Ecosystems of Disturbed Ground L.R. Noel Lenski,Catherine M. Cameron,2018-05-10 The practice of slavery has been common across a variety of cultures around the globe and throughout history Despite the multiplicity of slavery s manifestations many scholars have used a simple binary to categorize slave holding groups as either genuine slave societies or societies with slaves This dichotomy as originally proposed by ancient historian Moses Finley assumes that there were just five genuine slave societies in all of human history ancient Greece and Rome and the colonial Caribbean Brazil and the American South This book interrogates this bedrock of comparative slave studies and tests its worth Assembling contributions from top specialists it demonstrates

that the catalogue of five must be expanded and that the model may need to be replaced with a more flexible system that emphasizes the notion of intensification The issue is approached as a question allowing for debate between the seventeen contributors about how best to conceptualize the comparative study of human bondage *Hedley Bull On International Society* NA NA,2019-06-12 Hedley Bull was one of the most important figures in the academic study of international relations Although his work ranged widely one simple but powerful idea constantly recurs that sovereign states form among themselves a society and that this society must be understood on its own terms The end of the Cold War and developments within international relations theory have once again thrown the social dimension of world politics into sharp relief Although many have read Hedley Bull's *The Anarchical Society* few are familiar with the breadth and range of his writing This collection brings together Bull's most important work on international society illustrating the richness and analytical rigour of his thought and its evolution over time The volume includes a comprehensive introduction which examines Bull's conception of international society its relationship to contemporary theories of world politics and its continued relevance to our understanding of the post Cold War world Computational Framework for Knowledge Syed V. The Media in the Network Society Gustavo Cardoso, 2006. In the Network Society, the development of a new communicational model has been taking shape. A communicational model characterized by the fusion of interpersonal communication and mass communication, connecting audiences and broadcasters under a hypertextual matrix linking several media devices. The Networked Communication model is the informational societies communication model. A model that must be understood also in its needed literacies for building our media diets, media matrixes, and on how it's changing the way autonomy is managed and citizenship exercised in the Information Age. In this book, Gustavo Cardoso develops an analysis that focusing on the last decade takes us from Europe to North America and from South America to Asia, combining under the framework of the Network Society a broad range of scientific perspectives from Media Studies to Political Science and Social Movements theory to Sociology of Communication.

Arab Society in Revolt Cesare Merlini, Olivier Roy, 2013-06-20. For every pithy conceptualization of complex events, there are additional lenses through which to examine them. One of the several virtues of this book is precisely that it brings different perspectives to bear on the complexity, diversity, and uncertainty of recent and current events in the Arab world. The thirteen authors concentrate on the critical social forces shaping the region: demography, religion, gender, telecommunication, connectivity, and economic structures, and they are painstakingly analyzed and evaluated from the foreword by Strobe Talbott, president of the Brookings Institution. The Arab Spring will be remembered as a period of great change for the Arab states of North Africa and the eastern Mediterranean. Facing fundamental transitions in governance, these countries are also undergoing profound social, cultural, and religious changes. The European Union and the United States, caught unprepared by the uprisings, now must address the inescapable challenges of those changes. How will the West respond to these new realities, particularly in light of international economic uncertainty, EU ambivalence toward a cohesive foreign policy, and declining U.S. influence abroad? *Arab Society in Revolt* explains and interprets the societal transformations occurring in the Arab Muslim world, their ramifications for the West, and possible policy options for dealing with this new world. *Arab Society in Revolt* examines areas of change particularly relevant in the southern Mediterranean: demography and migration, Islamic revival and democracy, rapidly changing roles of women in Arab society, the Internet in Arab societies, commercial and social entrepreneurship as change factors, and the economics of Arab transitions. The book then looks at those cultural and religious, as well as political and economic factors that have influenced the Western response or lack of it to the Arab Spring, as well as the policy options that remain open.
