The Struggle over the Soul of Economics Yuval P. Yonay,1998-05-11 This book provides a surprising answer to two puzzling questions that relate to the very soul of the professional study of economics in the late twentieth century How did the discipline of economics come to be dominated by an approach that is heavily dependent on mathematically derived models And what happened to other approaches to the discipline that were considered to be scientifically viable less than fifty years ago Between the two world wars there were two well accepted schools of thought in economics the neoclassical which emerged in the last third of the nineteenth century and the institutionalist which started with the works of Veblen and Commons at the end of the same century Although the contributions of the institutionalists are nearly forgotten now Yuval Yonay shows that their legacy lingers in the study and practice of economics today By reconsidering their impact and by analyzing the conflicts that arose between neoclassicists and institutionalists Yonay brings to life a hidden chapter in the history of economics The author is a sociologist of science who brings a unique perspective to economic history By utilizing the actor network approach of Bruno Latour and Michel Callon he arrives at a deeper understanding of the nature of the changes that took place in the practice of economics His analysis also illuminates a broader set of issues concerning the nature of scientific practice and the forces behind changes in scientific knowledge      *The Institutional Movement in American Economics, 1918-1947* Malcolm Rutherford,2011-02-21 This book provides a detailed picture of the institutionalist movement in American economics concentrating on the period between the two World Wars The discussion brings a new emphasis on the leading role of Walton Hamilton in the formation of institutionalism on the special importance of the ideals of science and social control embodied within the movement on the large and close network of individuals involved on the educational programs and research organizations created by institutionalists and on the significant place of the movement within the mainstream of interwar American economics In these ways the book focuses on the group most closely involved in the active promotion of the movement on how they themselves constructed it on its original intellectual appeal and promise and on its institutional supports and sources of funding      Farmer Cooperatives ,1980      **Economist With a Public Purpose** Michael Keaney,2000-12-21 This text discusses the continuing relevance of one of the most prominent economists of the twentieth century The contributors explore the continuing relevance of Galbraith s arguments to current controversies and problems      **On the History of Economic Thought** A. W. Bob Coats,2005-08-08 On the History of Economic Thought is introduced by an essay in intellectual autobiography outlining the development of Coats key ideas and the distinctive elements of his approach Two themes in particular emerge The first is the difference between British and American economics both in content and in the practice of the profession This is an important element in all areas of his research The second theme is in the interrelationships between economic ideas events or conditions and policy issues The book concludes

by offering an assessment of the current state of the discipline indicating the advantages an historian of economics can offer as a commentator on recent developments

**The Revolt Against the Masses** Aaron Wildavsky, 2018-04-24 The author of this stunning set of essays on politics and public policy makes crystal clear the meaning of the title The revolutionaries of contemporary America do not seek to redistribute privilege from those who have it to those who do not These radicals wish to arrange a transfer of power from those elites who now exercise it to another elite namely themselves who do not This aspiring elite is of the same race white the same class upper middle and upper and the same educational background the best colleges and universities as those they wish to displace Wildavsky's bracing work takes a close look at these elites who probably make up little more than one percent of the population He sees their common denominator as hostility toward the masses anti American attitudes derision of authority and a belief in participatory rather than representative politics The author carries through these themes in a variety of essays on black white racial relations social work orientations and black militancy the politics of budgetary reform elite and mass trends in the political party system and the substitution of bureaucratic for democratic modes of advancing the policy process This work is in short vintage Wildavsky tough minded spirited and plain spoken political analysis In his new Introduction Irving Louis Horowitz examines what has changed and what continues to be salient in Wildavsky's line of analysis Essentially the report card on *The Revolt Against the Masses* is that the situation described in these essays has changed somewhat in style but hardly at all in substance The nuclear shield replaces the ABM treaty and Afghanistan replaces Vietnam as centers of political gravity but the same coalition of forces across party and economy still dominate the American political process The justifiably famous essay on *The Two Presidencies* shows how persistent is the gap between the conflict over domestic priorities and the consensus on foreign policy and why This is in short a classic text that continues to merit careful study by all those interested in political life Aaron Wildavsky was until his death in 1993 professor of political science and public policy at the University of California in Berkeley He was also director of its Survey Research Center He served as director of the Russell Sage Foundation was a president of the American Political Science Association and held a number of visiting professorships during his lifetime Most recently Transaction has posthumously published Wildavsky's complete essays and papers in five volumes Irving Louis Horowitz is Hannah Arendt distinguished university professor emeritus at Rutgers The State University and longtime friend and associate of Aaron Wildavsky
