E-Commerce Law in Europe and the USA Gerald Spindler,Fritjof Börner,2013-03-19 New economic developments such as E Commerce raise not only economic but also legal questions Most of these questions are treated in a different way by the jurisdictions or have not been regulated so far Companies are facing a material uncertainty with regard to international transactions which are typical of E Commerce The European and national regulations which have already been adopted are only for some part leading to clarification The possibilities for legal solutions as well as the interpretation of the new legislation differ within the separate countries and their Courts In order to provide an overview of the most important legal issues of E Commerce for international entities and internationally practising consultants this book describes the regulatory framework in nine European countries Belgium France Germany Great Britain Italy Norway Spain Switzerland The Nether lands and the United States of America The country specific contributions are presented in alphabetical order and fol low a questionnaire which can be found in the beginning As the structure in all contributions is uniform the reader can fmd an answer to a legal question of inte rest quickly and clearly arranged for all countries The work is not aiming at an extensive discussion of each legal question Moreover the goal is to present an overview of the main questions and trends in E Commerce Law in particular with regard to the adoption of several EU Directives

E-Commerce Law in Europe and the USA Gerald Spindler,Fritjof Börner,2012-11-28 This unique text deals with the most important legal areas for e commerce related business in most of the member states in Europe as well as the USA Topics that are dealt with include contract law consumer protection intellectual property law unfair competition antitrust law liability of providers money transactions privacy and data protection

E-commerce Law and Practice in Europe Ian Walden,Julia Hörnle,2001-04-27 With the massive explosion of e commerce and especially the use of the Internet as a transnational and instant medium for business transactions has come a whole range of new laws and regulations and inevitably a minefield of accompanying uncertainties and potential pitfalls So what exactly are the legal issues companies need to address and what are their implications in real terms for the business world Find the answers in this groundbreaking study undertaken for the European Commission within the framework of the ECLIP project With a brief to provide practical help for businesses and e commerce initiatives this series of cutting edge reviews examines and evaluates the special rules designed to regulate the Internet both at a European and at national level in the Member States It also explains the relevant technological developments and evaluates them against the legal background This is an essential guide for legal and corporate practitioners alike as well as software developers and the consultancy community

internationally A publication of the ECLIP network **Access to Justice in Transnational B2C E-Commerce** Sutatip Yuthayotin, 2014-11-17 This book identifies institutional mechanisms that can be used to promote consumer confidence in direct online sales with businesses B2C e commerce It argues that enhancing the access to justice in a multidimensional sense can potentially offer an effective means of boosting consumer confidence It introduces a conceptual framework for a multidimensional approach to access to justice in the context of consumer protection describing the various reasonable criteria needed to satisfy consumer demands in B2C e commerce The framework which reflects all essential aspects of consumers expectations when they engage in online transactions provides a benchmark for the evaluation of various consumer protection mechanisms Based on an analysis of different mechanisms and using the framework s criteria the practice of private ordering which does not rely on the creation of rules of law but rather on the use of technology as a solution appears to offer a meaningful way to enhance access to justice in B2C e commerce However though private ordering holds considerable potential certain weaknesses still need to be eliminated This book demonstrates how private ordering can be successfully implemented with the help of an intermediary a neutral third party that plays an integral part in the collaborative task of facilitating various aspects of private ordering thus helping to limit the risks of failure and ensuring a fairer market setting In order to move forward it argues that the state with its wealth of material resources and incentive options is the institution best suited to acting as an intermediary in facilitating private ordering This promising proposal can improve consumer protection which will in turn boost consumer confidence **E-Commerce Law Around the World: a**
