Anderson, 1977 **An Introduction to the Economics of Fisheries Management** W. C. MacKenzie, 1983 Fishery management relates to a total system made up of resources industry and trade There are important linkages between these components In contrast with other resource industries common property in fishery resources implies that there is no market mechanism through which access to these resources could be allocated among users In many cases governments have been forced to intervene rightly or wrongly to fill this vacuum Economically rational fishery management necessitates the transformation of common property through some kind of limited entry system designed to optimize net benefits from the fishery Management planning involves the definition of goals and policy objectives and the development of strategies to assure attainment of policy objectives

**Economics of Fisheries Development** Rowena M. Lawson, 2013-11-07 Following the introduction of the 200 mile extended economic zone EEZ many developing countries suddenly found they had large fish resources which wisely managed and exploited could generate wealth and income of immense benefit However one constraint to this was that many countries for historic reasons lacked the expertise to manage fisheries on this scale Despite the need for information few economists and especially development economists teaching in universities and colleges were

able to incorporate fisheries economics into their courses owing to the lack of readily accessible material As a result many rising economists were failing to recognize the global importance of fishers as an economic resource capable of generating substantial wealth and income to many countries Economics of Fisheries Development provides an accessible exploration of this area of economics introducing development economists to some of the problems of developing fisheries in areas of the world where fisheries now present great growth prospects The case studies used throughout the book are nearly entirely drawn from developing countries *An Introduction to the Economics of Fisheries Management* W.
