**EMF Studies in Early Modern France** David Lee Rubin, Julia V. Douthwaite, 2001 This major collection of essays on 18th century French literature in relation to Enlightenment culture includes the subjects of medicine the art of conversation devotional writing gastronomy divorce and the Revolution *Signs of the Early Modern* David Lee Rubin, 1996 *Emf Studies in Early Modern France* David Lee Rubin, 1997-07-01 Signs of the Early Modern , 1997 **The Poesy of Scientia in Early Modern England** Subha Mukherji, Elizabeth L. Swann, 2024-07-12 This book explores interconnections between the modes of knowing that we now associate with the rubrics literature and science at a formative point in their early development Rather than simply tracing lines of influence it focuses on how both literary texts and natural philosophy engage with materiality language affect and form Some essays are invested in how early modern science adopts and actively experiments with rhetorical and poetic modes and expression while others emphasize a shared investment in natural philosophical topics alchemy chance or astrology for example that move among the period s observational texts and its literature highlighting the participation of literary texts in the production of experimental knowledge Organised around the broad themes of creation and transformation mediation and communication and interpretation and imaginative speculation the essays collectively probe the presumed dichotomy between science s schematizing and taxonomic ambitions and the fertile and volatile creative energies of literary texts *The School of Montaigne in Early Modern Europe* Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne s *Essais* and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne s own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the *Essais* to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book s significance in literary and intellectual history Montaigne s is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the *Essais* were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual s judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors Montaigne enfranchised the unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of

his era The study draws on new ways of approaching literary history through the history of the book and of reading The Essais are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct concept of the social context of a text The concept is derived from anthropologist Alfred Gell's notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people

**Ruling Women, Volume 1** Derval Conroy, 2016-01-28 *Ruling Women* is the first study of its kind devoted to an analysis of the debate concerning government by women in seventeenth century France Drawing on a wide range of political feminist and dramatic texts Conroy sets out to demonstrate that the dominant discourse which upholds patriarchy at the time is frequently in conflict with alternative discourses which frame gynocracy as a feasible and laudable reality and which reconfigure wittingly or unwittingly the normative paradigm of male authority Central to the argument is an analysis of how the discourse which constructs government as a male prerogative quite simply implodes when juxtaposed with the traditional political discourse of virtue ethics In *Government Virtue* and the

Female Prince in Seventeenth Century France the first volume of the two volume study the author examines the dominant discourse which excludes women from political authority before turning to the configuration of women and rulership in the pro woman and egalitarian discourses of the period Highly readable and engaging Conroy s work will appeal to those interested in the history of women in political thought and the history of feminism in addition to scholars of seventeenth century literature and history of ideas **EMF** David Lee Rubin, Julia V.
