Emulsions And Solubilization:

Emulsions and Solubilization Kozo Shinoda, Stig Friberg, 1986-08-21 Contains information useful for demonstrating the relation between the function of Hydrophilic Lipophilic Balance HLB and solubilization microemulsions and emulsion stability or inversion Covers the effect of temperature on systems containing nonionic surfactants and studies of the surfactant as a function of temperature Also demonstrates how the HLB solution properties of the surfactant can be controlled to change from water soluble to oil soluble

Micellization, Solubilization, and Microemulsions K.L. Mittal, 2012-12-06 This volume and its companion Volume 1 chronicle the proceedings of the International Symposium on Micellization Solubilization and Microemulsions held under the auspices of the Northeast Regional Meeting of the American Chemical Society in Albany New York August 8-11 1976 The technical program consisted of 48 papers by 91 authors from twelve countries The program was divided into six sessions and Dr Hartley delivered the Concluding Remarks Subsequently six more papers were contributed for the proceedings volumes with the result that these volumes contain 51 papers three papers are not included for certain reasons and are divided into seven parts The first three parts are embodied in Volume I and the remaining four parts constitute Volume 2 each part is followed by a Discussion Section Dr Hartley's Concluding Remarks are included in both volumes When the idea of arranging a symposium on micelles was broached to me I accepted it without an iota of hesitation I had two options either to make it a one or two sessions symposium or bring together the global community actively carrying out research in this area I opted for the latter as the subject was very timely and I knew that it would elicit very enthusiastic response In order to broaden the scope of the symposium I suggested that the theme of the symposium should be Micellization Solubilization and Microemulsions
