Rethinking Imperialism J. Milios,D. Sotiropoulos,2009-10-09 This book aims at presenting and assessing imperialism as a theoretical concept It aims to provide a comprehensive evaluation focusing specifically on the tension between Marx s theoretical system of the Critique of Political Economy and the theories of capitalist expansion and domination *Economic Growth and Development in Africa* Horman Chitonge,2015-01-09 In recent years Africa has undergone the longest period of sustained economic growth in the continent s history drawing the attention of the international media and academics alike This book analyses the Africa Rising narrative from multidisciplinary perspectives offering a critical assessment of the explanations given for the poor economic growth and development performance in Africa prior to the millennium and the dramatic shift towards the new Africa Bringing in perspectives from African intellectuals and scholars many of whom have previously been overlooked in this debate the book examines the construction of Africa s economic growth and development portraits over the years It looks at two institutions that play a vital role in African development providing a detailed explanation of how the World Bank and the IMF have interpreted and dealt with the African challenges and experiences The insightful analysis reveals that if Africa is rising only 20 30 per cent of Africans are aboard the rising ship and the main challenge facing the continent today is to bring on board the majority of Africans who have been excluded from growth This book makes the complex and sometimes confusing debates on Africa s economic growth experience more accessible to a wide range of readers interested in the Africa story It is essential reading for students and researchers in African Studies and will be of great interest to scholars in Development Studies Political Economy and Development Economics **Value and Unequal Exchange in International Trade** Andrea Ricci,2021-05-19 Contrary to the claims made by neoliberal governments and mainstream academics this book argues that the huge increase in trade in recent decades has not made the world a fairer place instead the age of globalization has become a time of mass migration caused by increasing global inequality The theory of unequal exchange challenges the free trade doctrine claiming that transfers of value from poorer to richer countries are hidden behind apparently equivalent market transactions Following a critical review of the existing approaches the book proposes a general theory of unequal exchange in the light of an innovative reconstruction of Marx s

international law of value in which money and exchange rates play a crucial role in decoupling value captured from value produced by different countries even in perfectly competitive world markets On this theoretical basis the book provides an empirical analysis of the international transfers of value in both traditional trade and Global Value Chains The resulting world mapping of unequal exchange shows the geographical hierarchy of capital global exploitation by revealing a world divided into two quite separate camps of donor and receiving countries the former being the poorer countries and the latter the richer countries This book is addressed to scholars and students of economics and social sciences as well as activists of the North and the South interested in a better understanding of the asymmetric power relations implied in global trade It makes a significant contribution to the literature on political economy trade Marxism international relations and economic geography

Department of Housing and Urban Development United States. Congress. House. Committee on Appropriations. Subcommittee on HUD-Independent Agencies, 1978 Invisible Leviathan Murray Smith, 2018-11-05 In this updated and expanded edition of *Invisible Leviathan* Murray E G Smith critically explores and makes significant contributions to the debate surrounding Karl Marx's capitalist law of value and its corollary the law of the falling rate of profit A powerful case is presented that capitalism has exhausted its potential to contribute to human progress Humanity confronts a fateful choice to allow this obsolescent system which necessarily measures wealth in terms of abstract social labour and money profit to destroy human civilisation or to make the leap toward a global egalitarian socialist society in which the satisfaction of human

need is the starting point and the all round development of each and every human individual the goal of the socio economic life process First printed in 1994 as Invisible Leviathan The Marxist Critique of Market Despotism Beyond Postmodernism by University of Toronto Press This second and revised edition includes a new Foreword by Michael Roberts and a Preface to the Second Edition *The Palgrave Encyclopedia of Imperialism and Anti-Imperialism* Immanuel Ness,Zak Cope,2016-04-29 The Palgrave Encyclopedia Imperialism and Anti Imperialism objectively presents the prominent themes epochal events theoretical explanations and historical accounts of imperialism from 1776 to the present It is the most historically and academically comprehensive examination of the subject to date *Homiletic Review* ,1909
