Warman,1995-12 *The Christian Advocate* ,1922 **The English Catalogue of Books** Sampson Low,1926 Volumes for 1898 1968 include a directory of publishers **The Bookman** ,1923 **Psychological Subjects** Mathew Thomson,2006-05-25 This is a history of how twentieth century Britons came to view themselves and their world in psychological terms and how this changed over time It examines the extent to which psychological thought and practice could mediate not just understanding of the self but also a wide range of social and economic political and ethical issues that rested on assumptions about human nature In doing so it brings together high and low psychological cultures it focuses not just on health but also on education economic life and politics and it reaches from the start of the century right up to the

1970s Mathew Thomson highlights the intense excitement surrounding psychology at the start of the century and its often highly unorthodox expression in thought and practice He argues that the appeal of psychological thinking has been underestimated in the British context partly because its character has been misconstrued Psychology found a role because rather than shattering values it offered them new life The book considers the extent to which such an ethical and social psychological subjectivity survived the challenges of an industrial civilization a crisis in confidence regarding human nature wrought by war and political extremism and finally the emergence of a permissive society It concludes that many of our own assumptions about the route to psychological modernity centred on the rise of individualism and interiority and focusing on the liberation of emotion and on talk relationships and sex need substantial revision or at least setting alongside a rather different path when it comes to the Britain of 1900 70
