Farmer, Elizabeth Talbott, Kristen McMaster, David Lee, Terese C. Aceves, 2022-05-10 Divided into two volumes Handbook of Special Education Research provides a comprehensive overview of critical issues in special education research This first volume addresses key topics in theory methods and development exploring how these three domains interconnect to build effective special education research Each chapter features considerations for future research and implications for fostering continuous improvement and innovation Essential reading for researchers and students of special education this handbook brings together diverse and complementary perspectives to help move the field forward

Theory Building in Educational Research Nigel Kettley, 2013-02-14 This volume provides comprehensive guidance on the subjects of concept generation and theory building in educational research By deploying the conceptual methodological and theoretical principles of the Cambridge School of Sociology which underpin a range of contemporary empirical research the author shows how theory building and theory in contemporary educational research are in a state of crisis In his compelling analysis Nigel Kettley develops an alternative approach to theory building in educational research and explores a radical new system for facilitating the growth of knowledge and the development of sound policy recommendations in education studies

The SAGE Encyclopedia of Educational Research, Measurement, and Evaluation Bruce B. Frey, 2018-01-29 This encyclopedia is the first major reference guide for students new to the field covering traditional areas while pointing the way to future developments

Contemporary Special Education Research Russell Gersten, Ellen P. Schiller, Sharon R. Vaughn, 2000-03-01 Considerable research in the past 30 years has accumulated regarding the academic and social functioning of youngsters with disabilities Only in the past decade has there been sufficient special education research published from which meta analyses and syntheses can be conducted In this volume seven sets of authors grapple with synthesizing the knowledge base on an array of critical topics in the field of special education Among others specific chapters include a synthesis of what is known about effective instructional grouping practices for reading an examination of the differences between students classified as learning disabled and other low achieving students on a range of academic performance measures a review of effective instruction for English language learners an examination of the research on behavioral supports for low incidence special education populations a synthesis on how technology supports literary development across the full spectrum of disabilities categories These papers provide up to date informative summaries of current knowledge and a base from which further venture into the critical area of instructional intervention in special education can occur

Ethics in Educational Practice, Policy and Research David Bridges, 2023-11-25 Education is a social practice that poses ethical questions of policy and practice at every level and at almost every turn what we teach how we teach how we organise educational provision how we research it who controls it and what principles drive policy nationally and internationally This collection of papers is rooted in the author's experience in the education system nationally and internationally over half a century and reflects both

the educational history of this period and the author's experience as a teacher, parent, school governor, teacher trainer, educational researcher, senior manager in higher education and advisor to governments in many parts of the world. It is then historically located but the approach to ethical questions is primarily in the tradition of analytic philosophy and applied and situated ethics. The book is aimed at undergraduate and especially postgraduate students studying education including those interested in philosophy of education, lecturers in education and those conducting research and engaged in scholarly writing in higher education.

Handbook of International Research in Mathematics Education Lyn D. English, 2002-03. This state-of-the-art Handbook brings together important mathematics education research that makes a difference in both theory and practice: research that anticipates problems and needed knowledge before they become impediments to progress; interprets future-oriented problems into researchable issues; presents the implications of research and theory development in forms that are useful to practitioners and policymakers and facilitates the development of research communities to focus on neglected priorities or strategic opportunities. The volume represents a genuine attempt by contributors from around the world to advance the discipline rather than simply review what has been done and what exists. The Handbook was developed in response to a number of major global catalysts for change including the impact of national and international mathematics comparative assessment studies, the social, cultural, economic and political influences on mathematics education and research, the influence of progressively sophisticated and available technology and the increasing globalization of mathematics education and research. From these catalysts have emerged specific priority themes and issues for mathematics education research in the 21st century. Three key themes were identified for attention in this volume: life-long democratic access to powerful mathematical ideas; advances in research methodologies and influences of advanced technologies. Each of these themes is examined in terms of learners, teachers and learning contexts with theory development as an important component of all these aspects. Dynamic and forward-looking. The Handbook of International Research in Mathematics Education is distinguished by its focus on new and emerging theoretical models, perspectives and research methodologies; its uniformly high standard of scholarship and its emphasis on the international nature of mathematics education research. It is an essential volume for all researchers, professionals and students interested in mathematics education research in particular and more generally in international developments and future directions in the broad field of educational research.

Theory and Method in Higher Education Research Jeroen Huisman, Malcolm Tight, 2016-10-31 This volume of Theory and Method in Higher Education Research contains contemporary contributions to international debates regarding the application and development of theory and methodology in researching higher education

Student Engagement in Neoliberal Times Nick Zepke, 2016-12-14 This book investigates origins meanings uses and effects of student engagement

in higher education and addresses three core questions 1 Why is student engagement so visible in higher education today 2 What are its dominant characteristics 3 What is missing in the popular view of student engagement These questions pave the way for a fresh approach to student engagement The book argues that an elective affinity between student engagement and policies embedded in neoliberalism the dominant ideology of the early 21st century enables student engagement to transcend diverse intellectual and practice contexts This affinity encourages quality learning and teaching that enables student to succeed in their studies and future careers The book shows that focusing on neoliberal objectives for learning and teaching limits the potential of student engagement in higher education This conclusion leads to a critical and practical social ecological perspective that approaches engagement more as a pathway to social justice than as a list of techniques This book is a work of critical scholarship backed by empirical research It questions accepted theories and practices and offers fresh insights into student engagement in higher education including how engagement could promote social justice
