Employing Qualitative Methods In The Private Sector:

Employing Qualitative Methods in the Private Sector Marilyn L. Mitchell, 1998-07-10 Each year academic institutions produce thousands of social science graduates skilled in applied social research many more than can be absorbed in the teaching profession In one of the latest volumes in the Qualitative Research Methods series author Marilyn Mitchell provides information often left out of the social science curriculum how and where can social scientists put their skills to use in the private sector *Employing Qualitative Methods in the Private Sector* outlines some of the basic private sector research settings and provides clear and sensible advice on how one can rename one's skills and market oneself most effectively to the business community Mitchell herself employed in the private sector also examines project and business management Straightforward and pragmatic *Employing Qualitative Methods in the Private Sector* is an essential tool for the researcher looking for new avenues in which to apply their research *Teaching Qualitative Research* Rosalind E.

Hurworth, 2008-01-01 Over the past two decades there has been a plethora of books for students about how to tackle Qualitative Research QR but absolutely nothing on how to teach it This book attempts to redress the imbalance by presenting a history of what is known about QR teaching as well as to bring alive current QR teaching and learning through a set of Australian and British case studies Courses visited were located within a variety of disciplines including Education Sociology Anthropology Nursing Psychology Communications and Evaluation were taught by both experienced and inexperienced lecturers were either presented alone or in pairs took place in a range of institutions lasted from seven weeks to a year and involved from 15 to over 100 students It emerged however that no matter what the context several common issues were raised such as Should you teach theory practice or both How do you determine a curriculum for a QR course What is the best way to manage student projects How should students of QR be assessed In what ways can the constraints of University structures be confronted and How can lecturer deficiencies in training and experience be overcome To answer such questions Professor Hurworth draws deftly from personal observations and rich conversations with both lecturers and students from all the courses described As a result many practical ideas for moving the teaching and learning of QR forward are suggested **Writing Up Qualitative Research** Harry F. Wolcott, 1990-08 Written in an accessible style this volume

tackles the topics of beginning to write continuing to write editing and getting published It is indispensable not only to qualitative researchers but to anyone engaged in social research for whom the link between conducting research and writing it up seems more like an obstacle than an opportunity **Reliability and Validity in Qualitative Research** Jerome Kirk, Marc L. Miller, 1986 Qualitative research is a sociological and anthropological tradition of inquiry Most critically qualitative research involves sustained interaction with the people being studied in their own language and on their own turf To see qualitative research as strictly disengaged from any form of counting is to miss the point that its basic strategy depends on the reconciliation of diverse research tactics It is our view that qualitative research can be performed as social

science Understanding the workings of a scientific endeavor whether it is of the natural or social variety entails an appreciation of its objectivity By this convention the objectivity of a piece of qualitative research is evaluated in terms of the reliability and validity of its observations the two concepts to which this monograph is devoted **Focus Groups as Qualitative Research** David L. Morgan, 1996-10-23

The extensively revised edition of the best selling Focus Groups as Qualitative Research continues to provide an excellent guide for researchers across the disciplines Reflecting the many changes that have occurred in the study of focus groups in recent years the book begins with an updated introduction offering a discussion of current social science approaches to focus groups Expanded coverage on the comparison of focus groups to individual interviews follows and there is more material on the strengths and weaknesses of focus groups The section on self contained focus groups has also been expanded Subsequent chapters have been revised to include examples from social scientists who have established their own practices and methodological research on focus groups In conclusion the author offers future directions and references that take into account the explosive growth of focus groups as a research tool for all social scientists A Narrative Approach to Organization Studies Barbara Czarniawska-Joerges, 1998

From setting up the fieldwork to writing up the research this volume takes readers through the narrative approach to qualitative research with a focus on organization studies Inspired by the work of Bakhtin Eco Rorty and Silverman the author demonstrates that narratives are still the main carriers of knowledge in all societies *Research Methods for Educational Leadership and Management* Musundire, Austin, 2025-05-13 Various research methods including action case study and experimental research can be tailored for educational leadership and management Different research designs data collection techniques and data analysis methods have differing strengths weaknesses and challenges As a result it is crucial to develop the skills and confidence needed to conduct high quality research Developing a deeper understanding of how to conduct rigorous research may consequently foster more effective and innovative research leading to improved educational policies practices and outcomes Research Methods for Educational Leadership and Management illustrates how these methods can be effectively applied to address issues in educational leadership and management It promotes best practices in educational research by highlighting ethical considerations addressing common challenges and providing strategies for overcoming these obstacles Covering topics such as equity employment practices high performance culture and professional competencies this book is an excellent resource for educational leaders school managers school administrators policymakers researchers professionals scholars academicians and more *Research Methods in Public Administration and Nonprofit Management*

David E. McNabb, Never HIGHLIGHT a Book Again Includes all testable terms concepts persons places and events Cram101 Just the FACTS101 studyguides gives all of the outlines highlights and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanies 9780765628794 This item is printed on demand **The Ethnographer's Method** Alex Stewart, 1998-06-17 In this volume Alex Stewart shows novice and

experienced ethnographers how to explain and present the methods they use in terms understood by those not in the field

The Business of Ethnography Brian Moeran, 2021-01-07 Can an anthropologist help us understand the world of business Armed with this question veteran anthropologist Brian Moeran embarks on an in depth study of cultural production and creative industries in Japan At once the blundering ethnographer and shrewd observer Moeran is able to shed light not only on social behavior and human relations in general but more specifically on the importance of strategic exchange to all business practices Moeran's fieldwork rooted in participant observation of business life in communities and corporations leads him to an original theory of how business operates Culture is not all powerful Moeran shows Instead social structures strongly influence behavior At the heart of Moeran's analysis is a firm belief in fieldwork and ethnography terms much bandied about in business management and cultural studies but rarely undertaken in depth *The Business of Ethnography* not only provides a useful methodology for people studying or wishing to understand business but also acts as a clarion call for anthropologists to rethink their discipline beyond traditional fieldwork sites

Conducting Interpretive Policy Analysis Dvora Yanow, 2000 This book in the QRM series is designed for a wide variety of research methods courses taught in various departments It will be of most interest to those in Public Policy Political Science and Public Administration departments but will also be of interest to researchers in Sociology Anthropology Communication and Education departments among others The book fills a gap in the traditional policy analysis coverage which is usually heavily quantitative It will also fill a gap in the QRM series in covering the discipline of political science which is warming to qualitative methodology slowly There has been much in the journal literature in the past 15 years calling for more interpretive approaches to the study of public policy Yanow has been in the middle of it

Feminist Fieldwork Analysis Sherryl Kleinman, 2007-04-20 Advice for researchers who want to translate a feminist sensibility into qualitative analysis Each chapter provides a guiding feminist principle studies that show the principle in action and analytic questions that researchers can keep in mind in the field or at the desk

Participatory Action Research Alice McIntyre, 2007-11-20 Participatory Action Research PAR introduces a method that is ideal for researchers who are committed to co developing research programs with people rather than for people The book provides a history of this technique its various strands and the underlying tenets that guide most projects It then draws on two PAR projects that highlight three integral dimensions the meaning of participation the way action manifests itself and the strategies for gathering analyzing and disseminating information Author Alice McIntyre describes the various ways in which PAR is carried out depending on for example the issue under investigation the site of the project the project participants people's access to resources and other related issues Intended Audience This resource is an ideal supplement for graduate courses PAR qualitative research and various types of action based research

Resources for Nursing Research Cynthia Clamp, Stephen Gough, Lucy Land, 2005-01-11 The 4th edition of this extensive text is an outstanding resource prepared by nurses and a librarian for nurses In a structured and helpful style it presents thousands of items from the literature published

papers reports books and electronic resources as a clear accessible and most of all useful collection The efforts to signpost and lead the reader to the sought for information are effective and well conceived and the How to use this book section is remarkably simple the book should be found in every nursing and health library every research institute and centre and close to many career researchers desks RCN Research This latest edition of Resources for Nursing Research provides a comprehensive bibliography of sources on nursing research and includes references for books journal papers and Internet resources Designed to act as a signpost to available literature in the area this Fourth Edition covers the disciplines of nursing health care and the social sciences Entries are concise informative and accessible and are arranged under three main sections Sources of Literature covers the process of literature searching including using libraries and other tools for accessing literature Methods of Inquiry includes an introduction to research how to conceptualize and design nursing and health research measurement and data collection and the interpretation and presentation of data The Background to Research in Nursing encompasses the development of nursing research the profession s responsibilities the role of government funding research roles and careers and education for research Fully revised and updated the Fourth Edition includes just under 3000 entries of which 90% are new It has extensive coverage of US UK literature and other international resources This new edition will be an essential guide for all those with an interest in nursing research including students teachers librarians practitioners and researchers

The Long Interview Grant David McCracken, Grant McCracken, 1988-09 The Long Interview focuses on one of the most powerful and efficient of these methods the intensive interview The intensive interview is a sharply focused and rapid process that seeks to diminish the indeterminacy and redundancy that attends more unstructured research processes *Islam, Standards, and Technoscience* Johan

Fischer, 2015-10-23 Halal literally permissible or lawful production trade and standards have become essential to state regulated Islam and to companies in contemporary Malaysia and Singapore giving these two countries a special position in the rapidly expanding global market for halal products in these nations state bodies certify halal products as well as spaces shops factories and restaurants and work processes and so consumers can find state halal certified products from Malaysia and Singapore in shops around the world Building on ethnographic material from Malaysia Singapore and Europe this book provides an exploration of the role of halal production trade and standards Fischer explains how the global markets for halal comprise divergent zones in which Islam markets regulatory institutions and technoscience interact and diverge Focusing on the bigger institutional picture that frames everyday halal consumption Fischer provides a multisited ethnography of the overlapping technologies and techniques of production trade and standards that together warrant a product as halal and thereby help to format the market Exploring global halal in networks training laboratories activism companies shops and restaurants this book will be an essential resource to scholars and students of social science interested in the global interface zones between religion standards and technoscience *Ethnomethodology* Alain Coulon, 1995-04-20 Ethnomethodology is a

research strategy that systematically examines the everyday interactions between people In the past three decades an impressive body of work has been created under this label by such noted scholars as Garfinkel Sacks Cicourel Schlegloff Mehan and Emerson In this volume Alain Coulon demystifies the ethnomethodological tradition and its often arcane nomenclature Coulon explains its history its major features and the major criticisms leveled at it in terms that are accessible to students and novices Covering both the theoretical notions and main ethnomethodological practices and replete with examples of key work in the area Ethnomethodology is the first accessible brief introduction to this important qualitative research tradition Exploratory Research in the Social Sciences Robert A. Stebbins, 2001-05-14 Robert Stebbins addresses an area of social science that receives scant attention exploration as a methodological process The author emphasises its importance then leads the reader through the process in a highly readable way *Narrative Analysis* Catherine Kohler Riessman, 2022-05-06 Recipient of the 1994 Critics Choice Award from the American Educational Studies Association People tell stories to help organize and make sense of their lives In the past their narratives have often been torn apart by social scientists looking for themes variables and specific answers to specific questions But in recent years the development of narrative analysis has given life to the study of the narrative as a form of information for social research Why are they constructed as they are How does one dissect a narrative to understand the lived experience of the narrator What steps can the researcher take to translate these tales and life stories into usable research Catherine Kohler Riessman provides a detailed primer on the use of narrative analysis its theoretical underpinnings and worldview and the methods it uses Replete with examples and transcriptions from previous narrative studies Narrative Analysis is a useful introduction to this growing body of literature **The Active Interview** James A. Holstein, Jaber F. Gubrium, 1995-04-20 The interpretive turn in social science has taken the interview and turned it upside down Once thought to be the pipeline through which information was transmitted from a passive subject to an omniscient researcher the new active interview considers the interviewer and interviewee as equal partners in constructing meaning around an interview event This changes everything from the way of conceiving a sample to the ways in which the interview may be conducted and the results analyzed In this brief volume James A Holstein and Jaber F Gubrium outline the differences between the active interview and the traditional interview and give novice researchers clear guidance on conducting an interview that is the rich product of both parties Students and professionals who use qualitative methods in the fields of sociology anthropology communication psychology education social work gerontology and management will find The Active Interview to be a helpful and cogent guidebook
