importance to everyone This book represents a unique exploration of the demographic spatial economic and social aspects of China s urban transformation Based on years of fieldwork and data analysis from different types of cities and towns in every region of China the authors present a detailed description of how China has urbanized since 1978 and an original theory about the way in which top down and bottom up policies have impacted urbanization They describe China s on going urbanization process as a double dual transformation from a planned economy to a more market oriented one and from a concern with the quantity to the quality of urbanization In doing so the authors provide the most comprehensive and up to date book on Chinese urbanization to date This scholarly study will appeal to academics and practitioners including professors and postgraduate students of urban studies planning geography Asian studies and other social science disciplines and professional fields concerned with cities and urban development Professionals involved in international development

particularly in China and elsewhere in Asia will be particularly interested in the book [OECD Economic Surveys: China 2010](#) OECD,2010-02-02 This 2010 edition of OECD's periodic review of China's economy finds that China's spectacular expansion has continued in recent years making for impressive improvements in living standards The slowdown associated with the global financial and [No Great Wall](#) Felix Boecking,2020-05-11 This book an in depth study of Nationalist tariff policy fundamentally challenges the widely accepted idea that the key to the Communist seizure of power in China lay in the incompetence of Chiang Kai shek's Nationalist government It argues instead that during the second Sino Japanese War China's international trade the Nationalist government's tariff revenues and hence its fiscal policy and state making project all collapsed Because tariffs on China's international trade produced the single greatest share of central government revenue during the Nanjing decade the political existence of the Nationalist government depended on tariff revenue Therefore Chinese economic nationalism both at the official and popular levels had to be managed carefully so as not to jeopardize the Nationalist government's income Until the outbreak of war in 1937 the Nationalists management of international trade and China's government finances was largely successful in terms of producing increasing and sustainable revenues Within the first year of war however the Nationalists lost territories producing 80 percent of tariff revenue Hence government revenue declined just as war related expenditure increased and the Nationalist government had to resort to more rapacious forms of revenue extraction a decision that had disastrous consequences for both its finances and its political viability [After Tamerlane](#) John Darwin,2010-08-08 Tamerlane the Ottomans the Mughals the Manchus the British the Japanese the Nazis and the Soviets All built empires meant to last forever all were to fail But as John Darwin shows in this magisterial book their empire building created the world we know today From the death of Tamerlane in 1405 to America's rise to world hyperpower to the resurgence of China and India as global economic powers After Tamerlane is a grand historical narrative that offers a new perspective on the past present and future of empires [The Oxford Handbook of Africa and Economics](#) Célestin Monga,Justin Yifu Lin,2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative
