**Studies on Economic Development and Growth in Selected African Countries** Almas Heshmati, 2017-05-02 This book is a collection of studies on economic development and growth in selected African countries. It consists of an introduction, summary, and 15 inter-related empirical studies grouped into 5 research areas: women's empowerment and demand for healthcare, the impact of institutions, aid, inflation, and FDI on economic growth, capital structure and bank loan growth effects, trade, mineral exports and exchange rate, and growth, productivity and efficiency in various industries. While it provides a comprehensive picture of the state of economic development and growth in most parts of the continent, the main focus is on economic development and growth in Ethiopia and Rwanda, two countries undergoing rapid economic and social development.

**A Select Bibliography On Economic Development** John P. Powelson, 2019-05-20 This bibliography of more than 2,000 titles contains both books and journal articles, primarily those published since 1970. Most of the entries are annotated. The material is classified according to forty-eight categories, and there is also a list of relevant titles for each major country in Africa, Asia, and Latin America.

**Applied Economics for Development: Empirical Approaches to Selected Social and Economic Issues in Transition Economies** Mahmut Zortuk, 2018-01-15 Transition economies experience transformation of their economic system. Following the disintegration of the Soviet Union, a number of former socialist countries underwent transitions from central planning to a market economy. More generally, many rapidly growing economies undergo no less profound transformations of their economic systems. Contrary to common misconception, the transition process cannot be simply reduced to eliminating state intervention and liberalizing the economy. Economies under transition exhibit a unique set of policy challenges. Unlike developed market economies, missing markets or market failures abound. Economic transformation takes the form of rapidly evolving patterns of international trade and investment, industrial structure, and consumption. These changes call for appropriate public policies. A continuing flow of investment hinges on suitable institutions, the provision of public infrastructure, and other public goods. Adequate regulation can be central in ensuring that environmental resources are sustainably managed. And sophisticated production systems call for corresponding social institutions in terms of education, health, and welfare provisions. In all these cases, accurate empirical assessments are central to the design of effective policy. This book presents a selection of pressing economic and social issues in transition economies. Selected issues include the development of particular industrial sectors, the drivers and consequences of foreign direct investment, public finances, urbanization, social indicators, environmental policy, and energy diversification. In each case, an original empirical analysis is performed using a variety of advanced quantitative methods applied to recent data. The book will be of interest to economists studying transition economies, economic development, or having a general interest in applied economics. It will be of particular interest to applied economists, policy analysts, and policy makers in transition economies concerned with the shape and direction of appropriate economic reforms.
