches one following another as technology penetrates previously impregnable regions Doubtless the future development of our science will be punctuated by wave upon wave of new endeavour in whole fields that are perhaps even yet unidentified Answers to the complex questions which ecologists ask do not come easily Increasingly though they arise in direct proportion to the efforts expended upon their elucidation Many studies have achieved such a high level of elegance in terms of manpower and apparatus that there is a feeling that questions asked when such resources are unavailable are not worth asking Nothing could be further from the truth Many a complex model has failed fully to explain the phenomenon for which it was constructed because of a lack of basic field data on the species natural history

**Australian Mammals** Stephen M. Jackson, 2025-06-02 Australian Mammals Biology and Captive Management is a complete guide to the husbandry of all groups of Australian mammals This second edition has been updated based on the latest research bringing together current knowledge of the biology and behaviour of each species in captive situations and providing guidance for hand rearing It covers advances from the last 20 years including developments in assisted breeding genetic techniques updated taxonomy and the importance of Australian mammal welfare both physical and mental Written in collaboration with experts in captive management ecology and veterinary science chapters are presented for each taxonomic group of Australian mammals Each chapter covers animal welfare natural history housing requirements general husbandry feeding requirements handling and transport health requirements behaviour breeding and artificial rearing Australian Mammals provides practical guidance for zookeepers veterinarians zoologists researchers and students

**Medicine of Australian Mammals** Larry Vogelnest, Rupert Woods, 2008-08-18 In Medicine of Australian Mammals more than 30 experts present the most current information available on the medical management of all taxa of Australian native mammals This comprehensive text is divided into two parts The first includes chapters on general topics relevant to the medical management of captive and free ranging Australian native mammals such as veterinary considerations for the rescue treatment rehabilitation and release of wildlife veterinary aspects of hand rearing orphaned marsupials marine mammal strandings and the role of the veterinarian and wildlife health investigation and necropsy of Australian mammals The second part covers the medicine of specific taxa of Australian native mammals Detailed information on taxonomy distribution biology anatomy physiology reproduction husbandry nutrition physical and chemical restraint clinical pathology hand rearing diseases zoonoses therapeutics reproductive management and surgery is included This practical one source reference is

complemented by detailed photographs and illustrations as well as tables listing reproductive and physiological data diets haematology and biochemistry values and drug formularies Appendices include a checklist of the mammals of Australia and its territories and a guide to the identification of common parasites of Australian mammals **Medicine of Australian Mammals** is clinically oriented and is a must have for veterinary clinicians no matter how experienced The book will also be of use to veterinary students researchers biologists zoologists wildlife carers and other wildlife professionals **Evolutionary Ecology of Marsupials** Anthony Kingston Lee, Andrew Cockburn, 1985-03-21 This book documents the excellent potential the study of marsupials provides for resolution of theoretical questions of general importance in biology **Australian Mammal Society**, 1988-06 **Australian Mammal Society**, 1982-12 *Current Therapy in Medicine of Australian Mammals* Larry Vogelnest, Timothy Portas, 2025-06-02 *Current Therapy in Medicine of Australian Mammals* provides up to date knowledge of Australian mammal medicine This revised edition is a companion volume to *Medicine of Australian Mammals* a text that remains relevant and current although there have been significant advances in Australian mammal medicine and surgery since its publication in 2008 Together these two texts remain the most comprehensive source of information on medicine of Australian mammals available This book is divided into two sections The first includes detailed chapters on general topics and topics relevant to multiple taxa including a new chapter on assessment triage and treatment of bushfire affected wildlife The second section provides updates of current knowledge relevant to specific taxa Each chapter is authored by Australian experts Several appendices provide useful reference data and information on clinical reference ranges recommended venipuncture sites chemical restraint agent doses and regimens a drug formulary and dental charts *Current Therapy in Medicine of Australian Mammals* is clinically oriented with an emphasis on practical content and easy to use reference material and is a must have for veterinarians students biologists zoologists wildlife carers and other wildlife professionals This volume also complements updates and utilises the resources of other books such as *Radiology of Australian Mammals* Vogelnest and Allan 2015 *Pathology of Australian Native Wildlife* Ladds 2009 *Haematology of Australian Mammals* Clark 2004 and *Australian Mammals Biology and Captive Management Second Edition* Jackson 2025 [Australian Mammal Society](#), 1989-06 *Digestive Physiology and Nutrition of Marsupials* Ian D. Hume, 1982-07-08 **Invasion Biology and Ecological Theory** Herbert H. T. Prins, Iain J. Gordon, 2014-01-23 A critical appraisal of ecosystem theory using case studies of plant and animal invasions in Australasia *Sperm Competition and Sexual Selection* Tim R. Birkhead, Anders Pape Møller, 1998-08-12 *Sperm Competition and Sexual Selection* presents the intricate ways in which sperm compete to fertilize eggs and how this has prompted reinterpretations of breeding behavior This book provides a theoretical framework for the study of sperm competition which is a central part of sexual selection It also discusses the roles of females and the relationships between paternal care in sperm competition The chapters focusing on taxonomic development are diverse and cover all the major animal groups both vertebrate and invertebrate and plants The final chapter

provides an overview discussing the relationship between sperm competition and sexual selection in terms of both function and mechanism and how these translate into species fitness This book will be of prime interest to behaviorists ecologists and evolutionary biologists suggesting new avenues of research and new ways of approaching old problems The only up to date summary of a central and popular subject Well known editors and authors Provides a theoretical framework for the study of sperm competition Covers all major animal groups Includes a chapter on plants      **Sexual Segregation in Vertebrates**

Kathleen Ruckstuhl, Peter Neuhaus, 2006-01-05 Males and females often differ in developmental patterns adult morphology ecology and behaviour and in many mammals males are often larger Size dimorphism results in divergent nutritional and energetic requirements or reproductive strategies by the sexes which in turn sometimes causes them to select different forage use different habitats and express differing social affinities Such divergent life styles often lead males and females to live large parts of their lives separately Sexual segregation is widespread in animals Males and females may share the same habitat but at different times for example or they might use different habitats entirely Why did sexual segregation evolve and what factors contribute to it Sexual Segregation in Vertebrates explores these questions by looking at a wide range of vertebrates and is aimed as a synthesis of our current understanding and a guide for future research      *Life of Marsupials*

C. Hugh Tyndale-Biscoe, 2005 In *Life of Marsupials* one of the world s leading experts explores the biology and evolution of this unusual group with their extraordinary diversity of forms around the world in Australia New Guinea and South America back cover      **Australian Journal of Zoology** ,2007      **Australian Mammal Society** ,1974-10      *Endangered Species Recovery* Tim Clark, Richard Reading, Alice Clarke, 1994-10 *Endangered Species Recovery* presents case studies of prominent species recovery programs in an attempt to explore and analyze their successes failures and problems and to begin to find ways of improving the process It is the first effort to engage social scientists as well as biologists in a wide ranging analysis and discussion of endangered species conservation and provides valuable insight into the policy and implementation framework of species recovery programs The book features a unique integration of case studies with theory and provides sound practical ideas for improving endangered species policy implementation
