## **Emotional Life And The Politics Of Welfare:**

**Emotional Life and the Politics of Welfare** P. Hoggett, 2000-08-22 Social policy and political theory are based upon rationalist models of the human subject Drawing particularly upon contemporary Kleinian and feminist political theory the author explores the powerful role that emotions such as love hate and fear play in the development of the human subject From this base the book then examines a range of contemporary issues such as employment dependency care and generosity conflict and oppression which are relevant to struggles around the welfare state

*The Emotional Politics of Social Work and Child Protection* Joanne Warner, 2015-01-12 Social work and child protection systems have for several decades been subject to cycles of crisis and reform with each crisis drawing intense media and political scrutiny In this book Joanne Warner argues that to understand the nature of these cycles we have to pay attention to the importance of collective emotions such as anger shame and fear To do so she introduces the concept of emotional politics Using a range of cases from the United Kingdom the United States the Netherlands and New Zealand Warner reveals that collective emotions are central to constructions of risk and blame and that they are generated and reflected by official documents politicians and the media She also suggests strategies for challenging emotional politics including identifying models for a more politically engaged stance for the social work profession

**Power, Politics and the Emotions** Shona Hunter, 2015-06-05 How can we rethink ideas of policy failure to consider its paradoxes and contradictions as a starting point for more hopeful democratic encounters Offering a provocative and innovative theorisation of governance as relational politics the central argument of *Power Politics and the Emotions* is that there are sets of affective dynamics which complicate the already materially and symbolically contested terrain of policy making This relational politics is Shona Hunter's starting point for a more hopeful but realistic understanding of the limits and possibilities enacted through contemporary governing processes Through this idea Hunter prioritises the everyday lived enactments of policy as a means to understand the state as a more differentiated and changeable entity than is often allowed for in current critiques of neoliberalism But Hunter

reminds us that focusing on lived realities demands a melancholic confrontation with pain and the risks of social and physical death and violence lived through the contemporary neoliberal state This is a state characterised by the ascendancy of neoliberal whiteness a state where no one is innocent and we are all responsible for the multiple intersecting exclusionary practices creating its unequal social orderings The only way to struggle through the central paradox of governance to produce something different is to accept this troubling interdependence between resistance and reproduction and between hope and loss Analysing the everyday processes of this relational politics through original empirical studies in health social care and education the book develops an innovative interdisciplinary theoretical synthesis which engages with and extends work in political science cultural theory critical race and feminist analysis critical psychoanalysis and post material sociology
