Ecology Of The Wye:

The ecology of the Wye R.W. Edwards, M.P. Brooker, 2012-12-06 The valley of the River Wye has long been famed for its natural beauty and the salmon stocks which the river supports As one of the largest substantially unpolluted rivers in Southern Britain the Wye which rises in Wales and flows into England is now of considerable significance in the strategy for conservation of freshwater habitats in the United Kingdom and is designated as a Site of Special Scientific Interest by the Nature Conservancy Council N C C However despite this scientific importance published studies of the aquatic ecology of the river during the earlier decades of this century were principally restricted to the excellent series of articles and books on the salmon written by J A Hutton during the period 1912-47 and scattered records of the plants of the river banks During this period the Fishery Board and successive organisations responsible for fisheries also published reports describing general water quality and salmon catch statistics In 1970 a survey was undertaken by the N C C which provided the basis for the decision to give it special protected status The Wye has been exploited as a major water source for Birmingham through the development of reservoirs in the Elan Valley since 1904 Further development of the capacity of the Elan catchment occurred in 1952 with the completion of the Claerwen Reservoir

Planning and Ecology R. D. Roberts, T. M. Roberts, 2013-11-11 Professional planning is commonly defined as an activity which is concerned with the rational allocation or exploitation of resources for man's maximum short and long term benefit The science of ecology is the study of the basic components of these resources soil water air etc and their inter relationships with living organisms Planning and ecology therefore have many common interests and as such have long been associated in resource management This association was for example reflected as early as the 19th century in the writings of Patrick Geddes the progenitor of modern town planning whose training as a biologist led him to re-interpret the phenomena of urbanization in ecological terms Geddes 1886 Since the time of Geddes the place of ecology has declined in planning circles as other professions and considerations initially public health and engineering latterly economic and sociological have become more central The reasons for this shifting emphasis are three fold First they reflect changing social attitudes and aspirations in the post war period Secondly many other professions and persuasions agriculturalists foresters industrialists etc became organized as pressure groups and helped shape public attitudes and governmental actions Thirdly and by far the most important reason is the prevalence of misconceptions about ecology Too many people perhaps misled by the debate surrounding the environmental movement equate ecology with conservation In reality conservation is but one component part of ecology

Ecological Diversity and Its Measurement Anne E. Magurran, 2013-04-17 Although diversity is one of the central themes of ecology there is considerable disagreement about how it should be measured I first encountered this problem 10 years ago when I started my research career and spent a long time pouring over the literature in order to find the most useful techniques The intervening decade has seen a further increase in the number of papers devoted to the topic of ecological diversity but has led to no consensus on how it should be

measured My aim in writing this book is therefore to provide a practical guide to ecological diversity and its measurement In a quantitative subject such as the measurement of diversity it is inevitable that some mathematics are involved but at all times these are kept as simple as possible and the emphasis is constantly on ecological reality and practical application I hope that others entering the fascinating field of ecological diversity will find it helpful This book grew out of my work in The School of Biological and Environmental Studies at the New University of Ulster Coleraine Northern Ireland I am indebted to all the ecologists there for providing a stimulating atmosphere Foremost among these were Amyan Macfadyen and Palmer Newbould A number of the figures and tables in the book are based on data collected in Northern Irish woodlands

The Ecology of Regulated Streams James Ward, 2013-06-29 The idea for an international symposium on regulated streams was conceived over an open faced sandwich at the R these funds permitted intellectual exchange between scientists from eight countries on four continents We extend personal thanks to Dr K W Stewart President of NABS and the NABS Program Committee including Drs E C Masteller E R Brezina and W P Kovalak These individuals and other officers and members of the Executive Committee assisted us with the many details leading to organization and staging of a scientific forum Discussions with Dr John Cairns Jr and Dr G Richard Marzolf during the early planning stage were most helpful

Principles and Methods in Landscape Ecology A. Farina, 2013-04-17 Currently considered a bridge between basic and applied ecology landscape ecology occupies an old one consists of developing new research and important new niche in ecology representing a new the other in developing a good educational framework in the galaxy of the ecological sciences work Both are important and not in conflict In this However the broad spectrum of conceptual and spirit I have prepared this book with the aim of methodological approaches has created a non summarizing the best theories concepts principles focused science strongly influenced by the more and methods in landscape ecology It is an attempt dominant disciplines such as landscape planning to reinforce the ecological research perspective to and restoration forest management landscape consolidate principles and methods validate process architecture etc and reconcile different positions including The uncertain position of landscape ecology the geobotanical animal and human perspectives among the ecological disciplines is in contradiction The concept is very simple I have no ambition with the general recognition that landscape is a space to present new ideas and theories I have worked to that dimension in which important ecological create a tool mainly for classroom use but also processes occur and landscape is becoming very appealing to a broad range of scientists and practitioners popular in many ecology related fields from plant ecologists dealing with landscape ecology and its disease to animal behaviour problems

Dufour, Etienne Prevost, Eric Rochard, Patrick Williot, 2008-08-24 Most of the diadromous fish of the world have decreased in distribution and abundance since the beginning of the twentieth century They are now threatened and important conservation issues arise The causes of these trends vary among species and basins but regional human impact damming pollution fisheries and global change climate are suspected to be responsible for these difficulties This book contains selected papers from an international symposium organised by the Diadfish network held in Bordeaux France in 2005 Readers will find up to date information on the ecology ecotoxicology and physiology of several diadromous species Atlantic salmon shads lampreys eels and this whole group in Europe Main impacts are also documented and analysed in case studies and solutions or remediation actions are presented Stream Ecology J. human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents
