The Nature of Church Camp Christopher W. Anderson, 2023-12-18 The Nature of Church Camp An Environmental History of Outdoor Ministry 1945-1980 by Christopher W Anderson explores the mid twentieth century history of religious camps and retreat centers to provide new insights into the history of environmentalism in the United States Ecumenical Protestantism and the ecology movement both changed the calculus of American morality after World War II Through archival material case study visits and oral histories Anderson finds that these institutions often reacted to ecological critiques with temperate but gradual reforms However camps and outdoor ministries by virtue of their natural settings and sizable acreage soon provided a new way to explore the history of spirituality and ecology moving away from the conference campus and using nostalgia for the frontier instead to make arguments about the meaning of the American nation and the value of democracy This new way of thinking was reflected throughout the camps and enthusiastically endorsed decentralized small group camping By examining the conduct of church camps and conferences before during and after the ecological era Anderson shows how environmental stewardship became the dominant paradigm for Protestant environmentalism why that is a flawed and fractious model and why it has stalled

Ecology of Fear Mike Davis, 2022-02-15 A witty and engrossing look at Los Angeles urban ecology and the city s place in America s cultural fantasies Earthquakes Wildfires Floods Drought Tornadoes Snakes in the sea mountain lions and a plague of bees In this controversial tour de force of scholarship unsparing vision and inspired writing Mike Davis the author of City of Quartz revisits Los Angeles as a Book of the Apocalypse theme park By brilliantly juxtaposing L A s fragile natural ecology with its disastrous environmental and social history he compellingly shows a city deliberately put in harm s way by land developers builders and politicians even as the incalculable toll of inevitable future catastrophe continues to accumulate

Counterpointing L A s central role in America s fantasy life the city has been destroyed no less than 138 times in novels and films since 1909 with its wanton denial of its own real history Davis creates a revelatory kaleidoscope of American fact imagery and sensibility Drawing upon a vast array of sources Ecology of Fear meticulously captures the nation s violent malaise and desperate social unease at the millennial end of the American century With savagely entertaining wit and compassionate rage this book conducts a devastating reconnaissance of our all too likely urban future

The Ecology of Tomorrow's World John Elkington,1980 **Urban Ecology** Philip James,Ian Douglas,2014-10-30 Urban Ecology An Introduction seeks to open the reader s mind and eyes to the way in which nature permeates everyday urban living and how it has to be understood cared for and managed in order to make our towns and cities healthier places to visit and in which to live and work The authors examine how nature can improve our physical and mental health the air we breathe and the waters we use as well as boosting our enjoyment of parks and gardens Urban Ecology sets out the science that underlies the changing natural scene and the tools used to ensure that cities become both capable of adapting to climate change and more beautiful and resilient The book begins with a discussion of the nature of urban places and the role of nature in towns and cities Part 1 looks at the context and content of urban ecology its relationship to other foci of interest within ecology and other environmental sciences and the character of city landscapes and ecosystems In Part 2 the authors set out the physical and chemical components of urban ecosystems and ecological processes including urban weather and climate urban geomorphology and soils urban hydrology and urban biogeochemical cycles In Part 3 urban habitats urban flora and fauna and the effects of deliberate and inadvertent human action on urban biota are examined Part 4 contains an exploration of the identification and assessment of ecosystem services in urban areas emphasising economic evaluation the importance of urban nature for human health and well being and restoration ecology and creative conservation Finally in Part 5 the tasks for urban ecologists in optimising and sustaining urban ecosystems providing for nature in cities adapting to climate change and in developing the urban future in a more sustainable manner are set out Within the 16 chapters of the book in which examples from around the world are drawn upon the authors explore current practice and future alternatives set out procedures for ecological assessment and evaluation suggest student activities and discussion topics provide recommended reading and an extensive bibliography The book contains more than 150 tables and over 150 photographs and diagrams

Tickling Sharks John Elkington,2024-04-09 Speaking Tomorrow s Truth to Power Sustainability is going mainstream but where did the story start For decades the traditional capitalist business model required growth at all costs Business as usual guaranteed unsustainability Now in contrast we see growing adoption of greener practices but where did these ideas come from and where are the linked movements headed Drawing on a half century of experience since the early seventies Godfather of Sustainability John Elkington explains how a series of societal pressure waves have helped to transform business markets and ultimately capitalism He explains how he came to tickle the human sharks of the corporate world

encouraging them to embrace once unthinkable ways of addressing new social economic environmental and governance priorities John s candid memoir tracks his colorful journey through youthful misadventures and inspirations to his pioneering work making business sense of sustainability Written in a knowledgeable thoughtful and humorous voice this witness statement explains and criticizes progress to date before sketching a manifesto for those determined to make the global economy more responsible more resilient and crucially more regenerative

Ecology addresses environmental issues which Innis was concerned with from a contemporary political economy perspective They explore a wide range of themes and issues including sustainability risk and regulation population growth planetary management impact of humanity on environment role of technology and communication Case studies provide further insight into issues such as industrial racism women and development and collective action by highlighting ethical and political questions and providing critical insights into the issues and debates in political ecology

The South, the North, and the Environment Peter Calvert,Susan Calvert,1999-01-01 Six years after the Rio Summit the international politics of the environment have already become bogged down in a dispute between Southern and Northern states as to who if anyone is responsible for environmental degradation Meanwhile the scientific evidence continues to accumulate and shows that continuing and possibly irreversible changes are already well advanced The purpose of this book is to give a clear overview of the environmental politics of the South in each of the key problem areas drawing on first hand experience of five continents The conclusion reviews the overall situation discusses South North relations and examines both optimistic and pessimistic scenarios for the future Book jacket

Prometheus and Gaia Harrison Fluss,Landon Frim,2022-02-01 Prometheus and Gaia examines the ideological positions of Futurism and Eco Pessimism While these are rarely spoken about in mainstream discourse they do have strong resonances in today s popular politics and culture In light of existential threats posed by climate change disruptive technologies and economic crises many have grown weary of the small fixes offered by mainstream policy makers Radical change thus appears necessary as Futurism and Eco Pessimism emerge as two fundamental challenges to the status quo The Futurist claims that the current dynamism of technology is incompatible with human limitations while the Eco Pessimist sees the climate crisis as symptomatic of a broader human domination over nature What these seemingly opposite currents have in common is a shared rejection of the human frame as grounding politics each seeks to subordinate the human in favor of a wholly alien other either in the form of an anarchic nature or a dynamic technology To transcend this strange coincidence of opposites Prometheus and Gaia makes the positive case for a humanism that is rationalist without being anthropocentric
