Empowered Participation Reinventing Urban Democracy:

Empowered Participation Archon Fung, 2009-01-10 Every month in every neighborhood in Chicago residents teachers school principals and police officers gather to deliberate about how to improve their schools and make their streets safer Residents of poor neighborhoods participate as much or more as those from wealthy ones All voices are heard Since the meetings began more than a dozen years ago they have led not only to safer streets but also to surprising improvements in the city's schools Chicago's police department and school system have become democratic urban institutions unlike any others in America Empowered Participation is the compelling chronicle of this unprecedented transformation It is the first comprehensive empirical analysis of the ways in which participatory democracy can be used to effect social change Using city wide data and six neighborhood case studies the book explores how determined Chicago residents police officers teachers and community groups worked to banish crime and transform a failing city school system into a model for educational reform The author's conclusion Properly designed and implemented institutions of participatory democratic governance can spark citizen involvement that in turn generates innovative problem solving and public action Their participation makes organizations more fair and effective Though the book focuses on Chicago's municipal agencies its lessons are applicable to many American cities Its findings will prove useful not only in the fields of education and law enforcement but also to sectors as diverse as environmental regulation social service provision and workforce development

Transbordering Latin Americas Clara

Irazábal, 2013-11-07 This book examines transborder Latin American sociocultural and spatial conditions across the globe and at different scales from gendered and racialized individuals to national and transnational organizations. Gathering scholars from the spatial sciences, architecture, urban design, urban planning and geography as well as sociology, anthropology, history and economics, the volume explores these transbordering practices of place making and community building across cultural and nation-state borders, examining different agents: individuals, ethnic and cultural groups, NGOs, government agencies that are engaged in transnational transborder living and city making practices, reconceiving notions of state identity and citizenship and showing how subjected populations resist, adapt or coproduce transnational transborder projects and in the process help shape and are shaped as transborder subjects.

Democracy's Lot Candice Rai, 2016-04-15

Traces the communication strategies of various constituencies in a Chicago neighborhood, offering insights into the challenges that beset diverse urban populations and demonstrating persuasively rhetoric's power to illuminate and resolve charged conflicts. Candice Rai's *Democracy's Lot* is an incisive exploration of the limitations and possibilities of democratic discourse for resolving conflicts in urban communities. Rai roots her study of democratic politics and publics in a range of urban case studies focused on public art, community policing and urban development. These studies examine the issues that erupted within an ethnically and economically diverse Chicago neighborhood over conflicting visions for a vacant lot called Wilson Yard. Tracing how residents with disparate agendas organized factions and deployed language, symbols and other rhetorical devices in the struggle over Wilson Yard's redevelopment and other contested public spaces, Rai demonstrates that rhetoric is not solely a tool of elite communicators but rather a framework for understanding the agile communication strategies that are improvised in the rough and tumble work of democratic life. Wilson Yard, a lot eight blocks north of Wrigley Field in Chicago's gentrifying Uptown neighborhood, is a diverse enclave of residents enlivened by recent immigrants from Guatemala, Mexico, Vietnam, Ethiopia and elsewhere. The neighborhood's North Broadway Street witnesses a daily multilingual hubbub of people from a wide spectrum of income levels, religions, sexual identifications and interest groups. When a fire left the lot vacant, this divided community projected on Wilson Yard disparate and conflicting aspirations, the resolution of which not only determined the fate of this particular urban space but also revealed the lot of democracy itself as a process of complex problem solving. Rai's detailed study of one block in an iconic American city brings into vivid focus the remarkable challenges that beset democratic urban populations anywhere on the globe and how rhetoric supplies a framework to understand and

resolve those challenges Based on exhaustive field work Rai uses rhetorical ethnography to study competing publics citizenship and rhetoric in action exploring rhetorical invention the discovery or development by individuals of the resources or methods of engaging with and persuading others She builds a case for democratic processes and behaviors based not on reflexive idealism but rather on the hard work and practice of democracy which must address apathy passion conflict and ambivalence

Co-Production and Co-Creation Taco Brandsen, Bram Verschuere, Trui Steen, 2018-03-15 Co production and co creation occur when citizens participate actively in delivering and designing the services they receive It has come increasingly onto the agenda of policymakers as interest in citizen participation has more generally soared Expectations are high and it is regarded as a possible solution to the public sector's decreased legitimacy and dwindling resources by accessing more of society's capacities In addition it is seen as part of a more general drive to reinvigorate voluntary participation and strengthen social cohesion in an increasingly fragmented and individualized society

Co Production and Co Creation Engaging Citizens in Public Services offers a systematic and comprehensive theoretical and empirical examination of the concepts of co production and co creation and their application in practice It shows the latest

state of knowledge on the topic and will be of interest both to students at an advanced level academics and reflective practitioners It addresses the topics with regard to co production and co creation and will be of interest to researchers academics policymakers and students in the fields of public administration business administration economics political science public management political science service management sociology and voluntary sector studies *Mapping and Measuring Deliberation* André Bächtiger, John Parkinson, 2019-01-03 Deliberative democracy has challenged two widely accepted nostrums about democratic politics that people lack the capacities for effective self government and that democratic procedures are arbitrary and do not reflect popular will indeed that the idea of popular will is itself illusory On the contrary deliberative democrats have shown that people are capable of being sophisticated creative problem solvers given the right opportunities in the right kinds of democratic institutions But deliberative empirical research has its own problems In this book two leading deliberative scholars review decades of that research and reveal three important issues First the concept deliberation has been inflated so much as to lose empirical bite second deliberation has been equated with entire processes of which it is just one feature and third such processes are confused with democracy in a deliberative mode more generally In other words studies frequently apply micro level tools and concepts to make macro and meso level judgements and vice versa Instead Bächtiger and Parkinson argue that deliberation must be understood as contingent performative and distributed They argue that deliberation needs to be disentangled from other communicative modes that appropriate tools need to be deployed at the right level of analysis and that scholars need to be clear about whether they are making additive judgements or summative ones They then apply that understanding to set out a new agenda and new empirical tools for deliberative empirical scholarship at the micro meso and macro levels *Handbook of Democratic Innovation and Governance* Stephen Elstub, Oliver Escobar, 2019-12-27 Democratic innovations are proliferating in politics governance policy and public administration These new processes of public participation are reimagining the relationship between citizens and institutions This Handbook advances understanding of democratic innovations in theory and practice by critically reviewing their importance throughout the world The overarching themes are a focus on citizens and their relationship to these innovations and the resulting effects on political equality The Handbook therefore offers a definitive overview of existing research on democratic innovations while also setting the agenda for future research and practice

Collaborative Governance for Urban Revitalization Michael J. Rich, Robert P. Stoker, 2014-05-29 For more than one hundred years governments have grappled with the complex problem of how to revitalize distressed urban areas In 1995 the original urban Empowerment Zones Atlanta Baltimore Chicago Detroit New York and Philadelphia each received a 100 million federal block grant and access to a variety of market oriented policy tools to support the implementation of a ten year strategic plan to increase economic opportunities and promote sustainable community development in high poverty neighborhoods In *Collaborative Governance for Urban Revitalization* Michael J Rich and Robert P Stoker confront the puzzle

of why the outcomes achieved by the original Empowerment Zones varied so widely given that each city had the same set of federal policy tools and resources and comparable neighborhood characteristics The authors analysis based on more than ten years of field research in Atlanta and Baltimore and extensive empirical analysis of EZ processes and outcomes in all six cities shows that revitalization outcomes are best explained by the quality of local governance Good local governance makes positive contributions to revitalization efforts while poor local governance retards progress While policy design and contextual factors are important how cities craft and carry out their strategies are critical determinants of successful revitalization Rich and Stoker find that good governance is often founded on public private cooperation a stance that argues against both the strongest critics of neoliberalism who see private enterprise as dangerous in principle and the strongest opponents of liberalism who would like to reduce the role of government *Whose Government Is It?* Henry B. Tam,2019-02-27 This book brings together leading figures in democratic reform and civic engagement to show why and how better state citizen cooperation is necessary for achieving positive social change Their contributions demonstrate that while protest and non state action may have their place citizens must also work effectively with public bodies to secure sustainable improvements The authors explain why the problem of civic disengagement poses a major threat highlight what actions can be taken and suggest how the underlying obstacles to democratic cooperation between citizens and state institutions can be overcome across a range of policy areas and in varied national contexts
