Uneconomic Economics and the Crisis of the Model World M. Watson, 2014-01-17

What has gone wrong with economics Economists now routinely devise highly sophisticated abstract models that score top marks for theoretical rigour but are clearly divorced from observable activities in the current economy This creates an uneconomic economics where models explain relationships in blackboard rather than real life markets

The Social Crisis of Our Time Wilhelm Roepke, 2017-07-28 Roepke's The Social Crisis of Our Time is a series of blasts against the

malformations of economics the Nazi and Communist forms of collectivism both come in for severe criticism Roepke shows the process by which the Western liberal tradition itself makes possible these rebellions against open economic systems The drive toward social welfare full employment policies and the state management of fiscal fluctuations all lead away from free societies no less than market economies **The Invisible Handcuffs of Capitalism** Michael Perelman, 2011 Mainstream economics ignores or distorts the most fundamental aspect of this reality that the vast majority of people must out of necessity labor on behalf of others transformed into nothing but a means to the end of maximum profits for their employers The nature of the work we do and the conditions under which we do it profoundly shape our lives And yet both of these factors are peripheral to mainstream economics By sweeping labor under the rug mainstream economists hide the nature of capitalism making it appear to be a system based upon equal exchange rather than exploitation inside every workplace

Educational Times, 1889 The Educational Times, and Journal of the College of Preceptors, 1900 *Reflections on the Revolution of Our Time* Harold Laski, 2017-07-05 Harold J Laski saw World War Two as a period of revolutionary change as profound as any in the modern history of the human race In his view the period's inner nature was as significant in its essentials as those which saw the fall of the Roman Empire the birth in the Reformation of capitalist society or as in 1789 the final chapter in the dramatic rise of the middle class to power All of these were not revolutions made by thinkers though some of them may have foreseen its coming but of ordinary people who shaped the large outlines of the direction of these changes Laski held that revolutions of our time have been rooted in all that goes to give its present character to our society We can recognize its advent and prepare for it in that event we might build a civilization richer and more secure than any of which we so far have knowledge Or we may choose to resist its onset in which case it will appear to some future generation that our age has sought rather to sweep back the tides of the ocean than to oppose the decrees of men The curse of our social order is its persistent inequalities Either we must find ourselves able to co operate in their removal or we shall move rapidly to conflict about them Laski argues that the middle class must co operate with workers in essential revisions as the aristocracy was wise enough to do a century ago over the Reform Bill or violent revolution will be unleashed by means that transforms the ends of either party to the conflict in view This is the choice that lies before us Just how accurate or wide of the mark Laski was is brilliantly articulated in the critical introduction by Sidney A Pearson Jr Economic Democracy: The Political Struggle of the 21st Century J. W. Smith, 2017-10-03 This title was first published in 1999 The author contends that economic democracy is the economic system the U S purports to have but has thus far failed to achieve because it like all the economic powers that have gone before seeks to control the economies of weaker nations It is the shocking lack of economic democracy and the efforts of so many to achieve it that fuels today's conflicts and will fuel those of the 21st century To show how and why this comprehensive work provides a detailed analysis of the history of numerous aspects of the development of the Neo Mercantilist world economy the geopolitical systems put in place by the developed world to manage and perpetuate

that economy and the numerous proposals and modeling plans that have been offered over the years for the achievement of economic democracy A Handbook of Economic Anthropology, Second Edition James G. Carrier, 2012-01-01 Acclaim for the first edition The volume is a remarkable contribution to economic anthropology and will no doubt be a fundamental tool for students scholars and experts in the sub discipline Mao Mollona Journal of the Royal Anthropological Institute This excellent overview would serve as an excellent text for advanced undergraduate and graduate level classroom use Because of the clarity conciseness and accessibility of the writing the chapters in this volume likely will be often cited and recommended to those who want the alternative and frequently culturally comparative perspective on economic topics that anthropology provides Highly recommended All academic levels libraries K F Rambo Choice The first edition of this unique Handbook was praised for its substantial and invaluable summary discussions of work by anthropologists on economic processes and issues on the relationship between economic and non economic areas of life and on the conceptual orientations that are important among economic anthropologists This thoroughly revised edition brings those discussions up to date and includes an important new section exploring ways that leading anthropologists have approached the current economic crisis Its scope and accessibility make it useful both to those who are interested in a particular topic and to those who want to see the breadth and fruitfulness of an anthropological study of economy This comprehensive Handbook will strongly appeal to undergraduate and post graduate students in anthropology economists interested in social and cultural dimensions of economic life and alternative approaches to economic life political economists political scientists and historians

The Economic Government of the World Martin Daunt,2023-11-14 Foreign Affairs Best Books of the Year 2023 An epic history of the people and institutions that have built the global economy since the Great Depression In this vivid landmark history the distinguished economic historian Martin Daunt pulls back the curtain on the institutions and individuals who have created and managed the global economy over the last ninety years revealing how and why one economic order breaks down and another is built During the Great Depression trade and currency warfare led to the rise of economic nationalism a retreat from globalization that culminated in war From World War II came a new liberal economic order Squarely reflecting the interests of the West in the Cold War liberalism faced collapse in the 1970s and was succeeded by neoliberalism financialization and hyper globalization Now as leading nations are tackling the fallout from Covid 19 and threats of inflation food insecurity and climate change Daunt calls for a return to a more just and equitable form of globalization Western imperial powers have overwhelmingly determined the structures of world economic government often advancing their own self interests and leading to ruinous resource extraction debt poverty and political and social instability in the Global South He argues that while our current economic system is built upon the politics of and between the world s biggest economies a future of global recovery and the reduction of economic inequality requires the development of multilateral institutions Dramatic and revelatory *The Economic Government of the World* offers a powerful analysis of the origins of our current global crises and a path toward a fairer international order
