Emotions What They Are And How They Affect Us:

Self and Affect Stefan Lang, Maik Niemeck, 2025-01-11 The self self awareness and emotions are central subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness

Emotions and Personhood Giovanni Stanghellini, René Rosfort, 2013-02-07 How does a person experience emotions What is the relationship between the experiential and biological dimensions of emotions How do emotions figure in a person's relation to the world and to other people How do emotions feature in human vulnerability to mental illness Do they play a significant role in the fragile balance between mental health and illness If emotions are in fact significant how are they relevant for treatment Emotions and personhood are important notions within the field of mental health care What they are and how they are related though is less evident This book provides a framework for understanding this relationship The authors argue for an account of emotions and personhood that attempts to understand human emotions from the combined approach of philosophy and psychopathology taking its models particularly from hermeneutical phenomenology and from dialectical psychopathology Within the book the authors develop a basic set of concepts for understanding what emotional experience means for a human person with the assumption that human emotional experience is fragile a fact which entails vulnerability to mental disturbance Drawing on research from psychiatry psychopathology philosophy and neuroscience the book will be valuable for both students and researchers in these disciplines and more broadly within the field of mental health

Thinking Through Feeling Anastasia Philippa Scrutton, 2011-10-06 Contemporary debates on God's emotionality are divided between two extremes Impassibilists deny God's emotionality on the basis of God's omniscience omnipotence and incorporeality Passibilists seem to break with tradition by affirming divine emotionality often focusing on the idea that God suffers with us Contemporary philosophy of emotion reflects this divide Some philosophers argue that emotions are voluntary and intelligent mental events making them potentially compatible with omniscience and omnipotence Others claim that emotions are involuntary and basically physiological rendering them inconsistent with traditional divine attributes Thinking Through Feeling God Emotion and Passibility creates a three way conversation between the debate in theology contemporary philosophy of emotion and pre modern particularly Augustinian and Thomist conceptions of human affective experience It also provides an exploration of the intelligence and value of the emotions of compassion anger and jealousy

Jasper,2018-05-24

In Donald Trump s America protesting has roared back into fashion The Women s March held the day after Trump s inauguration may have been the largest in American history and resonated around the world Between Trump s tweets and the march s popularity it is clear that displays of anger dominate American politics once again There is an extensive body of research on protest but the focus has mostly been on the calculating brain a byproduct of structuralism and cognitive studies and less on the feeling brain James M Jasper s work changes that as he pushes the boundaries of our present understanding of the social world In *The Emotions of Protest* Jasper lays out his argument showing that it is impossible to separate cognition and emotion At a minimum he says we cannot understand the Tea Party or Occupy Wall Street or pro and anti Trump rallies without first studying the fears and anger moral outrage and patterns of hate and love that their members feel This is a book centered on protest but Jasper also points toward broader paths of inquiry that have the power to transform the way social scientists picture social life and action Through emotions he says we are embedded in a variety of environmental bodily social

moral and temporal contexts as we feel our way both consciously and unconsciously toward some things and away from others Politics and collective action have always been a kind of laboratory for working out models of human action more generally and emotions are no exception Both hearts and minds rely on the same feelings racing through our central nervous systems Protestors have emotions like everyone else but theirs are thinking hearts not bleeding hearts Brains can feel and hearts can think
