Ego Self Person Context:

Ego, Self, Person, Context Robert Howard Roth, 1992-01-01 **Expressing the Self** Minyao Huang, Kasia M. Jaszczolt, 2018-02-24 This book addresses different linguistic and philosophical aspects of referring to the self in a wide range of languages from different language families including Amharic English French Japanese Korean Mandarin Newari Sino-Tibetan Polish Tariana Arawak and Thai In the domain of speaking about oneself languages use a myriad of expressions that cut across grammatical and semantic categories as well as a wide variety of constructions Languages of Southeast and East Asia famously employ a great number of terms for first person reference to signal honorification The number and mixed properties of these terms make them debatable candidates for pronounhood with many grammar driven classifications opting to classify them with nouns Some languages make use of egophors or logophors and many exhibit an interaction between expressing the self and expressing evidentiality qua the epistemic status of information held from the ego perspective The volume's focus on expressing the self however is not directly motivated by an interest in the grammar or lexicon but instead stems from philosophical discussions on the special status of thoughts about oneself known as de se thoughts It is this interdisciplinary understanding of expressing the self that underlies this volume comprising philosophy of mind at one end of the spectrum and cross cultural pragmatics of self expression at the other This unprecedented juxtaposition results in a novel method of approaching de se and de se expressions in which research methods from linguistics and philosophy inform each other The importance of this interdisciplinary perspective on expressing the self cannot be overemphasized Crucially the volume also demonstrates that linguistic research on first person reference makes a valuable contribution to research on the self tout court by exploring the ways in which the self is expressed and thereby adding to the insights gained through philosophy psychology and cognitive science Coaching Psychology: Meta-theoretical perspectives and applications in multicultural contexts Llewellyn E. van Zyl, Marius W. Empathy, Embodiment, and the Person James Jardine, 2022-02-11 This text explores how self consciousness and self understanding differ phenomenologically from the experience and comprehension of others and the extent to which such relations are constitutively interdependent Jardine argues that Husserl's analyses of selfhood and intersubjectivity are animated by the question of what's at stake in recognising an agent's engagement as the situated response of a person rather than simply as the comportment of an animal or living body Drawing centrally from the freshly excavated *Ideas II* drafts and manuscripts the author develops Husserl's often fragmentary investigations of attention habit emotion freedom the common world and action and considers their implications for subjectivity and the experience of others *Empathy Embodiment and the Person* also brings Husserlian phenomenology into dialogue with twenty first century philosophical concerns from accounts of selfhood and agency from analytic philosophy to the treatment of social experience in critical theory The book shows the reader that transcendental phenomenology can be rejuvenated by engaging with a broader philosophical landscape and will appeal to researchers students and instructors in the field

Williams,2013-11-11 Child adolescent development and behavior have been a traditional concern of primary health care providers However it was not until the mid 1960s that attempts were made to consolidate developmental behavioral issues into an identifiably distinct fund of medical knowledge During the ensuing two decades developmental behavioral pediatrics was recognized as a clinical and research subspecialty within the framework of comprehensive health care for children The influence of public advocacy groups topic dedicated journals national professional specialty societies subject related continuing education programs and federal legislation PL94 142 has served to crystallize developmental behavioral pediatrics as a specialized field of study As a consequence during the past ten years significant modifications have restructured medical student and pediatric resident education providing an emphasis on developmental behavioral issues The focus on neurodevelopmental educational and psychosocial issues reflects changing

priorities in traditional health care for children The postgraduate training of pediatric fellows in two and three year training programs was initiated to accommodate professional manpower needs in both academic and practice settings Many of the problems in childhood development and behavior frequently span the traditional areas of child neurology child psychiatry and general pediatrics As a result there has been some confusion in demarcating professional responsibilities in diagnosis and management as well as poorly defined terminology and classification schemas With the birth of developmental pediatrics as a pediatric specialty a more cohesive fund of knowledge has been accumulated and more meaningful strategies have beendesigned for prevention diagnosis and management *Psychiatry* Allan Tasman, Jerald Kay, Jeffrey A.
