Ecology Of War And Peace Counting Costs Of Conflict:

Ecology of War & Peace Tom H. Hastings, 2000 How do mobilization for war and the actual war effort affect the environment How do ecological conditions encourage war What are possible non violent solutions to the ecological conflict dynamic Ecology of War Peace attempts to answer these questions in readable prose with an unapologetic bias toward non violence

Critical Environmental Politics Carl Death, 2013-12-04 The aim of this book is to review central concepts in the study of environmental politics and to open up new questions problems and research agendas in the field The volume does so by drawing on a wide range of approaches from critical theory to poststructuralism and spanning disciplines including international relations geography sociology history philosophy anthropology and political science The 28 chapters cover a range of global and local studies illustrations and cases These range from the Cochabamba conference in Bolivia to climate camps in the UK UN summits in Rio de Janeiro and Johannesburg to climate migrants from Pacific islands forests in Indonesia to Dutch energy governance reform indigenous communities in Namibia to oil extraction in the Niger Delta survivalist militias in the USA to Maasai tribesmen in Kenya Rather than following a regional or issue based e g water forests pollution etc structure the volume is organised in terms of key concepts in the field including those which have been central to the social sciences for a long time such as citizenship commodification consumption feminism justice movements science security the state summits and technology those which have been at the heart of environmental politics for many years including biodiversity climate change conservation eco centrism limits localism resources sacrifice and sustainability and many which have been introduced to these literatures and debates more recently biopolitics governance governmentality hybridity posthumanism risk and vulnerability Features and benefits of the book Explains the most important concepts and theories in environmental politics Reviews the core ideas behind crucial debates in environmental politics Highlights the key thinkers both classic and contemporary for studying environmental politics Provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics Each chapter is written by leading international authors in their field This exciting new volume will be essential textbook reading for all students of environmental politics as well as provocatively presenting the field in a different light for more established researchers

Power Tom H. Hastings, 2005-12-12 In Power Tom Hastings unpacks the methods and considers causes and correlatives to violence and nonviolence Hastings presents an overview of nonviolent power potential examining it on personal community and transnational levels He provides evidence of theories and historical records of nonviolent power through personal stories and the annals of human kind Nonviolent alternatives are proposed and considered

Environmental Change and Security Project Report , 2001 Socio-Cultural and Religious Conflicts and the Future of Nigeria Lotanna Olisaemeka, 2022-12-10 With the prevailing violent conflict situation of our world perpetuated sometimes even in the name of religion humanity today faces extinction To reverse this ugly trend humanity has no choice than to build

a society where every tribe and tongue can coexist in peace This work analyzed the violent conflicts from anthropological behavioral politico philosophical and theological perspectives and makes a demand on humanity to save herself through proper education and dialogue with all men and religions Lotanna Olisaemeka is a researcher in Missiology affiliated with the Philosophisch Theologische Hochschule Vallendar Germany

Scarred Landscapes C. Pearson, 2008-10-31 Based on detailed archival research and site visits *Scarred Landscapes* is the first environmental history of Vichy France From mountains and marshlands to foresters and resisters it examines the intricate and often surprising connections between war history and the natural environment during these turbulent years

The Planetary Emergency Kent D. Shifferd, 2021-02-02 Earth and its inhabitants face an unprecedented crisis the human caused destruction of the planet's life support systems Deteriorating climate bringing super storms mass forest fires melting glaciers droughts extreme heat and rising seas a decline in food production soil loss water pollution and declining fisheries all threaten the future of life on earth with a looming extinction event not seen for 60 million years Beginning in the 17th century we developed a civilization based on radical materialism exploitation of natural resources and the myth of endless economic growth For all its technological wonders this hypercivilization has proven unsustainable This book explores ways we can create an ecocivilization compatible with the laws and limits of nature a new way of living already developing with new technologies new forms of social organization and a new story about ourselves and the Earth

Militarized Landscapes Chris Pearson, Peter Coates, Tim Cole, 2010-06-03 The black smoke billowing from burning oil wells during the Gulf War of 1990-91 directed media and public attention towards war's devastating environmental impact Yet even before the first bomb is dropped preparation for warfare materially and imaginatively reshapes rural landscapes and environments This volume is the first to explore the comparative histories and geographies of militarized landscapes Moving beyond the narrow definition of militarized landscapes as theatres of war it treats them as simultaneously material and cultural sites that have been partially or fully mobilized to achieve military aims Ranging from the Korean DMZ to nuclear testing sites in the American West and from Gettysburg to Salisbury Plain *Militarized Landscapes* focuses on these often secretive hidden dangerous and invariably controversial sites that occupy huge swathes of national territories

Mobilizing nature Chris Pearson, 2017-10-03 *Mobilizing nature* traces the environmental history of war and militarisation in France from the creation of Châlons Camp in 1857 to military environmentalist policies in the twentieth century It offers a fresh perspective on the well known histories of the Franco-Prussian War Western Front 1914-18 Second World War Cold War and the anti base campaign at Larzac whilst uncovering the largely hidden history of the numerous military bases and other installations that pepper the French countryside *Mobilising nature* argues that the history of war and militarisation can only be fully understood if human and environmental histories are considered in tandem Preparing for and conducting wars were only made possible through the active manipulation and mobilisation of topographies climatic conditions vegetation and animals But the military has not

monopolised the mobilisation of nature Protesters against militarisation have consistently drawn on images of peaceful and productive civilian environments as the preferable alternative to destructive tanks and bombs Written in an accessible style Mobilizing nature will appeal to readers interested in modern France environmental history military geographies and histories anti military protests and environmentalism **Violence, Nonviolence, and Moral Worth** Sanjay Lal, 2024-09-11 Given the ubiquity of violence in our world the ever present call to renounce violence has the understandable tendency to ring hollow to many of us There is no shortage of evidence showing that we really don't oppose violence as much as we claim to By conceptually analyzing the terms violence and nonviolence as well as by offering palpable readings of Gandhi's thought and discussing how we can better identify with others Violence Nonviolence and Moral Worth offers insight into how we can begin reducing the gap between our professed reverence for nonviolence and our everyday practices Sanjay Lal argues that neither our inability to perfectly uphold nonviolent practice nor the reality that moral worth is often exhibited through acts of violence should be an obstacle to affirming the value of a more comprehensive ethic of nonviolence Peace theorists activists and anyone interested in a less violence filled existence will find much to take away from this work Security and Environment in the Mediterranean Hans Günter Brauch, 2003 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO's Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century **Environmental Security and Gender** Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights

into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

A Global Security System: An Alternative to War Kent Shifferd, Patrick Hiller, David Swanson, 2018-06-12 GSS is World Beyond War's effort to describe an alternative security system one in which peace is pursued by peaceful means to replace the present war system It describes the hardware of creating a peace system and the software the values and concepts necessary to operate a peace system and the means to spread these globally Key sections include Why is an Alternative Global Security System both Desirable and Necessary Why we Think a Peace System is Possible Common Security Demilitarizing Security Managing International and Civil Conflicts International Non government Organizations The Role of Global Civil Society Creating a Culture of Peace Accelerating The Transition To An Alternative Security System This report is based on the work of many experts in international relations peacebuilding and peace studies and on the experience of many activists This 3rd edition reflects new thinking and insights as well as the feedback from readers and partners This is not just another report but a living document that we will continually seek to improve New in this edition is an analysis of Trump's foreign policy agenda updated and new data on peace economics and military spending and new or updated sections including the business of peacebuilding demilitarizing security multi track diplomacy framework to peacemaking and many other additions

The Lessons of Nonviolence Tom H. Hastings, 2015-01-09 Beginning back in the waning days of the Civil Rights movement through the objection to the war in Vietnam and on to the current global peace movement this is a personal and professional account offered for the reader curious about whether and how nonviolence works Topics include Gandhian nonviolence radical disarmament war poverty and peace prosperity and movement building

A New Era of Nonviolence Tom H. Hastings, 2014-06-06 This book is an exploration of nonviolent strategies and tactics that have been used to prevent and end civil wars invasions and occupations The problem of war is examined in light of efforts to transform destructive conflict into constructive conflict Research into alternatives has produced a corpus of knowledge that enables civil society increasingly to expect success when it engages decision makers in peaceful conflict resolution The book asks the reader to consider the questions of social conflict using a cost benefit analysis which can reveal the advisability of strategic nonviolence Research into the causes and correlates of war is robust and when that research is applied to comparisons of conflict management methods numerous conclusions about potential strategies for ending war emerge

Nonviolent Response to Terrorism Tom H. Hastings, 2004-07-15 Terrorism which by definition targets civilians is unacceptable but a violent response to violence

usually causes more violence This book outlines some of the best thinking about nonviolent methods of resisting terrorism in the growing fields of international aid and nonviolent interposition The first section covers immediate nonviolent response to terrorism international negotiations mediations and adjudication UN and citizen sanctions cross cultural communication citizen initiatives international treaties and the World Court the International Criminal Court and nonviolent resistance through raising consciousness to mobilization and resisting state sponsored terror The second section on long term non violent response to terrorism discusses halting arms trade and militarism stopping arms flow to terrorists defunding the military building sustainable just economies aid to the poor reducing privileged overconsumption peace and conflict education understanding and using the media refugee repatriation and helping indigenous liberation struggles Instructors considering this book for use in a course may request an examination copy here **Toward a Nonkilling Paradigm** Joám Evans Pim,2009 The present volume brings together 24 authors and 14 disciplines including anthropology arts biology economics engineering geography health sciences history linguistics mathematics philosophy physics psychology and sociology to seriously consider the prospects for the realization of nonkilling societies and to challenge each discipline s role in the necessary social and scientific transformation toward a killing free world Pub **Nonviolence** Senthil Ram,Ralph Summy,2008 The so called war on terror has gone badly for the West playing directly into the strategy of al Qa ida and the rest of the terrorist network Why did this happen Were there other approaches that might have been implemented with better prospects of success This edited collection of perspectives on the non violent counter to terrorism opens the topic to serious consideration The development of a non violent paradigm brings into sharp focus the deficiencies of present thinking and paves the way for comprehending how non violence might overcome those deficiencies and introduce viable alternatives Since there is a general ignorance about the history theory and operational dynamics of non violence these aspects are featured throughout the book and related to the special case of terrorism To understand empathetically the background and mind set of the opponent without condoning his actions to study his culture to avoid the strategic trap he has set to examine the different gender reactions of a Muslim Society to differentiate between non violent Islam and Islamic Terrorism to jettison the misinformed baggage we carry about violence to appreciate the positive role education and aesthetics can play and to investigate ways in which a non violent counter to terrorism might be staged including a Gandhian response These are just some of the tasks that the contributors have collectively pursued Their ideas excitingly open up a whole new set of possibilities for a more peaceful world **Meek Ain't Weak** Tom H. Hastings,2002 Meek Ain t Weak is a fresh examination of the indigenous roots of mass liberatory nonviolence From African regions to South American culture from Asian worldviews to the wisdom of the ancients of the subcontinent the origins of nonviolent conduct in conflict are both important and ignored [The Influence of Globalization on Ecological Literacy in Japan](#) John Esposito,2006-08-30 Globalization understood as an intensification of modernism has over the past fifty years been a powerful force for cultural change This

study examines how one aspect of globalization Hollywood films influences Japanese thinking as regards to human nature relationships A critical discourse analysis of the most popular cinematic texts in Japan during a five year period 1997_2001 uncovers the latent ideologies and messages linked to a modern worldview This interdisciplinary work evaluates the influence of these films by way of a descriptive survey of Japanese culture data from a university student focus group and an analysis of linguistic behavioral and attitudinal changes toward environmental issues A holistic approach to curricular reform that grounds ecological principles in traditional perceptions of nature is proffered as a way of countering exogenous influences while restoring a sense of balance to the culture ecosystem
