Corruption in the Former Soviet Union Margarita M. Balmaceda, 2007-12-06. Energy has become a major element to Russia's attempts under Putin to restore its influence over former Soviet territories and reaffirm itself as the dominant regional power. This book investigates how Russia has manipulated the energy of its neighbours on Russian energy supplies to achieve its foreign policy goals, focusing in particular on relations with Ukraine. This book, based on a multitude of primary Ukrainian and Russian primary sources until now not brought to the attention of Western readers, examines important events such as Russia's January 2006 suspension of gas supplies to Ukraine and the implications for Ukraine's Orange Revolution, other post-Soviet states, and Western Europe. However, it goes further in showing how domestic political conditions in non-Russian states may facilitate Russia's use of energy as a foreign policy weapon, investigating the local groups that often receive significant profits from allowing Russia to control energy markets and energy transit possibilities. With European countries becoming more dependent upon Russian energy, this book will be of interest not only to Russian Studies and Eastern European Studies experts but to scholars of international relations and European politics. Robert J. Duffy,1997 Duffy s work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities Amazon com viewed August 24 2020 The Political Economy of Renewable Energy and Energy Security E.
