Economics: Modern economic problems

Frank Albert Fetter, 1923

Trade Infrastructure and Economic Development David Olusanya Ajakaiye, T. Ademola

Oyejide, 2012-03-12 There is growing consensus in the literature that trade and trade policy matter for a pro poor growth and

development strategy Therefore policies that are consistent with this strategy feature increasingly in many African countries

where poverty is endemic and rapid and where sustainable economic growth is viewed as the major vehicle for poverty

reduction Key elements of these policies include measures that promote the expansion and diversification of production and

trade in Africa This book is aimed at articulating appropriate structural and policy measures for eliminating the constraints

that African countries face and thus ensuring that they can derive maximum benefits from all available market access

opportunities There is evidence that most African countries face external market access barriers in their major export

destinations which are generally less constraining than those confronting countries in other developing country regions Yet

they have generally not been able to take full advantage of the special preferential market access opportunities available to

them This suggests that improved external market access whether reciprocal or preferential would not by itself be sufficient

for strengthening African export performance In this collection export supply response capacity takes external beyond the

border factors as given and concentrates primarily on the internal behind the border factors that influence production and

distribution costs and thus competitiveness The central working hypothesis of this book is that the inability of domestic

producers and exporters in Africa to respond quickly effectively and efficiently to external market access opportunities is

caused by various limitations of their internal supply capacity and that this in turn is largely responsible for the lacklustre

export performance of many African countries This comprehensive study should be of interest to students and researchers of

international trade and development economics as well as African studies *Regional Cooperation, Organizations and*

Problems Rudolf Bernhardt, 2014-05-12 Encyclopedia of Public International Law 6 Regional Cooperation Organizations and Problems focuses on regional organizations cooperation and problems including boundary disputes membership and functions of organizations The publication first elaborates on the American Canadian Boundary Disputes and Cooperation American Mexican Boundary Disputes and Cooperation Andean common market League of Arab States and the Association of South east Asian Nations Discussions focus on structure and organization activities evaluation membership functions and establishment objectives and principles The text then examines the Balkan Pact of 1953 1954 Belgium Luxembourg Economic Union Benelux Economic Union and boundary disputes between China and USSR The manuscript considers the boundary disputes in Latin America and Africa Council for Mutual Economic Assistance European Atomic Energy Community European Coal and Steel Community and the European Conference of Postal and Telecommunications Administrations The publication also takes a look at the Economic Community of West African States European Atomic Energy Community and the European Atomic Energy Society The book is a vital source of information for researchers interested in regional organizations cooperation and problems Rationality and Legality of Non-market Economy Treatment in Antidumping Law Shao

Long, 2024-01-03 This book serves as a comprehensive study of and provides rich insight into non market economy treatment including its past present and estimated future practices and implications It explores the introduction of the market and non market economy dichotomy into international trade law It traces the origin and development of non market economy treatment against changing international economic and political background The book examines this treatment in light of the rationale underlying anti dumping reflecting its alleged significance of ensuring fair trade It in particular investigates the varied non market economy treatment practices responding concerns of China's rising as a large state led economy analyzing the deviation of NME treatment into an all in trade tool The book argues against preconceived bias and unilateral protectionism It highlights the universal existence of government involvement in the market and proposes objective assessment of its impact on fair trade Final proposition of the book is depoliticizing trade reforming comprehensively international trade rules to carefully calibrate different values including promoting fairness and enhancing global social welfare It envisages a multi dimension overhaul of international trade rules to rebalance trade interests rather than roughly labeling an economy to confer different treatment the practices of which lead to separation and chaos The book is of particular relevance and interest to economies in transition and among policy makers academicians and legal practitioners engaged in trade remedies and trade rules reconstruction **Fiji Customs, Trade Regulations and Procedures**

 central puzzle in jurisprudence has been the role of custom in law Custom is simply the practices and usages of distinctive
 communities But are such customs legally binding Can custom be law even before it is recognized by authoritative legislation
 or precedent And assuming that custom is a source of law what are its constituent elements Is proof of a consistent and long
 standing practice sufficient or must there be an extra ingredient that the usage is pursued out of a sense of legal obligation
 or at least that the custom is reasonable and efficacious And most tantalizing of all is custom a source of law that we should
 embrace in modern sophisticated legal systems or is the notion of law from below outdated or even dangerous today This
 volume answers these questions through a rigorous multidisciplinary historical and comparative approach offering a fresh
 perspective on custom s enduring place in both domestic and international law
