**United States International Economic Policy in an Interdependent World** United States. Commission on International Trade and Investment Policy,1971      **Economic Policy in an Interdependent World** Richard N. Cooper,1987 These eleven essays written over the past fifteen years continue and develop Richard Cooper's central theme of interdependence reflecting his experience in government in the Council of Economic Advisers and as Undersecretary of State for Economic Affairs They focus in particular on the opportunities and constraints for national economic policy in an environment where goods services capital and even labor are increasingly mobile The first four chapters are informal discursive treatments of economic and foreign policies in the face of growing interdependence among nations The remaining chapters cover such specialist topics as optimal regional integration the integration of world capital markets the impact of greater interdependence on the effectiveness of domestic economic policy the comparison of monetary and fiscal policy under fixed and flexible exchange rates currency evaluation in developing countries and the appropriate size and composition of a developing country's external debt A concluding chapter surveys the preceding essays in terms of coordinating macroeconomic policymaking in an interdependent world economy Richard N Cooper is Maurits C Boas Professor of International Economy at Harvard University      **United States International Economic Policy in an Interdependent World; Report** United States. Commission on International Trade and Investment Policy,1971 Report on major issues and problems confronting economic policy of the USA in matters of trade foreign investment and economic relations in the 1970 decade includes recommendations concerning domestic and foreign policy aspects of balance of payments deficits tariff systems international monetary policy economic integration etc Statistical tables      **United States International Economic Policy in an Interdependent World** United States. Hughes Hallett,Peter Mooslechner,Martin Schürz,2013-06-29 The launch of European Monetary Union EMU marked the beginning of a new era and its establishment has proved an impressive success at the technical legal and procedural level After all EMU has accelerated economic and political integration in the European Union and tied the economies of the Member States closer together However the performance of the euro high unemployment rates uneven output and investment growth and the issue

of structural reforms that have yet to be tackled have raised questions about the performance of EMU in practice There is a general consensus on the justification for economic policy coordination The existing literature on economic policy coordination however seems far from able to provide robust conclusions about how to organize the necessary interaction of institutions and policies Therefore there seems to be a case for re examining the subject under the new framework set by EMU The objective of such a reassessment is to enhance the understanding of what type of coordination and what institutional setting for policy coordination can be expected to be most favorable Challenges for Economic Policy Coordination within European Monetary Union provides an intellectually stimulating contribution to the ongoing debate
