**Human Rights: Universality and Diversity** Eva Brems, 2021-10-18 Human rights are by definition universal Yet in a world characterized by enormous diversity there is no consensus about the implications of the universality of human rights In several regions of the world human rights conceptions are promoted that challenge the mainstream largely Western dominated discourse on this subject This volume offers an analysis of context specific human rights discourses from East Asia Sub-Saharan Africa and the Muslim World Rather than interpreting these as threats to universality the author examines how and to what extent the claims that are advanced can and should be accommodated in order to further the universality of human rights A theory of inclusive universality is developed and its implications are translated into legal techniques On the one hand there are flexibility techniques allowing for contextual diversity in the interpretation and application of human rights norms On the other hand giving credit to non Western views also implies that there should be room for transformation of those human rights norms

**Development In Modern Africa** Martin S.

Shanguhya, Toyin Falola, 2019-10-08 *Development in Modern Africa Past and Present Perspectives* contributes to our understanding of Africa's experiences with the development process. It does so by adopting a historical and contemporary analysis of this experience. The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis: skepticism and pessimism. While not overlooking the shortcomings of development, the themes in the book express an optimistic view of Africa's development experiences, highlighting elements that can be tapped into to enhance the condition of African populations and their states. By using case studies from precolonial, colonial, and postcolonial Africa, contributors to the volume demonstrate that human instincts to improve material, social, and spiritual worlds are universal. They are not limited to the Western world, which the term and process of development are typically associated with. Before and after contact with the West, Africans have actively created institutions and values that they have actively employed to improve individual and community lives. This innovative spirit has motivated Africans to integrate or experiment with new values and structures, challenges, and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community. The book will be of interest to academics in the fields of history, African studies, and regional studies.

Human Rights Robert McCorquodale, 2017-11-22 This title was first published in 2003. Theories of human rights are important as they can be a means to challenging entrenched and oppressive power. These key essays take a philosophical approach to human rights, questioning dominant theories and offering different perspectives on their application.

*Debating Human Rights* Peter Van Ness, 2003-07-13 Human rights debates can provoke strong reactions, particularly among people of different cultural backgrounds. The debate over Asian values and the use of human rights diplomacy are the most obvious manifestations of divisions between Asia and the West and reflect particular world views and historical legacies. In this new book, scholars from the United States and several Asian countries debate fundamental issues such as Asian values, peaceful evolution, and cultural imperialism. Provocative and challenging essays analyse the debate between East and West, presenting critical perspectives on globalization and human rights diplomacy. *Debating Human Rights* is an original contribution to a vital area of debate. It presents a uniquely wide diversity of perspectives on controversial issues and demonstrates how scholars and activists who view the world very differently can nonetheless move these debates forward in a search for common ground.

*International Human Rights and their Enforcement in Africa* Kiwinda Mbondenyei, 2011 Whilst the establishment of the African human rights system was a good gesture that signalled the recognition of the value and essence of international human rights in the continent, a continuous study of the system has become necessary. This is particularly in light of the fact that the continent is in desperate need of well-established and effective regional human rights enforcement mechanisms. At the moment, the regional human rights system is stuck between prospects and pitfalls because of the gap that exists between the promise of human rights and their actual realisation. By all means, this trend needs to be reversed. The main objective and purpose of this book is to underscore the challenges besetting

the effective enforcement of international human rights law in Africa and the prospects and promises of an effective regional human rights system      *Children's Rights in Africa* Julia Sloth-Nielsen, 2016-05-23 This collection is anchored in an African conception of children's rights and the law and reflects contemporary discourses taking place in the region of the children's rights sphere The majority of contributors are African and adopt an individual approach to their topic which reflects their first hand experience The book focuses on child rights issues which have particular resonance on the continent and the chapters span themes which are both broad and narrow containing subject matter which is both theoretical and illuminated by practice The book profiles recent developments and experiences in furthering children's legal rights in the African context and distils from these future trends the specific role that the law can play in the African children's rights environment

*Contending Issues in African Development* Obioma M. Iheduru, 2001-02-28 Taking a forward looking approach this book critically examines the issues and dynamics central to Africa's problematic development and situates these issues within the contents unique cultural political economic and social milieu Moving away from a simple litany of problems bedeviling Africa's economy the book is the culmination of several scholars efforts to identify specific causative factors Each chapter delineates a specific issue demonstrates the role it plays in overall development and speculates on probable ways to meet the challenges it poses The major conceptual and epistemological constructs considered include the tamed African State social capacity management of change reconceptualized gender roles and economic integration Although the contributors various approaches diverge and disagree the epistemological variations contribute cumulatively to an understanding of the issues at the root of Africa's slow pace of development While traversing the spectrum of issues that affect development the book uniquely points out that the management of change is pivotal to fostering development The authors efforts provide a useful base for future research and help to chart a course of action leading to success in the 21st century      **International Law in**

**Post-Colonial Africa** Tiyanjana Maluwa, 2023-12-28 African States have contributed to the development of modern international law in various ways This contribution can be assessed through an examination of the actual practice of these States in their interactions with each other and with other States in the wider international community on various matters which have a bearing on the creation of legal rules for the international community Taken together the case studies presented in this book demonstrate that despite its apparent marginalization in the international system Africa can stake a valid claim to being part of the on going process of shaping new rules and principles of international law while strengthening existing ones Some of the more important examples are the broadening of the refugee definition and the principle of non refoulement in the area of refugee law the rights of access and transit to the sea and the concept of the exclusive economic zone in the law of the sea the principle of uti possidetis the concept of peoples rights as distinguished from that of human rights the very expansion of the traditional categorization of human rights to embrace the so called third generation rights such as the right to development the Nyerere doctrine of State succession and in general certain principles in the area of

international fluvial law concerning the common management and utilization of shared watercourses The discussions in this book are informed by the belief that post colonial African States have tended to view the creation and application of international law as a historically engaged activity through which they can now empower themselves as part of the modern international community     The Riddle of Human Rights Gary Teeple,2005-01-01 Gary Teeple makes the case that human rights are peculiar to an historically given mode of production     *Africa* Peter Lewis,2018-02-20 This book focuses on the historical construction of African states the modes of political control in the region and the character of political elites It examines the nature of political legitimacy and the avenues of participation or withdrawal pursued by various popular sectors
