Greenberg,2003 **The Economics of Regulation** Alfred E. Kahn,1988-06-22 As Chairman of the Civil Aeronautics Board in the late 1970s Alfred E Kahn presided over the deregulation of the airlines and his book published earlier in that decade presented the first comprehensive integration of the economic theory and institutional practice of economic regulation In his lengthy new introduction to this edition Kahn surveys and analyzes the deregulation revolution that has not only swept the airlines but has transformed American public utilities and private industries generally over the past seventeen years While attitudes toward regulation have changed several times in the intervening years and government regulation has waxed and waned the question of whether to regulate more or to regulate less is a topic of constant debate one that The Economics of Regulation addresses incisively It clearly remains the standard work in the field a starting point and reference tool for anyone working in regulation Kahn points out that while dramatic changes have come about in the structurally competitive industries the airlines trucking stock exchange brokerage services railroads buses cable television oil and natural gas the consensus about the desirability and necessity for regulated monopoly in public utilities has likewise been dissolving under the burdens of inflation fuel crises and the traumatic experience with nuclear plants Kahn reviews and assesses the changes in both areas he is particularly frank in his appraisal of the effect of deregulation on the airlines His conclusion today mirrors that of his original seminal work that different industries need different mixes of institutional arrangements that cannot be decided on the basis of ideology *Economic Principles for Integrating Adaptation to Climate Change Into Fiscal Policy* Mr. Matthieu Bellon,Emanuele Massetti,2022-03-23 Adaptation to climate change is a necessity for advanced and developing

economies alike Policymakers face the challenge of facilitating this transition This Note argues that adaptation to climate change should be part of a holistic development strategy involving both private and public sector responses Governments can prioritize public investment in adaptation programs with positive externalities address market imperfections and policies that make private adaptation inefficient and mobilize revenues for and distribute the benefits of adaptation Although the choice of what should be done and at what cost ultimately depends on each society s preferences economic theory provides a useful framework to maximize the impact of public spending Cost benefit analysis complemented by the analysis of distributional effects can be used to prioritize adaptation programs as well as all other development programs to promote an efficient and just transition to a changed climate While compensations may be needed to offset damages that are either impossible or too expensive to abate subsidies for adaptation require careful calibration to prevent excessive risk taking
