**Non-State Actors and Authority in the Global System** Andreas Bieler, Richard Higgott, Geoffrey Underhill, 2004-01-14. Traditionally in International Relations power and authority were considered to rest with states. This book analyses the continuing but changing role of states in the international arena and their relationships with a wide range of non state actors which possess increasingly salient capabilities to structure global politics and economics.

*Civil Society: Concepts, Challenges, Contexts* Michael Hoelscher, Regina A. List, Alexander Ruser, Stefan Toepler, 2022-05-10. Anheier's 65th birthday and retirement from the University of Heidelberg. An internationally recognized pioneer of nonprofit and civil society studies, Anheier focused his work on providing clarity around 1 civil society local and global observing its origins and trajectory and developing theories to explain it 2 the nonprofit sector and institutions within and extending from it including nonprofit organizations philanthropy and social investment and 3 culture as it relates to democracy and back to civil society. The essays in this volume refer to these concepts and position them in the context of developments over the last two to three decades. The volume is arranged in three sections. The first section comprises essays that elucidate concepts and probe theories in the field. The second section presents chapters discussing current global challenges and trends in the focal areas. The third and final section then comprises country and regional case studies illustrating important aspects of the global challenges or theoretical issues of the two preceding sections. A fascinating and up to date overview of key issues and trends in civil society and nonprofit research by an international collection of eminent scholars in these fields, this book will be attractive to civil society and nonprofit sector researchers as well as a broader academic community of political scientists sociologists economists and cultural experts.

Weisbrod,2000-05 Nonprofit organizations are increasingly resembling private firms in a transformation bringing with it a shift in financial dependence from charitable donation to commercial sales activity This book first published in 1998 examines the reasons and consequences of the mimicry of private firms by fundraising nonprofits User fees and revenue from ancillary activities are mushrooming with each having important side effects pricing out of the market certain target groups or distracting the nonprofit from its central mission The authors focus first on issues

that apply to nonprofits generally the role of competition analysis of nonprofit organization behavior the effects of distribution goals and differential taxation of nonprofit and for profit activity revenue the effects of changes in donations on commercial activity and conversions of nonprofits to for profits They then turn to specific industries hospitals universities social service providers zoos museums and public broadcasting The book concludes with recommendations for research and for public policy toward nonprofits Human Beings--between the Individual and the Social Peter Herrmann,2006 Looking for an answer of social science being able to maintain political independence without losing genuine political orientation and responsibility and at the same time maintaining a sophisticated balance of holistic orientation on the one side and discrimination on the other side is of course on the one hand bound to the objective conditions of society on the other hand and even more so scientists have to accept their responsibility of re gaining independence in terms of looking for valid answers to assess development and to change them where necessary rather than fulfilling expectations of the development by simply maintaining the status quo In this regard the present contributions reach a high level of expertise in their independence of judgements This is of particular interest as they cover a huge variety of topics and areas not least coming from different disciplinary backgrounds and as well looking at different aggregate levels **Routledge Handbook of Environment and Society in Asia** Paul G. Harris,Graeme Lang,2014-09-19 Nowhere is the connection between society and the environment more evident and potentially more harmful for the future of the world than in Asia In recent decades rapid development of Asian countries with very large populations has led to an unprecedented increase in environmental problems such as air and water pollution solid and hazardous wastes deforestation depletion of natural resources and extinction of native species This handbook provides a comprehensive survey of the cultural social and policy contexts of environmental change across East Asia The team of international experts critically examine a wide range of environmental problems related to energy climate change air land water fisheries forests and wildlife The editors conclude that with nearly half of the human population of the planet and several rapidly growing economies most notably China Asian societies will determine much of the future of human impacts on the regional and global environments As climate change related threats to society increase the book strongly argues for increased environmental consciousness and action in Asian societies This handbook is a very valuable companion for students scholars policy makers and researchers working on environmental issues in Asia

Measuring the Impact of the Nonprofit Sector Patrice Flynn, Virginia A. Hodgkinson,2013-11-11 One of the major tasks facing researchers practitioners and funders is the development of empirical tools to measure the inherent worth of nonprofit organizations as well as the sector as a whole Renowned scholars present chapters on the state of the art of performance measurement in the nonprofit sector and seek to establish a framework for a long term research agenda to identify quantify and self assess those qualities that make the nonprofit sector unique *Poverty Relief in a Mixed Economy* Karin Heitzmann,2010 This study examines both conceptually and empirically the welfare mix in the activity field of poverty relief

and specific shifts of this mix i.e. changes towards privatization and marketization. In the first part of the study the meanings of the concepts welfare mix, privatization and marketization are disentangled and the concepts are connected. Based on this conceptual framework the second part of the study assesses the welfare mix in poverty relief and recent changes thereof empirically. The empirical part focuses on Austria. There mainly two types of organizational actors, namely public agencies and nonprofits, provide poverty alleviation. Thus only the roles and contributions of these two types of providers are examined.
