Philanthropy and the Business Corporation Marion R. Fremont-Smith, 1972-11-30 Attempts to study corporation philanthropy inevitably prove frustrating for it is a subject surrounded by rhetoric and almost entirely devoid of hard facts Marion R Fremont Smith s concise appraisal of corporation philanthropy takes a close look at the donative policies of corporations and their methods of giving Concentrating on the legal and historical setting as well as corporation philanthropy in practice the author analyzes recent expansion in the field of traditional philanthropy and the accompanying shift in public attitude toward the responsibility of business corporations The book shows how this new attitude has brought with it a reappraisal of the philosophical and legal bases for corporate action in the social sphere In conclusion Mrs Fremont Smith calls for a more imaginative and independent definition of the objectives of corporate philanthropic policies and not merely a continuing series of ill considered defensive reactions

Federal Tax Policy and Charitable Giving Charles T. Clotfelter, 2007-12-01 The United States is distinctive among Western countries in its reliance on nonprofit institutions to perform major social functions This reliance is rooted in American history and is fostered by federal tax provisions for charitable giving In this study Charles T Clotfelter demonstrates that changes in tax policy effected through legislation or inflation can have a significant impact on the level and composition of giving Clotfelter focuses on empirical analysis of the effects of tax policy on charitable giving in four major areas individual contributions volunteering corporate giving and

charitable bequests For each area discussions of economic theory and relevant tax law precede a review of the data and methodology used in econometric studies of charitable giving In addition new econometric analyses are presented as well as empirical data on the effect of taxes on foundations While taxes are not the most important determinant of contributions the results of the analyses presented here suggest that charitable deductions as well as tax rates and other aspects of the tax system are significant factors in determining the size and distribution of charitable giving This work is a model for policy oriented research efforts but it also supplies a major and very timely addition to the evidence that must inform future proposals for tax reform
