## **Emotion A Reconsideration Of The Somatic Theory:**

Emotion Andrew C. Papanicolaou, 1989-01-01 The author explores the question of the nature of emotion by critically examining three theoretical approaches the somatic or peripheralist the cerebrocentric and the cognitive In finding the somatic approach superior to the others the author explicitly challenges current conceptions regarding the nature of emotion Giving particular emphasis to the works of William James the author recasts the somatic theory in detail and demonstrates how it best fits the available clinical experimental data Written in jargon free language the book presents to specialists and non specialists alike an overview of this topic *Emotion: A Reconsideration Of* Andrew C. Papanicolaou, 2021-10-15 The author explores the question of the nature of emotion by critically examining three theoretical approaches the somatic or peripheralist the cerebrocentric and the cognitive In finding the somatic approach superior to the others the author explicitly challenges current conceptions regarding the nature of emotion Giving particular emphasis to the works of William James the author recasts the somatic theory in detail and demonstrates how it best fits the available clinical experimental data Written in jargon free language the book presents to specialists and non specialists alike an overview of this topic *Emotion and Adaptation* Richard S. Lazarus, 1994-06-09 In this landmark work Richard Lazarus one of the world's foremost authorities offers a comprehensive treatment of the psychology of emotion its role in adaptation and the issues that must be addressed to understand it The work provides a complete theory of emotional processes explaining how different emotions are elicited and expressed and how the emotional range of individuals develops over their lifetime The author's approach puts emotion in a central role as a complex patterned organic reaction to both daily events and long term efforts on the part of the individual to survive flourish and achieve In his view emotions cannot be divorced from other functions whether biological social or cognitive and express the intimate personal meaning of what individuals experience As coping and adapting processes they are seen as part of the ongoing effort to monitor changes stimuli and stresses arising from the environment After defining emotion and discussing issues of classification and measurement Lazarus turns to the topics of motivation cognition and causality as key concepts in this theory Next he looks at individual emotions both negative and positive and examines their development in terms of social influences and individual events Finally he considers the long term consequences of emotion on physical health and well being and the treatment and prevention of emotional dysfunction The book draws together the relevant research from a wide variety of sources and distills the author's pioneering work in the field over the last forty years As a comprehensive treatment of the emotions the book will interest students clinicians and researchers involved in personality social and clinical psychology as well as cognitive and developmental psychology It may also be used as a supplemental textbook in courses on the psychology of adjustment emotion and feeling Life and Death Under High Technology Medicine Ian Robinson, 1994 The proceedings of a colloquium at Brunel the University of West London at which British American Canadian and Australian scholars and practitioners of specialized fields reflect on how developments at the
