The power system is a complex system that includes many components, such as power sources to consumers in an efficient manner. A smart control model includes several models, where one of the important models is a forecasting power load model. This study aims to provide a brief description of power load forecasting systems.

Electrical Load-Curve Coverage Robert Maxwell, 2013-10-22 Electrical Load Curve Coverage covers the proceedings of the Symposium on Load Curve Coverage in Future Electric Power Generating Systems organized by the Committee on Electric Power United Nations Economic Commission for Europe Rome Italy on October 24 28 1977 This symposium considers the opportunity for an international exchange of economic and technical information on problems connected with the coverage of the full load curve This book is composed of five parts encompassing 48 chapters and begins with the optimum composition of the generating system The first part considers the use of mathematical models for optimization of energy sources in some countries The succeeding parts deal with the means of electricity generation for the variable part of the load curve This part examines the electric consumption of steam and gas turbines and the concept of peak power load Other parts discuss the means of storage at user level The final parts consider natural characteristics of the energy demand load curves This book will prove useful electrical engineers and researchers **EPA-600/3** ,1979-07 *Nuclear Science Abstracts* ,1971 *AI Techniques for Renewable Source Integration and Battery Charging Methods in Electric Vehicle Applications* Angalaeswari, S., Deepa, T., Kumar, L. Ashok, 2023-02-03 Artificial intelligence techniques applied in the power system sector make the prediction of renewable power source generation and demand more efficient and effective Additionally since renewable sources are intermittent in nature it is necessary to predict and analyze the data of input sources Hence further study on the prediction and data analysis of renewable energy sources for sustainable development is required AI Techniques for Renewable Source Integration and Battery Charging Methods in Electric Vehicle Applications focuses on artificial intelligence techniques for the evolving power system field electric vehicle market energy storage elements and renewable energy source integration as distributed generators Covering key topics such as deep learning artificial intelligence and smart solar energy this premier reference source is ideal for environmentalists computer scientists industry professionals researchers academicians scholars practitioners instructors and students Research Anthology on Clean Energy Management and Solutions Management Association, Information Resources, 2021-06-25 Energy usage and consumption continue to rise globally each year with the most efficient and cost effective energy sources causing huge impacts to the environment In an effort to mitigate harmful effects to the environment implementing clean energy resources and utilizing green energy management strategies have become worldwide initiatives with many countries from all regions quickly becoming leaders in renewable energy usage Still not every energy resource is without flaws Researchers must develop effective and low cost strategies for clean energy in order to find the balance between production and consumption The Research Anthology on Clean Energy Management and Solutions provides in depth research that explores strategies and techniques used in the energy production field to optimize energy efficiency in order to maintain clean and safe use while

delivering ample energy coverage The anthology also seeks solutions to energy that have not yet been optimized or are still produced in a way that is harmful to the environment Covering topics such as hydrogen fuel cells renewable energy solar power solar systems cost savings and climate protection this text is essential for electrical engineers nuclear engineers environmentalists managers policymakers government officials professionals in the energy industry researchers academicians and students looking for the latest research on clean energy management
