about the nature of liberty and the social foundations of human dignity can improve ongoing conversations among economists political scientists and philosophers The Political Economy of Distributism explores distributism both as a research program and a blueprint for political economic reform As many are reconsidering the relationship between markets and government this timely book demonstrates the perennial relevance of the Catholic intellectual tradition to public affairs Academics public servants policy experts and concerned citizens can all benefit from this timely study of common good capitalism s prospects

**A Survey of University Business and Economic Research Reports ...** United States. Small Business Administration,1963 *Economics As Discourse* Warren J. Samuels,2013-04-17 1 Warren J Samuels The study of economics as discourse requires a perspective that focuses on the relationships among knowledge or truth discourse or language and meaning Central to this task is the recognition that the conduct of economic analysis uses words and that words embody meanings that are applied to the object of study but do not necessarily derive from that object although they define that object for us Knowledge Economists are engaged in efforts to understand and explain the economy In the pursuit of this knowledge they have attempted to make coherent the respects in which belief is to be accepted as knowledge or the sense in which this knowledge has the quality of truth The field of methodology in economics parallels the fields of epistemology and philosophy of science in the attempt to make sense of and to prescribe the terms on which efforts at knowledge may be accepted as true or the terms on which statements can be accepted as knowledge The conduct of such methodological inquiry typically treats economics as a science 1 2 ECONOMICS AS DISCOURSE engaged in the pursuit of truth as an epistemological category though there have almost always been economists who were skeptical of the status of economics as a science and the pursuit of knowledge is only one of three putative function of economics the other two being psychic balm and social control *A Survey of University Business and Economic Research Reports* ,1963
