*Emerging Energy and Chemical Applications of Methanol* J. F. Rischard, World Bank, 1982      *Competitive Assessment of the U.S. Methanol Industry*, 1985      Nonconventional Energy Ashok V. Desai, Mohan Munasinghe, 1990 With special reference to developing countries      **The Economics of Natural Gas in Developing Countries** John C. Gault, 2014-05-23

The Economics of Natural Gas in Developing Countries provides information pertinent to the utilization of natural gas in developing countries This book examines the potential domestic uses of natural gas as well as its export possibilities Organized into 13 chapters this book begins with an overview of the policies that provide adequate incentives for gas development in order to maximize the availability of gas for domestic uses This text then examines the worldwide demand and supply of natural gas Other chapters consider the requirements for gas trade projects which consists of a substantial market in the importing region and a significant gas reserve in the exporting country This book discusses as well the differences between oil and gas development in terms of cost marketing technology and government regulation The final chapter deals with the significant potential for natural gas This book is a valuable resource for economists engineers and engineering consultants      *Fossil Energy Update*, 1982      **Energy Research Abstracts**, 1993      Energy Abstracts for Policy Analysis, 1987      *New Transportation Fuels* Daniel Sperling, 1990 A comprehensive look at the various factors determining what fuels could and should replace petroleum Among the most promising transportation energy options addressed alcohols natural gas hydrogen electricity and petroleum like synthetic fuels Discusses policy strategies for implementing these options Annotation copyrighted by Book News Inc Portland OR      **Utilization of Renewable Energy Sources and Energy-saving Technologies by Small-scale Milk Plants and Collection Centres** G. Riva, 1992-01-01

Issues Facing the Future Use of Alaskan North Slope Natural Gas United States. General Accounting Office, 1983 This report summarizes the results of the General Accounting Office s examination of the marketing and financing obstacles encountered by the sponsors of the Alaska Natural Gas Transportation System The report also examines five alternatives for transporting and using the abundant natural gas reserves of the Alaskan Arctic      **Renewable Energy Technologies** L. A. Kristoferson, V. Bokalders, 2013-10-22 Renewable Energy Technologies Their Applications in Developing Countries presents an overview and assessment of technologies for energy related projects in the rural sector of developing countries This book discusses the important but not dominant role that new and renewable sources of energy NARSE will have in the Third World Bioenergy fuel sources come from wood fuel energy crops agricultural residue and organic wastes peat biomass briquettes biogas and animal power The text also describes the problems related to operating biomass engines and to the production of engine fuels such as alcohol fuels vegetable oil producer gas made from wood and charcoal These problems concern land use and site location for growing these fuel crops government policies or subsidies as well as competition with prevailing petrol prices Solar water heaters and photovoltaic cells can be used by households and in bigger institutions ongoing technological

developments mainly focus on cutting down costs and better manufacturing methods The book also addresses other NARSE such as hydro wind and water power generation This book is suitable for economists environmentalists ecologists and policy makers involved in energy conservation and rural development *Energy technology XIII* Energy technology conference,1986 **Oil Windfalls** Alan H. Gelb,1988 This book assesses the full impact of oil windfalls on six developing producer countries Algeria Ecuador Indonesia Nigeria Trinidad and Tobago and Venezuela This is the first time that the issue has been systematically analysed and related to economics policies and underlying macroeconomic characteristics The book adopts a broad approach blending institutional and political aspects with quantitative analysis which includes the results of sophisticated model simulations It presents new information on how oil discoveries have been used by producer governments and analyses of the consequences Finally it concludes that much of the potential benefit to producers has been dissipated and explains why producers may actually end up worse off despite revenue gains **Energy Technology XIII** ,1986

**The Environment, Public Health, and Human Ecology** James A. Lee,1985 This handbook is designed to provide guidance in detecting identifying assessing and measuring environmental and related ecological effects It offers an overview of the implications of economic development projects for natural resources environmental systems public and occupational health and human ecology The handbook is organized as follows Chapter 1 describes the World Bank s policy of sustainable development the project cycle and opportunities for environmental input into that cycle and the role of cost benefit assessments and the difficulties of quantifying the benefits of environmental protection measures Chapter 2 examines four environmental problems air pollution water pollution soil waste disposal and noise pollution caused primarily by industrial and energy related development project Chapter 3 focuses on direct and indirect health risks caused by environmental problems and provides a comprehensive plan to combat these impacts Chapter 4 discusses some possible adverse effects of tropical agricultural development and ways to mitigate them Chapter 5 provides a framework for analyzing environmental impacts associated with a wide variety of industrial development projects in developing nations Problems related to project design site selection and project operations are considered as are appropriate measures to alleviate them Chapter 6 first discusses the environmental damage and possible mitigating measures associated with exploring mining and developing fossil fuels such as oil natural gas and coal It then looks at the effects of electric power projects and addresses ways to control the impacts of fossil fuel generating plants large scale hydroelectric projects and renewable sources of energy The last chapter discusses the planning tools available for managing urban and regional development *Energy and Nuclear Power Planning in Developing Countries* Ioan D. Stăncescu,1985 *Bolivia, Issues and Options in the Energy Sector* Joint UNDP/World Bank Energy Sector Assessment Program,1983 *Socioeconomic Aspects of Renewable Energy Technologies* Ramesh Bhatia,Armand Pereira,Madhura Swaminathan,1988-03-08 Major changes have occurred in both the composition of energy supply and the choice of technology especially in activities in which energy intensity has a significant bearing on the

costs and competitiveness of goods and services Presented here in the context of these changes are case studies on the macroeconomic evaluation of ethylalcohol programs and the microeconomic evaluation of technologies for irrigation pumping Environment and Resource Conservation During the last decade a large volume of literature has addressed the two major policy issues concerning energy programs in developing countries overall energy conservation and provision of energy for rural development needs Yet many of these works have been supply sided without adequate analysis of users needs and the different option to meet them Ex post evaluations of existing field experiences with renewable technologies are still scarce and many of those which have appeared provide limited insights for planning and implementation in different countries Socioeconomic Aspects of Renewable Energy Technologies addresses these oversights A selected number of technologies and topics concerning renewable energy sources for developing countries are discussed including ethanol and the macro economic evaluation of ethanol programs various renewable energy technologies for end use such was water pumping for irrigation and the micro economic evaluation of these additional technologies **Index of Publications** World Bank,1991 Industrialisation, Mineral Resources, and Energy in Africa Smaïl Khennas,1993
