dominating the market Nonetheless the high growth potential of the two sectors is still well recognized by foreign multinationals Despite China s manifest prohibition of foreign involvement foreign companies have managed to enter the Chinese market by forming strategic alliances with domestic concerns It appears that China prefers a smooth and orderly process of market opening based on a more effective regulatory regime such as licensing arrangements This book is intended for readers interested in China s Internet and e commerce sectors Businessmen corporate planners business associates researchers engineers technologists academics and students interested in these industries will find the book useful Focusing on China s nascent Internet and e commerce industries this book presents the historical development current market status and future growth as well as discusses the problems and issues facing the two sectors
