National Commission on Employment and Unemployment Statistics, 1979 **Counting the Labor Force** , 1900 *Gender Challenges* Bina Agarwal, 2015-12-21 An internationally acclaimed economist Bina Agarwal is known for her path breaking writings on agriculture property rights and the environment Her three volume compendium brings together a selection of her essays written over three decades Combining diverse disciplines methodologies and cross country comparisons the essays challenge standard economic analyses and assumptions from a gender perspective They provide original insights on a wide range of theoretical empirical and policy issues of continuing importance in contemporary debates The first volume spans varied dimensions of the author s writings on agrarian change from 1981 to the present It identifies gender inequalities in the impact of agricultural modernisation and technical change across Asia and Africa the links between women poverty and

economic growth processes and data biases in measuring women's work. It traces the gendered costs of droughts and famine and challenges top-down methods of innovation diffusion. Focusing on the key role of women farmers in food security, it also offers innovative solutions including public land banks and group farming. The second volume focuses on the author's paradigm-shifting work on women's property status in South Asia. Challenging conventional approaches to women's empowerment, it demonstrates how promoting access to property, especially land, is key to enhancing women's economic and social well-being and deterring domestic violence. It details gender inequalities in inheritance laws, public policies, and land struggles and presents the bargaining framework for understanding and finding ways of overcoming these inequalities both within families and in markets, communities, and vis-à-vis the state. This third volume traces the relationship between gender and environmental change. Critiquing ecofeminist assumptions, it presents an alternative theoretical framework. It also examines the causes of women's absence as well as the impact of their presence in environmental collective action. Based on innovative fieldwork on community institutions for forest governance, the author demonstrates how a critical mass of women can significantly improve conservation outcomes. In conclusion, she reflects on which features of feminist scholarship make for an effective challenge to mainstream economics.

Employment, Unemployment and Wages in Turkey Tuncer Bulutay, 1995

Marginal Workers, Marginal Jobs Teresa A. Sullivan, 2014-11-06

Unemployment levels have received a great deal of attention and discussion in recent years. However, another labor category, underemployment, has virtually been ignored. Underutilized or underemployed workers are those who are experiencing inadequate hours of work, insufficient levels of income, and mismatch of occupation and skills. *Marginal Workers, Marginal Jobs* addresses two principal issues: how can we measure underemployment, and how can we explain its prevalence? To answer the first question, Teresa Sullivan examines yardsticks in use, demonstrates their inadequacy, and develops a different measure that is easy to interpret and is usable by both demographers and economists. In answering the second, she analyzes 1960 and 1970 census data to determine the relative effects of population composition and job structure on levels of employment. One of the important contributions of Sullivan's study is to distinguish between marginal workers and marginal jobs in explaining underutilization. Previous explanations, including the widely used dual market theory, have not stressed this analytic distinction. In addition, her work accounts separately for the various types of marginality and seeks to show the condition of workers who are marginal on more than one count, for example, those who are both young and black or old and female. A provocative study based on large samples of the U.S. population, this book raises important questions about a critical subject and makes a significant contribution to the theory of underutilization.
