compares different approaches to urban development in Singapore and Seoul over the past decades by focusing on community participation in the transformation of neighbourhoods and its impact on the built environment and communal life. Singapore and Seoul are known for their rapid economic growth and urbanisation under a strong control of developmental state in the past. However, these cities are at a critical crossroads of societal transformation where participatory and community based urban development is gaining importance. This new approach can be seen as a result of a changing relationship between the state and civil society where an emerging partnership between both aims to overcome the limitations of earlier urban development. The book draws attention to the possibilities and challenges that these cities face while moving towards a more inclusive and socially sustainable post developmental urbanisation. By applying a comparative perspective to understand the evolving urban paradigms in Singapore and Seoul, this unique and timely book offers insights for scholars, professionals and students interested in contemporary Asian urbanisation and its future trajectories.

Misery beneath the Miracle in East Asia Arvid J. Lukauskas, Yumiko Shimabukuro, 2024-12-15. *Misery beneath the Miracle in East Asia* challenges prevailing views of the East Asian economic miracle. Existing scholarship has overlooked the severity, persistence and harmful consequences of the social welfare crises affecting the region. Arvid J. Lukauskas and Yumiko Shimabukuro fill this gap and put a major asterisk on East Asia's economic record. Combining big picture analysis, abundant data, a dynamic interdisciplinary framework and powerful human stories, they shed light on the social ills that governments have failed to address adequately, including low wages, child abuse, elderly poverty and substandard housing. One of the major forces behind the multidimensional welfare crises is the region's productivist welfare strategy which prioritizes economic growth while abandoning a robust social safety net, leaving the most vulnerable segments of society largely unprotected. *Misery beneath the Miracle in East Asia* brings the region into debates over the dangers of seeking growth at all costs that are currently embroiling the United States and other advanced industrialized countries.

The Process of Economic Development James M. Cypher, James L. Dietz, 2004. This textbook includes discussions of such topics as the environment, the debt case, export led industrialization, import substitution, industrialization, growth theory and technological capability.

Pacific Affairs, 1998. **Demographic Change and Housing Wealth:** John Doling, Marja Elsinga, 2012-08-11. Across the EU, populations are shrinking and ageing. An increasing burden is being placed on a smaller working population to generate the taxes required for pensions and care costs. Welfare states are weakening in many countries and across Europe, households are being increasingly expected to plan for their retirement and future care needs within this risky environment. At the same time, the proportion of people buying their own home in most countries has risen so that some two thirds of European households now own their homes. Housing equity now considerably exceeds total European GDP. This book discusses questions like to what extent might home ownership provide a potential cure for some of the consequences of ageing populations by realizing housing equity in order to meet the consumption needs of older people. What does this mean?

for patterns of inheritance and longer term inequalities across Europe And to what extent are governments banking on their citizens utilising their housing wealth now and in the future *De Gruyter Handbook of Contemporary Welfare States* Bent Greve,2022-09-06 Globalisation regionalisation new technology demography voters expectations and re structuring of societies are expected to influence welfare state development for years to come This handbook analyses how different welfare state models and regimes will be able to cope with contemporary and future challenges providing a variety of evidence based tools that make it essential reading for students researchers and policy makers alike *The Management Of Success* Kernial Singh Sandhu,Paul Wheatley,Kernial Singh Sandhu (A),2019-06-19 A collection of analytical reflections on how the island of Singapore has been transformed from a colony in a crumbling empire into a thriving modern secular independent republic These are the results of a five year project by the Institute of Southeast Asian Studies
