Hojat offers all of us in healthcare education an uplifting magnum opus that is sure to greatly enhance how we conceptualize measure and teach the central professional virtue of empathy. Hojat's new *Empathy in Health Professions Education and Patient Care* provides students and professionals across healthcare with the most scientifically rigorous conceptually vivid and comprehensive statement ever produced proving once and for all what we all know intuitively: empathy is healing both for those who receive it and for those who give it. This book is filled with great science, great philosophizing, and great how-to approaches to education. Every student and practitioner in healthcare today should read this and keep it by the bedside in a permanent place of honor.

Stephen G. Post, Ph.D., Professor of Preventive Medicine and Founding Director of the Center for Medical Humanities, Compassionate Care, and Bioethics, School of Medicine, Stony Brook University.

Dr. Hojat has provided in this new edition a definitive resource for the evolving area of empathy research and education. For those engaged in medical student or resident education and especially for those dedicated to efforts to improve the patient experience, this book is a treasure trove of primary work in the field of empathy.

Leonard H. Calabrese, D.O., Professor of Medicine, Cleveland Clinic Lerner College of Medicine of Case Western Reserve University.

The latest edition of *Empathy in Health Professions Education and Patient Care* grounds the clinical art of empathic caring in the newly recognized contributions of brain imagery and social cognitive neuroscience. Furthermore, it updates the accumulating empirical evidence for the clinical effects of empathy that has been facilitated by the widespread use of the Jefferson Scale of Empathy, a generative contribution to clinical research by this book's author.

In addition, the book is so coherently structured that each chapter contributes to an overall understanding of empathy while also covering its subject so well that it could stand alone. This makes *Empathy in Health Professions Education and Patient Care* an excellent choice for clinicians, students, educators, and researchers.

Herbert Adler, M.D., Ph.D., Clinical Professor of Psychiatry and Human Behavior, Sidney Kimmel Medical College at Thomas Jefferson University.

It is my firm belief that empathy as defined and assessed by Dr. Hojat in his seminal book has far-reaching implications for other areas of human interaction, including business management, government, economics, and international relations.

Amir H. Mehryar, Ph.D., Emeritus Professor of Behavioral Sciences and Population Studies, Institute for Research and Training in Management and Planning, Tehran, Iran.

Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma Mohammad H. Tamdgidi, 2020-01-20

In this major new study in the sociology of scientific knowledge, social theorist Mohammad H. Tamdgidi reports having unriddled the so-called quantum enigma. This book opens the lid of the Schrödinger's Cat box of the quantum enigma after decades and finds something both odd and familiar. Not only the cat is both alive and dead; it has morphed into an elephant in the room in whose interpretation Einstein, Bohr, Bohm, and others were each both right and wrong because the enigma has acquired both localized and spread-out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts. The book offers in a transdisciplinary and transcultural sociology of self-knowledge framework a

relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In *Unriddling the Quantum Enigma* the first volume of the series commonly titled *Liberating Sociology From Newtonian toward Quantum Imaginations* sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary scientists and scholars in the field This study is the first in the monograph series *Tayyebah Series in East West Research and Translation of Human Architecture Journal of the Sociology of Self Knowledge XIII 2020* published by OKCIR Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics OKCIR is dedicated to exploring in a simultaneously world historical and self reflective framework the human search for a just global society It aims to develop new conceptual methodological theoretical historical practical pedagogical inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world history and her his selves constitute one another Reviews Mohammad H Tamdgidi s *Liberating Sociology From Newtonian Toward Quantum Imaginations Volume 1 Unriddling the Quantum Enigma* hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science namely many practitioners allegiance consciously or otherwise to persisting conceptions of science that get in the way of scientific and other forms of theoretical advancement Newtonianism has achieved the status of an idol and its methodology a fetish the consequence of which is an ongoing failure to think through

important problems of uncertainty indeterminacy multivariation multidisciplinary and false dilemmas of individual agency versus structure among many others Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering in effect a call for its teleological suspension thinking beyond disciplinary through drawing upon and communicating with the resources of quantum theory not as a fetish but instead as an opening for other possibilities of social including human understanding The implications are far reaching as they offer as the main title attests liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things social This is exciting work A triumph The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done Professor Lewis R Gordon Honorary President of the Global Center for Advanced Studies and author of Disciplinary Decadence Living Thought in Trying Times Routledge Paradigm 2006 and Freedom Justice and Decolonization Routledge forthcoming 2020 Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of time and space Mohammad H Tamdgidi has produced a tour de force in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non dualistic non reductionist transcultural transdisciplinary post Einsteinian quantum concept of TimeSpace Tamdgidi goes beyond previous efforts done by titans of social theory such as Immanuel Wallerstein and Kyriakos Kontopoulos This book is a quantum leap in the social sciences at large Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews This book is a masterpiece in social theory for a 21st century decolonial social science A must read Professor Ramon Grosfoguel University of California at Berkeley Tamdgidi s Liberating Sociology succeeds in adding physical structures to the breadth of the world changing vision of C Wright Mills the man who mentored me at Columbia Relativity theory and quantum mechanics can help us to understand the human universe no less than the physical universe Just as my Creating Life Before Death challenges bureaucracy s conformist orientation so does Liberating Sociology liberate the infinite possibilities inherent in us Given our isolation in the Coronavirus era we have time to follow Tamdgidi in his journey into the depth of inner space where few men have gone before It is there that we can gain emotional strength just as Churchill Roosevelt and Mandela empowered themselves That personal development was needed to address not only their own personal problems but also the mammoth problems of their societies We must learn to do the same Bernard Phillips Emeritus Sociology Professor Boston University
