Verdun, A. Tovias, 2013-11-14 By examining the various policy subfields of European economic integration such as agriculture, trade, banking, economic governance and sustainability, this book offers a comprehensive and wide-ranging analysis of developments that have taken place in the past five years aimed at exploring the path of economic integration in Europe. *Developments in the Common Agricultural Policy of the European Community* Tim Josling, 1982 Extract Present trends in the Common Agricultural Policy (CAP) of the European Community (EC) particularly increasing expenditures for agricultural support will seriously affect the EC's ability to meet other policy needs and hinder enlargement of the Community to include Spain and Portugal. EC policymakers must either keep prices low directly or with producer taxes or limit quantities covered by support measures. This report examines directions which the CAP may take in view of budgetary and enlargement pressures and indicates potential changes in EC policy. *Income Distribution During System Reform and Economic Development in China* Zongsheng Chen, Yunbo Zhou, 2005 The book is concerned with research on income distribution inequality of Chinese residents in the last 20 years of the 20th century and the beginning of the 21st century. Measuring and making clear the status of inequality of every consisting parts of normal income of Chinese residents is an important concept. First, on the basis of the statistical data and the estimated data as well as several kinds of methods that are used to calculate income inequality and suited for the available data, the authors computed the population income Gini Coefficients of normal income inequality respectively for China's national urban and rural areas. Second, by using urban-rural income ratio, Theil index and others, they measured the status and trends of Chinese urban-rural gap and regional income disparity as well as their influence on the whole income inequality. Third, by case study and decomposition analysis, some main factors which had impacts on income inequality of urban and rural residents in China and their influence were researched. Hutschenreiter, 2013-03-09 There are several reasons why it has become important to rethink economic policy. Out of the European perspective, it is the new currency, the enlargement towards Central and Eastern European countries, the sluggish growth and the end of productivity convergence towards the USA and the insufficient creation of employment. From the transatlantic perspective, increasing differences in the economic policy and the potential rise of conflicts between Europe and the USA for example in trade competition and health issues are important. The current volume touches most but not all of these topics. It starts with the overview by Joseph Stiglitz on policy issues. Then macroeconomics policy is discussed followed

by the problem of an ageing society and European enlargement Differences between Europe and the USA are large in taxation and in the role of public finance The relative competitiveness of countries as well as of Europe will be decided by investments into new technologies and progression towards the Science Based Economy In the final section the role of economists in shaping the economic agenda and giving policy advice is discussed *Descriptive Economics* Myron T.
