## **Empirical Studies Of Strategic Trade Policy:**

**Empirical Studies of Strategic Trade Policy** Paul Krugman, Alasdair Smith, 2007-12-01 Since the 1980s economists have used the concept of strategic trade policy which takes account of imperfect competition and increasing returns in the international marketplace to criticize conventional views about free trade According to the new view a government can take strategic steps to raise its income at another country's expense by subsidizing exports or erecting trade barriers protecting certain firms from foreign competition or promoting the development of new industries This volume looks at the experience of specific industries in order to determine the effectiveness of strategic trade policy in promoting economic growth The nine papers cover the U S and European auto industries the U S steel industry the commercial aircraft industry airline deregulation in Scandinavia and labor and industrial policy in Korea and Taiwan The authors refine the basic techniques for measuring policy effectiveness extend them to encompass industry dynamics and test the implications of new trade models International economists and trade experts in government and business will find important new insights into the role of strategic trade policy in international competitiveness

**Export Activity and Strategic Trade Policy** Horst Kräger, Klaus F. Zimmermann, 2012-12-06 New theories of international trade suggest that protectionism can make sense This finding depends on the introduction of market power and increasing returns to scale into the international trade theory The enormous political implications of this hypothesis have started a large interest in applied or empirical investigations of this issue However econometric work in international trade is comparatively scarce especially if it comes to testing with individual data Therefore this volume is considered to be a contribution to fill that gap The volume consists of three parts First issues in strategic trade are discussed by means of a survey on recent contributions of the literature and by a simulation exercise on optimal trade policy for imperfectly competitive industries Second a part investigating the determinants of trade flows studies the interrelationships between trade balances and exchange rates plant size and international trade and the relevance of firm size and market concentration for the degree of export market integration using business survey firm data Third there are studies on imperfect markets innovations and learning which demonstrate the importance of imperfect competition for international economics All contributions provide empirical evidence for the relevance of the newly developed trade theories and demonstrate useful quantitative techniques for their investigation

**Handbook of International Economics** G.M. Grossman, Kenneth Rogoff, 1997-10-24 **Handbook of International Economics** **Japanese Electronics Multinationals and Strategic Trade Policies** René Belderbos, 1997 Japanese electronics firms have grown into formidable competitors on world markets but have only expanded seriously their manufacturing presence world wide since 1985 This volume probes the difference of Japanese multinationals and examines how the United States and Europe have responded to the Japanese challenge Belderbos provides original insights into the determinants and effects of the internationalization of Japanese electronics firms and the relationship with trade policy measures in the United States and

the European Union      **From Adam Smith to Michael Porter** Tong-söng Cho, Hwy-Chang Moon, 2000 This book deals with important theories of international competitiveness and their strategic implications The theories range from classical theories such as Adam Smith's absolute advantage to new theories such as Michael Porter's diamond model      Strategic Trade Policy James A. Brander, 1995 This paper reviews the literature on strategic trade policy Strategic trade policy is defined as trade policy that conditions or alters a strategic relationship between firms implying that strategic trade policy focuses primarily on trade policy in the presence of oligopoly The key point is that strategic relationships between firms introduce additional motives for trade policy over and above terms of trade and other effects that arise in all market structures I demonstrate this general point using a simple game theoretic framework then present the major results of strategic trade policy using two models the third market model in which oligopolistic firms in two exporting nations export the good in question exclusively to a third country and the reciprocal markets model in which firms in two countries compete in each others markets The paper makes the well known point that slight differences in model structure can give rise to strikingly different trade policy implications but also seeks to emphasize the robust general points that emerge from the literature      **Applied International Trade Analysis** Harry Bowen, Abraham Hollander, Jean-Marie Viaene, 1998 An international trade text that integrates theoretical and applied methods      **Strategic Trade Policy: an Option for Developing Countries?** Leonor von Limburg, 2002 Do developing countries have anything to learn from the Strategic Trade Policy debate What lessons can they derive out of controversial models leading to contrasting perspectives about the impact of trade upon growth This book addresses such questions by offering a critical review of the main developments of trade theory concentrating on the implications of imperfect competition and increasing returns to scale in the analysis of trade It also discusses the trade growth relationship in the light of endogenous growth theories and explores the existence of a case for developing countries engaging in trade promotion of knowledge generating sectors An account of the experiences with different trade regimes of various East Asian and Latin American countries and CGE simulations of the effects of targeted trade promotion policies in Venezuela complement the analysis      **Non-tariff Barriers, Regionalism And Poverty: Essays In Applied International Trade Analysis** L Alan Winters, 2015-03-26 Non Tariff Barriers Regionalism and Poverty is a collection of key articles in three important areas of applied international trade research measuring non tariff barriers and their effects the consequences of regional trading arrangements especially on the countries excluded from them and the connection between international trade and poverty Drawing from 30 years of research and experience L Alan Winters illustrates the development of techniques of this field and his continued commitment to answering real policy questions at the times at which they are debated The collection shows the ways in which economic and econometric analysis can be used to answer real world problems rigorously in the area of international trade and trade policy Readers will find that some of the research included is of current methodological relevance and some of more historical significance This volume is invaluable

to anyone who is keen on developing their knowledge on trade policy regionalism or poverty three pressing issues in today's globalized world

**From Adam Smith to Michael Porter** Tong-s'ng Cho, 2013 This book provides a thorough explanation of the evolution of international competitiveness theories and their economic and strategic implications The theories range from classical theories such as Adam Smith's theory of absolute advantage to new theories such as Michael Porter's diamond model

**Imperfect Competition And Political Economy** Colin Carter, 2019-04-24 This book presents International Agricultural Trade Research Consortium commissioned papers The papers systematically explore the conceptual and empirical dimensions of the new trade theory and try to determine the potential application to agricultural trade and trade policy analysis

**International Trade, Factor Movements, and the Environment** Michael Rauscher, 1997 Trade and the environment has become a major area of international political dispute This study investigates the interdependencies between environmental policies and international trade policies Does liberalization of international goods and factor markets cause environmental disruption and welfare losses Will countries institute lax ecological regulations to favour their domestic producers Should trade restrictions be used for environmental reasons and can environmental policy instruments be used to achieve trade related objectives Should there be what the author terms a green GATT The approach is mainly theoretical and uses traditional trade models like Heckscher Ohlin as well as non competitive models of the new trade theory and public choice Some other important but often neglected aspects such as trade in hazardous wastes and the foreign debt problem with the possibility of debt for nature swaps are also considered Finally International Trade Factor Movements and the Environment addresses institutional issues on both national and international levels The book will be essential reading for all international and environmental economists
