A. W. Rhodes, Sarah A. Binder, Bert A. Rockman, 2008-06-13 The study of political institutions is among the founding pillars of political science With the rise of the new institutionalism the study of institutions has returned to its place in the sun This volume provides a comprehensive survey of where we are in the study of political institutions covering both the traditional concerns of political science with constitutions federalism and bureaucracy and more recent interest in theory and the constructed nature of institutions The Oxford Handbook of Political Institutions draws together a galaxy of distinguished contributors drawn from leading universities across the world Authoritative reviews of the literature and assessments of future research directions will help to set the research agenda for the next decade **The Totalitarian Paradigm after the End of Communism**, 2022-06-08 Concepts of totalitarianism have undergone an academic revival in recent years particularly since the breakdown of communist systems in Europe in 1989 91 the totalitarian paradigm so it seems to many scholars today had been discarded prematurely in the heat of the Cold War The demise of communism as a social system is however not only an important cause of the recurring attractiveness of the totalitarian paradigm but provides at the same time new evidence and correspondingly new problems of explanation for all approaches in communist studies and totalitarianism theory in particular

This book contains articles by philosophers social scientists and historians who reassess the validity of the totalitarian approach in the light of the recent historical developments in Eastern Europe A first group of authors focus on the analytical usefulness and explanatory power of classic concepts of totalitarianism after having observed the failed reforms of the Gorbachev era and the collapse of Europe s communist systems in 1989 91 In these contributions the totalitarian paradigm is contrasted with other approaches with respect to cognitive power as well as normative implications In the second group of contributions the focus is on the reassessment of methodological and theoretical problems of the classic concepts of totalitarianism The authors attempt to reinterpret the classic concepts so as to meet the objections which have been put forward against those concepts during the last decades The study thereby traces some of the intellectual roots of the totalitarian paradigm that precede the outbreak of the Cold War such as the work of Sigmund Neumann and Franz Borkenau It also focuses on the most famous authors in the field Hannah Arendt and Carl Joachim Friedrich In addition it discusses theorists of totalitarianism like Juan Linz whose contributions to totalitarianism theory have too often been overlooked
