The Evolution of Economic Theory Volker Caspari, 2013-03-01 Bertram Schefold is recognized internationally as an outstanding economist. He has made major contributions to the development of economic theory and particularly to economic thought. His contributions to economic theory include his work on Sraffian economics and its implications for the theory of value and distribution, capital theory, growth and technical progress. This book consists of ten papers by distinguished economists from Europe, the United States and Japan. The papers cover a range of topics chosen according to Bertram Schefold's main fields of research from Wicksell's principle of just taxation to Sraffa and the Universal Basic Income to Marx's Theory of Value. Covering Schefold's main areas of academic interest, this is an important and comprehensive volume which is a fitting tribute to one of the foremost economic thinkers of our age. Entrepreneurship and Economic Transition in Central Europe Jean-Paul Larçon, 2012-12-06 Since the fall of the Berlin Wall in 1989, Central European economies have been moving rapidly toward a common set of goals: political democracy, market-oriented economies and integration into the European and international business community. For businesses, Central Europe offers a unique window of opportunity and, in particular, two comparative advantages: a low-cost, qualified workforce and stronger growth rates than mature Western European economies. This opportunity, seized by local entrepreneurs and foreign enterprises alike, is a significant competitive threat to companies not present in the region or who have not found alternative strategies for increased growth and competitiveness. This book addresses economic transitions in Central Europe and analyzes the problems of Central European integration in the European Union. *The Institutionalised Transformation of the East German Economy* Sabine Spangenberg, 2012-12-06 It is perhaps worth stressing that economic problems arise always and only in consequence of change. So long as things continue as before or at least as they were expected to, there arise no new problems requiring a decision; no need to form a plan. Hayek 1945, p. 523. This book is based on my research for the degree of Doctor of Philosophy which I received from Lancaster University, England, in the second half of 1997. It is an analysis of the structural transformation of the economic system in East Germany and the behavioural relations. These changes imply the approach of institutionalised transformation, not the least by the creation of the Treuhandanstalt, is examined with a theory-based framework which is derived from system-theoretical, evolutionary and constitutional ethical considerations as well as from the newly developed adjustment model which has been constructed as a dynamic transformation approach. A relationship between norm changes, the new institutional framework of the economic system and the compatibility of the latter with changes of the remaining partial societal systems is recognised. Rigidity factors in the system's flexibility to react as well as the adjustment of economic behaviour to structural changes are analysed. The marginal product of system change is defined.

section 2 8 2 *CO2 Abatement and Economic Structural Change in the European Internal Market* Frank Hoster, Heinz Welsch, Christoph Böhringer, 2012-12-06 European environmental and energy policies are currently challenged by two mutually dependent issues CO2 abatement and the completion of the Internal Market for energy Both will lead to substantial structural changes in the energy supply industry and in the wider economy The purpose of this book is to analyze the interaction between CO2 abatement economic structural change and the completion of the European Internal Market This involves not only significant general equilibrium effects but also technological changes especially in the electricity supply sector The simulation results indicate that the effects of measures to reduce European CO2 emissions depend considerably on the structure of the electricity supply system *The Making of a Post-Keynesian Economist* G. Harcourt, 2012-05-29 The Making of a Post Keynesian Economist Cambridge Harvest gathers up the threads of the last decade of the author's twenty eight years in Cambridge before his return to Australia The essays include autobiography theory review articles surveys policy intellectual biographies and tributes and general essays **Small and Medium Enterprises Across the Globe** Meghana Ayyagari, Thorsten Beck, Aslı Demirgüç-Kunt, 2003 **OECD Economic Surveys: Australia 2001** OECD, 2001-08-08 This 2001 edition of OECD's periodic economic reviews of Australia examines recent economic developments policies and prospects and includes a special feature on sustainable development as well as annexes on business tax reform and environmental legislation **Country Reports on Economic Policy and Trade Practices** United States. Congress. Senate. Committee on Foreign Relations, 1998 **Economic Developments In India : Monthly Update, Volume -4 Analysis, Reports, Policy Documents** Editors : Raj Kapila & Uma Kapila, 1998 **The Economics of Transition** Marie Lavigne, 1999-02-15 Substantially revised and updated the second edition of this highly acclaimed text is both a vital guide and a valuable critical analysis The book provides a contemporary comparative approach to the process of transformation of the economies of Eastern Europe and Russia Supplying a large amount of factual and statistical information it also includes consideration of recent progress in the areas of macro economic stabilisation micro economic restructuring and integration into the world economy
