Telecommunications Reform in the Asia-Pacific Region Allan Brown, Moazzem Hossain, Duc-Tho Nguyen, 2005-02-24 This book attempts to draw lessons from the experiences of developed as well as developing countries in carrying out telecommunications reform Contributors come from academia as well as from stakeholders in telecommunications policy in a dozen countries mostly in the Asia Pacific region Globally the telecommunications industry is undergoing major changes technological advances in the form of a vast number of new digitised services ownership shifts as state owned carriers in many countries become fully or partly privatized and a general transition from monopolistic to more competitive market environments The economic and regulatory experiences derived from these changes are explored and analyzed using the USA the UK Australia and Singapore to represent developed and newly industrialized countries and China India Indonesia Malaysia the Philippines Sri Lanka Thailand and Vietnam as examples of developing countries The conclusions outlined in this timely volume hold important lessons for these as well as for other countries

The Political Economy of Capital Market Reforms in Southeast Asia X. Zhang, 2011-09-13 In this book Xiaoke Zhang addresses two fundamental political and policy questions why do politicians have heterogeneous incentives to pursue public regarding policies through capital market reforms and why do they differ in their abilities to initiate and implement market reform policies decisively and resolutely

The IMF and Economic Development James Raymond Vreeland, 2003-03-03 Why do governments turn to the International Monetary Fund IMF and with what effects This book argues that governments enter IMF programs for economic and political reasons and finds that the effects are negative on economic growth and income distribution By bringing in the IMF governments gain political leverage via conditionality to push through unpopular policies Note that if governments desiring conditions are more likely to participate estimating program effects is not straightforward one must control for the potentially unobserved political determinants of selection This book addresses the selection problem using a dynamic bivariate version of the Heckman model analyzing cross national time series data The main finding is that the negative effects of IMF programs on economic growth are mitigated for certain constituencies since programs also have distributional consequences But IMF programs doubly hurt the least well off in society they lower growth and shift the income distribution upward

The Oxford Handbook of the Politics of Development Carol Lancaster, Nicolas van de Walle, 2018-05-01 In many discussions of nations development we often focus on their economic and social development Is it becoming wealthier Is its society modernizing Is it becoming more technologically sophisticated Are social outcomes improving for the broad mass of the public The process of development policy implementation however is always and inevitably political Put simply regime type matters when it comes to deciding

on a course of development to follow Further political institutions matter When a government's institutional capacity is low the chances of success severely decline regardless of the merits of the development plan In The Oxford Handbook of the Politics of Development two of America's leading political scientists on the issue Carol Lancaster and Nicolas van de Walle have assembled an international cast of leading scholars to craft a broad state of the art work on this vitally important topic This volume is divided into five sections major theories of the politics of development organized historically e.g. modernization theory dependency theory the Washington consensus of policies without politics etc key domestic factors and variables key international factors and variables political systems and structures and geographical perspectives inclusive of regional dynamics A comprehensive and cross regional examination on key issues of political development this Handbook not only provides an authoritative synthesis of past scholarship but also sets the agenda for future research in this discipline

Economic Crises and the Breakdown of Authoritarian Regimes Thomas B. Pepinsky, 2009-08-17 Why do some authoritarian regimes topple during financial crises while others steer through financial crises relatively unscathed In this book Thomas B. Pepinsky uses the experiences of Indonesia and Malaysia and the analytical tools of open economy macroeconomics to answer this question Focusing on the economic interests of authoritarian regimes supporters Pepinsky shows that differences in cross border asset specificity produce dramatically different outcomes in regimes facing financial crises When asset specificity divides supporters as in Indonesia they desire mutually incompatible adjustment policies yielding incoherent adjustment policy followed by regime collapse When coalitions are not divided by asset specificity as in Malaysia regimes adopt radical adjustment measures that enable them to survive financial crises Combining rich qualitative evidence from Southeast Asia with cross national time series data and comparative case studies of Latin American autocracies Pepinsky reveals the power of coalitions and capital mobility to explain how financial crises produce regime change

Reforms at Risk Eric M. Patashnik, 2024-11-01 A fascinating account of why some general interest policy reforms stick and others fall apart This is political science at its best Julian Zelizer Princeton University Winner of the Louis Brownlow Book Award National Academy of Public Administration Reforms at Risk is the first book to closely examine what happens to sweeping and seemingly successful policy reforms after they are passed Most books focus on the politics of reform adoption yet as Eric Patashnik shows here the political struggle does not end when major reforms become enacted Why do certain highly praised policy reforms endure while others are quietly reversed or eroded away Patashnik peers into some of the most critical arenas of domestic policy reform including taxes agricultural subsidies airline deregulation emissions trading welfare state reform and reform of government procurement to identify the factors that enable reform measures to survive He argues that the reforms that stick destroy an existing policy subsystem and reconfigure the political dynamic Patashnik demonstrates that sustainable reforms create positive policy feedbacks transform institutions and often unleash the creative destructiveness of market forces Reforms at Risk debunks the argument that reforms inevitably fail

because Congress is prey to special interests and the book provides a more realistic portrait of the possibilities and limits of positive change in American government. It is essential reading for scholars and practitioners of U S politics and public policy offering practical lessons for anyone who wants to ensure that hard fought reform victories survive. In this penetrating and important book Eric Patashnik explores the political circumstances that enable reforms to endure. Paul J Quirk, University of British Columbia.

Emerging Market Economies Grzegorz W. Kolodko, 2018-04-27. This title was first published in 2003. *Emerging Market Economies: Globalization and Development* is the result of a comprehensive international research project co-ordinated within the TIGER Transformation Integration and Globalization Economic Research. It deals with economic, social and political implications of globalization for the development of emerging market economies and is authored by a host of international scholars from the USA, Chile, Tanzania, UK, Italy, Hungary, Poland, Romania, China and Japan. Kolodko et al. examine the fundamental issues of the influences of globalization on the markets for capital goods and labour and for the growth and development in emerging markets including post-communist countries. The study includes a number of comprehensive and compatible works which deal especially with the chances for and mechanism of catching up on these emerging markets.

Handbook of Water Economics Ariel Dinar, Kurt Schwabe, 2015-09-25. Water scarcity, whether in the quality or quantity dimension, afflicts most countries. Decisions on water management and allocation over time, space and among uses and users involve economic considerations. This Handbook assembles research that represents recent thinking and applications in water economics. The book chapters are written by leading scholars in the field who address issues related to its use, management and value. The topics cover analytical methods, sectoral and intersectoral water issues and issues associated with different sources of water.

After Neoliberalism? Gustavo Flores-Macias, 2012-05-31. Gustavo Flores Macias. *After Neoliberalism* offers the first systemic explanation of why the ever popular left-wing governments in Latin American countries have become extremely radical or moderate once in power.

Decentralization and Local Governance in Developing Countries Pranab Bardhan, Dilip Mookherjee, 2006-06-16. Over the past three decades the developing world has seen increasing devolution of political and economic power to local governments. Decentralization is considered an important element of participatory democracy and along with privatization and deregulation represents a substantial reduction in the authority of national governments over economic policy. The contributors to *Decentralization and Local Governance in Developing Countries* examine this institutional transformation from comparative and interdisciplinary perspectives, offering detailed case studies of decentralization in eight countries: Bolivia, Brazil, China, India, Indonesia, Pakistan, South Africa and Uganda. Some of these countries witnessed an unprecedented big bang shift toward comprehensive political and economic decentralization: Bolivia in 1995 and Indonesia after the fall of Suharto in 1998. Brazil and India decentralized in an uneven and more gradual manner. In some other countries such as Pakistan, devolution represented an instrument for consolidation of power of a non-democratic national government. In China, local governments were granted much economic but little

political power South Africa made the transition from the undemocratic decentralization of apartheid to decentralization under a democratic constitution The studies provide a comparative perspective on the political and economic context within which decentralization took place and how this shaped its design and possible impact Contributors Omar Azfar Gianpaolo Baiocchi Pranab Bardhan Shubham Chaudhuri Ali Cheema Jean Paul Faguet Bert Hofman Kai Kaiser Philip E Keefer Asim Ijaz Khwaja Justin Yifu Lin Mingxing Liu Jeffrey Livingston Patrick Meagher Dilip Mookherjee Ambar Narayan Adnan Qadir Ran Tao Tara Vishwanath Martin Wittenberg
