African Settings in Contemporary American Novels Dave Kuhne, 1999-05-30 Africa has long captured the Western imagination as a land shrouded in danger and mystery British and American novels written before World War II established popular conventions and stereotypes about Africa that have been increasingly challenged by contemporary American novels set in Africa Kuhne's book overviews the ways in which Africa has been employed as a powerful setting for American novels written since World War II Kuhne argues that contemporary American novels with African settings are largely didactic that these novels convey specific lessons about Africa and Africans and that they compare African and American cultures in order to evaluate and critique the two worlds The book begins by summarizing the conventions and themes Westerners have traditionally associated with Africa and by detailing how British and American authors from Aphra Behn to Ernest Hemingway depicted Africa before World War II It then looks at contemporary American novels set in invented African nations novels that typically suggest that the problems that trouble actual African nations are the result of colonialism A separate chapter then examines the African novels of African Americans which generally aim to correct the historical record refute stereotypes and detail the horrors of the slave trade The volume also looks at genre fiction set in Africa while a final chapter discusses postcolonial novels with African settings

The Empire's of J. G. Ballard David Ian Paddy, 2015-08-25 J G Ballard once declared that the most truly alien planet is Earth and in his science fiction he abandoned the traditional imagery of rocket ships traveling to distant galaxies to address the otherworldliness of this world The Empires of J G Ballard is the first extensive study of Ballard's critical vision of

nation and empire of the political geography of this planet Paddy examines how Ballard's self-perceived status as an outsider and exile the Sheppertonian from Shanghai generated an outlook that celebrated worldliness and condemned parochialism This book brings to light how Ballard wrestled with notions of national identity and speculated upon the social and psychological implications of the post-war transformation of older models of empire into new imperialisms of consumerism and globalization Presenting analyses of Ballard's full body of work with its tales of reverse colonization psychological imperialism the savagery of civilization estranged Englishmen abroad and at home and multinational communities built on crime The Empires of J G Ballard offers a fresh perspective on the fiction of J G Ballard The Empires of J G Ballard An Imagined Geography offers a sustained and highly convincing analysis of the imperial and post-imperial histories and networks that shape and energise Ballard's fictional and non-fictional writings To what extent can Ballard be considered an international writer What happens to our understanding of his post-war science fictions when they are opened up to the language and logics of post-colonialism And what creative and critical roles do the spectres of empire play in Ballard's visions of modernity Paddy follows these and other fascinating lines of enquiry in a study that is not only essential reading for Ballard students and scholars but for anyone interested in the intersections of modern and contemporary literature history and politics Jeanette Baxter Anglia Ruskin University Shanghai made my father Arriving in England after WW2 he was a person of the world who'd witnessed extremes of human experience and remained the outsider observing life from his home in Shepperton 1930s Shanghai Paris of the East was a mix of international sophistication and violence unfettered capitalism and acute poverty American cars martinis and Coca Cola a place marked by death and war It had a profound influence on my father and his imagination Dr Paddy's fascinating book explores my father's fiction within an international context and offers a profound reading of a man who always kept his eyes and mind open to the world Fay Ballard *Novel Cultivations* Elizabeth Hope Chang, 2019-03-25 Shortlisted for the Best Book Prize from the British Society of Literature and Science Nineteenth-century English nature was a place of experimentation exoticism and transgression as site and emblem of the global exchanges of the British Empire Popular attitudes toward the transplantation of exotic species botanical and human to Victorian greenhouses and cities found anxious expression in a number of fanciful genre texts including mysteries science fiction and horror stories Situated in a mid-Victorian moment of frenetic plant collecting from the far reaches of the British empire *Novel Cultivations* recognizes plants as vital and sentient subjects that serve often more so than people as actors and narrative engines in the nineteenth-century novel Conceptions of native and natural were decoupled by the revelation that nature was globally sourced a disruption displayed in the plots of gardens as in those of novels Elizabeth Chang examines here the agency asserted by plants with shrewd readings of a range of fictional works from monstrous rhododendrons in Daphne du Maurier's *Rebecca* and Mexican prickly pears in Olive Schreiner's *Story of an African Farm* to Algernon Blackwood's hair-raising *The Man Whom the Trees Loved* and other obscure ecogothic tales This provocative contribution to

ecocriticism shows plants as buttonholes between fiction and reality registering changes of form and content in both realms

The American Dream and the Popular Novel Elizabeth Long, 2017-10-23 This title, originally published in 1985, examines conceptions of success and the good life expressed in bestselling novels ranging from historical sagas and spy thrillers to more serious works by Updike, Bellows, Steinbeck, and Mailer published from 1945 to 1975. Using these popular books as cultural evidence, Elizabeth Long argues that the meaning of the American dream has changed dramatically but in a more complex fashion than has been recognised by that country's most prominent social critics. Her study presents a challenge to prevailing social scientific views of contemporary American culture and represents both in theory and method an important contribution to the study of culture and social criticism.

This enormously popular genre continues to captivate people reading for pleasure, and it also commands a growing amount of academic interest. Included are alphabetically arranged reference entries on significant authors, along with works, themes, and other topics. The articles are written by scholars, librarians, and industry professionals with a deep knowledge of the genre and so provide a thorough understanding of the subject. An index provides easy access to information within the entries, and bibliographies at the end of each entry, a general bibliography, and a suggested romance reading list allow for further study of the genre.

Novel Environments Jayne Hildebrand, 2023-05-31 The environment concept has shaped humanity's relationship to the natural world and has drawn attention to the effects of human actions on our natural surroundings But when did we learn that we live in an environment While scholars have often located the emergence of the environment concept in twentieth century ecological and political thought *Novel Environments: Science Description and Victorian Fiction* reconstructs a longer and a specifically literary history It was in the descriptive worldmaking of the Victorian novel that the environment was first transformed from an abstraction into a vivid object of imagination and feeling Engaging the scientific theories of their contemporaries Mary Russell Mitford George Eliot Thomas Hardy and Robert Louis Stevenson turned to detailed description from gardens and landscapes to weather and atmospheres to model interactions between life and its surroundings Far from merely furnishing static background the descriptive apparatus of the Victorian novel imagined the nonhuman environment as dynamically involved with human action feeling and development In making this argument *Novel Environments* recovers the scientific vocabulary the Victorians used to name the surroundings of living organisms The word environment dominates our own way of speaking about the nonhuman world but nineteenth century scientific writers and novelists availed themselves of a richer conceptual lexicon which included environment along with less familiar concepts such as milieu medium and circumstance Jayne Hildebrand traces the development of Victorian environmental thought from the earliest theorization of physical surroundings as a dynamic influence in the life sciences through the idea of a singular medium in mid century organicism to the conception of the planet as an environmental system at the fin de siècle By showing how novelistic description helped to produce the modern environment concept Hildebrand sheds new light on the

relationship between Victorian literature and the life sciences and reveals how literary form has shaped the ecological ideas through which we apprehend the nonhuman world
