Economic Efficiency of the Organizational Decisions of the Firm T. V. S. Ramamohan Rao,1989-10-13 Over the past several years there has been an awareness that markets contractual

arrangements and hierarchical organizations can be utilized as alternative modes of coordinating resource utilization in the context of the firm. In most practical situations mixed forms of organization are more frequent. That is, non-market coordination mechanisms are being utilized even in predominantly market-oriented economies. The reasons for the use of one of these organizational modes over the others are still being examined extensively. Very often asset specificity and bilateral monopoly risk sharing under uncertainty, transaction cost considerations and/or technological externalities economies of scope have been considered as the major reasons for preferring one of these modes over the others. However, the ultimate effect on the performance of the firm of any of these aspects which result in the adoption of any specific organizational pattern has to be through the cost curve and/or the demand curve. The neoclassical welfare concepts which have been developed to examine the efficiency in the functioning of markets are well known. The sources of inefficiency in the performance of the firm under different market structures are also well documented. However, there is as yet no well established set of concepts to examine the economic efficiency of the other organizational forms. It is not clear that the neoclassical welfare concepts are not relevant even under the new organizational setting. Studies of this nature are a relatively new area of economic research.

Contract Economics T.V.S. Ramamohan Rao, 2004. Contracts Are A Major Organizational Arrangement To Conduct Transactions. Economic Theory Has Been Making Attempts To Come To Grips With Four Pertinent Issues: Why Is Contracting Superior To Imperfect Markets And Hierarchical Control In Decentralized Organizations? What Basic Institutional Mechanisms Should Be In Place To Ensure Efficiency Of Contracts? What Determines The Choice Of Contract Forms In Particular? The Behavioral Responses Of Self Interest Seeking To Reactions Of Others And Contract Parameters. Can Contracts Provide A Better Alternative To Regulated Markets Keeping Information Asymmetry And Asset Specificity As The Focal Points? This book deals with the following mechanisms of exchange markets including transfer prices, contingent claims, contracts incomplete and incentive contracts and implicit contracts. The emphasis is on the efficient structuring of such contracts and the choice of suitable contract parameters. One chapter is also devoted to trust and informal dimensions of contracts. Since it is recognized that defining and enforcing formal contracts becomes difficult as information asymmetry and asset specificity reach their limits, the level of algebraic complexity in the derivations is kept to a minimum to make the book accessible to a wide audience.

Business Enterprise in Japan Ken'ichi Imai, Ryūtarō Komiya, Ronald Dore, D. Hugh Whittaker, 1994. Is capitalism everywhere driven by the same logic of market forces, contract and individualistic motivation? Or is Japan different? These eighteen contributions by leading Japanese economists shed light on a number of issues in this increasingly important debate. The variety of perspectives and the range of firms covered, not only the large industrial corporation but cooperatives, public enterprises and mutual life insurance companies as well, provide a broad overview that few other books on Japanese business can offer. In a new introduction to this English language edition, Ronald Dore and Hugh Whittaker identify and summarize the salient themes and sharpen the points.

discussed Chapters are grouped into five parts Part I identifies characteristics of the typical Japanese firm and the enterprise system Part II examines interfirm behavior such as trading subcontracting and cross shareholding in enterprise groups Part III describes general firm behavior how businesses invest in research equipment and product development Part IV takes a look at the employment system specifically competition deployment of human resources and the traditional bonus system a particularly significant feature of Japanese firms that differentiates them from their Western counterparts Finally part V looks at specific kinds of firms cooperatives public utilities and life insurance companies
