Addressing violence against women in health and multisectoral policies ,2021-12-10 *Redefining and Combating Poverty* Council of Europe,2012-01-01 We are at a point in history where economic inequalities are more widespread each day The situation of extreme poverty experienced by the majority of the populations in developing countries Third World countries often coincides with an absence of democracy and the violation of the most fundamental rights But in so called First World countries a non negligible proportion of inhabitants also live in impoverished conditions albeit mainly relative poverty and are denied their rights The European situation which this publication aims to analyse is painful the entire continent is afflicted by increasing poverty and consequently by the erosion of living conditions and social conflicts The economic and financial crisis has resulted in the loss of millions of jobs and created job insecurity for many still working Economic insecurity raises social tensions aggravating xenophobia for instance Yet the economic and financial crisis could present a good opportunity to rethink the economic and social system as a whole Indeed poverty in modern societies has never been purely a question of lack of wealth It is therefore urgent today to devise a new discourse on poverty In pursuit of this goal the Council of Europe is following up this publication in the framework of the project Human rights of people experiencing poverty co financed by the European Commission

Decent Incomes for All Bea Cantillon,Tim

Goedemé, John Hills, 2019 For more than a decade organizations such as the IMF OECD and the ILO have issued concerns about the trend of increased inequality in rich welfare states while influential thinkers and think tanks have come to agree on at least one central point globalization and technological progress have exacerbated the existing inequities in social market economies Across Europe despite high social spending and work related welfare reforms poverty remains a largely intractable problem for policymakers and the persistent reality for citizens In Decent Incomes for All the authors shed new light on recent poverty trends in the European Union and the corresponding responses by European welfare states They analyze the effect of social and fiscal policies before during and after the recent economic crisis and study the impact of alternative policy packages on poverty and inequality The book also explores how social investment and local initiatives of social innovation can contribute to tackling poverty while recognizing that there are indeed structural constraints on the increase of the social floor and difficult trade offs involved in reconciling work and poverty reduction Differences across countries are however stark which suggests that there are lessons to be learned and policy changes to be applied if the political will exists
