Public Relations Research Ansgar Zerfaß,A. A. van Ruler,Krishnamurthy Sriramesh,2008-05-08 Introduction Sriramesh Van Ruler Zerfass Krishnamurthy Sriramesh Betteke van Ruler Ansgar Zerfass One could make a reasonable argument that public relations is an ancient practice going back millennia although it has been popularly perceived as a 20th century phenomenon Scholarship in public relations however is more recent in origin with a history of less than four decades During these formative years the body of knowledge has expanded significantly which is laudable However there is potential for growth and improvement in many areas of the public relations literature Over the decades among other things public relations scholarship has largely remained parochial to specific regions such as the United States the United Kingdom Latin America German speaking Europe etc as evidenced in the bibliographic references of many essays in this volume itself where authors predominantly cite work from their own regions This is often necessitated by linguistic differences with only English serving as the universal language that helps permeate knowledge through most regions Pedagogical and methodological factors also have played a role in the regionalization of the body of knowledge However we believe that knowledge flows most when it is shared across different kinds of barriers Globalization has made it essential for us to recognize this reality more than ever This volume tries to bridge the gap and presents theories and concepts from researchers around the world

Interacting and Organizing Francois Cooren, 2013-09-13 This work provides an exceptional case study shedding light onto the functioning of an actual corporate board of directors. It presents analysis of a series of corporate management meetings shown in the 1974 documentary film *Corporation After Mr Sam*. The film chronicles the discussion and communication processes as a company considers how to replace its president, and it serves as a unique opportunity for analysis of real world organizational discourse. With an impressive list of prominent contributors, *Interacting and Organizing: Analyses of a Management Meeting* employs the dual perspectives of organizational communication and language and social interaction (LSI) to examine the film. It is arranged around specific topics analyzed separately by organizational communication and LSI scholars. Editor Francois Cooren provides an introduction for each topic, and a comparison and synthesis conclude each part. Readers will appreciate the information presented as it is an arena typically off limits to outside eyes. The transcript of the film is included as an appendix to the volume. This volume is appropriate for use in advanced courses and seminars in organizational communication, LSI, management, and organizational behavior. With its distinctive approach to studying the film's content, it will be invaluable to scholars, researchers, and graduate students in organizational communication, LSI, and management.

Social Media, Organizational Identity and Public Relations Amy Thurlow, 2018-10-10 Public relations has been swift to grasp social media, yet its impact on public relations practice remains relatively unexplored. This book focusses on a way of understanding organizational identity construction in a virtual context, developing scholarship on the importance of a virtual presence in PR management, and further to make sense of these identities as authentic, legitimate, or plausible. Through a diverse group of empirical case studies, this book explores the global perspective on organizational identities which transcend global boundaries via the internet, including Volkswagen's emissions scandal and Monsanto, and organized social media protests. It also explores crowdfunding, an emerging form of capitalist development constructed through sensemaking in social media. By looking at the emergence of organization in today's social media environment, it identifies how the interactive is created on a digitally mediated platform sharing knowledge and engaging individuals in organizational identity construction. Viewing the social construction of organizational identities through this lens, this innovative book locates how identities are plausible, authentic, and legitimate or not through their ongoing communication via social media. It will be of great interest to
